Pegasystems Certified Pega Senior System Architect 24 Sample Questions (Q170-Q175):

NEW QUESTION # 170

What are two benefits of data encryption?
(Choose Two)
Response:

- A. Data encryption reduces data storage complexity.
- B. Data encryption improves data access time.
- C. Data encryption provides security for data while being stored and transported.
- D. Data encryption reduces risk of unauthorized data exposure.

Answer: C,D

NEW QUESTION # 171

Which are two principles of General Data Protection Regulation (GDPR)?
(Choose Two)
Response:

- A. Maximize personal data collection
- B. Ensure data integrity and confidentiality
- C. Process data transparently
- D. Share personal data without restriction

Answer: B,C

NEW QUESTION # 172

You want to evaluate cases as potential duplicates when the existing cases and the current case have the same create operator. How would you ensure that only cases with the same create operator are evaluated?
Response:

- A. Add a must match condition where the create operator in an existing case is the same as in the current case
- B. Add a must match condition using the create operator value and apply a weight of 100.
- C. Add a weighted condition using the create operator value, an equals operator, and a weight of 100.
- D. Add a weighted condition using the create operator value in both condition fields, an equals operation, and weight of 0.

Answer: A

NEW QUESTION # 173

You are building an application with several development teams. Requirements state that the respective support contact name from each team appears on the header of the application as it moves through the various development phases.
What configuration best allows you to accomplish this requirement?
Response:

- A. Configure a When condition to update the the support contact name depending on what production phase the application is in. Have your application display the appropriate name value sourced from conditional logic.
- B. Create multiple applications, one for each development phase that lists the appropriate support contact name on the header. Release a new application for each development phase.
- C. Configure a data transform to populate the appropriate support contact name for each respective development phase. Update the data transform as each production phase changes and direct the application's header to use the name value sourced from the data transform.
- D. Create a new Application Settings configuration entering the appropriate support contact names for each respective development phase. Direct the header to reference the Application Settings to display the support contact name.

Answer: D

NEW QUESTION # 174

You are configuring a drop-down list with a page list property. When the user selects an item in the list, you want to retrieve data associated with the selected item and add the data to the case.

How do you configure the data access for the page list property?
Response:

- A. Select the Allow use as reference property in activities option so the selected information can be retrieved using an activity.
- B. Select the Refer to a data page option so the selected information can be retrieved using a data page lookup.
- C. Select the Copy data from a data page option so the selected information can be retrieved using a data page lookup.
- D. Select the Manual option so the user can add selected data to the page-type property through the UI.

Answer: D

NEW QUESTION # 175
......
