Oracle Project Management Cloud 2025 Implementation Professional Sample Questions (Q77-Q82):

NEW QUESTION # 77

In a Project Draft Invoice preview, quantity (hours) and unit price (bill rate) are shown as fields on the invoice. Quantity and unit price are then used to calculate the line total, then the total price of the invoice.

After the invoice is transferred or created in Receivables, the invoice detail has a quantity of 1, and a unit price equal to the line total.

The detailed Unit Price/Quantity does not come through on the Receivables invoice.
Identify the correct statement about details in the receivables invoice. (Choose the best answer.)

- A. The project sends only the invoice header and invoice line description to Receivables, not the invoice distributions.
- B. The project sends only the invoice header to Receivables, not the invoice line description and distributions.
- C. The project sends the invoice line description and the invoice distributions to Receivables, but not the invoice header.
- D. The project sends the invoice header, invoice line description, and the invoice distributions to Receivables.

Answer: A

Explanation:

When a project invoice is transferred or created in Receivables, the project sends only the invoice header and invoice line description to Receivables, not the invoice distributions. The invoice distributions contain the detailed information such as quantity, unit price, and line total. Therefore, the Receivables invoice does not show these details, but only shows a quantity of 1 and a unit price equal to the line total. Reference:

NEW QUESTION # 78

Your organization has a requirement to retrieve the value of the cost center segment based on the department.
Which source can you use while defining the account rule to achieve this requirement?

- A. Expenditure Organization Cost Center Segment
- B. Event Organization Cost Center Segment
- C. Expenditure Business Unit Cost Center Segment
- D. Project Organization Cost Center Segment

Answer: A

Explanation:

The source that can be used while defining the account rule to achieve this requirement is Expenditure Organization Cost Center Segment. This source allows you to retrieve the value of the cost center segment based on the expenditure organization of the transaction. The expenditure organization is an attribute of a transaction that represents the organization that incurs or owns the cost of the transaction.

NEW QUESTION # 79

While opening an organization tree on the Manage Organization Trees page, you notice that the hierarchy status is displayed as Inactive. Identify the two reasons for the organization tree to be in Inactive status. (Choose two.)

- A. You opened the hierarchy by clicking the name.
- B. You used Create Tree in the action menu.
- C. You selected the Edit icon for opening the hierarchy.
- D. You used View Tree Version in the action menu.
- E. You used Create Tree Version in the action menu.

Answer: B,E

Explanation:

When you use Create Tree or Create Tree Version in the action menu, you create a new organization tree or a new version of an existing tree, respectively. These actions result in an Inactive status for the organization tree, until you activate it. When you use View Tree Version or select the Edit icon or click the name of the tree, you open an existing organization tree that has an Active status.

NEW QUESTION # 80

Which setup option is common to both financial and project plan types?

- A. Manage the options for creating control budgets in Oracle Fusion Budgetary Control.

- B. Enable the use of a workflow for managing budget or forecasting status changes.
- C. Identify whether the plan type is the default selection when you create budget or forecast versions.
- D. **Enable the entry of plan amounts in currencies other than the project currency.**

Answer: D

Explanation:

Ref: <https://docs.oracle.com/en/cloud/saas/project-portfolio-management/19b/oapfm/project-control-configuration-manage-financial-and-project-plan-types.html#OAPFM75315> Financial and Project Plan Setup Options The following table describes the basic budget, forecast, or project plan setup options that determine how a plan type is used in the context of a project. Except for third-party scheduling, you can't edit these options at the project level.

Option

Location

Description

Planning amounts

Financial plan type

Indicates that the financial plan type supports the creation of versions with the following amounts:

* Cost amounts

* Revenue amounts

* Both cost and revenue amounts

* Either cost or revenue amounts

Approved budget or primary forecast

Financial plan type

Determines whether a financial plan type is used for creating approved budget versions or primary forecast versions that are used for plan comparison or project performance reporting.

Default financial plan type

Financial plan type

Determines whether the financial plan type is the default selection when you create budget or forecast versions.

Workflows

Financial plan type

Enables the use of a workflow for managing budget or forecast status changes.

Third-party scheduling software

Project plan type

Indicates whether project planning is performed in Microsoft Project.

If third-party scheduling is disabled in the project plan type, you can use the associated project or project template to create a project in Microsoft Project. However, you can't export the new project or link it to one created in Oracle Fusion Project Portfolio Management.

Multiple transaction currencies

Financial and project plan type

Enables entry of plan amounts in currencies other than the project currency.

Budgetary control settings

Financial plan type

Manages options for creating control budgets in Oracle Fusion Budgetary Control.

NEW QUESTION # 81

Which component provides a human workflow service that handles all interactions with users or groups in business processes?

- A. SOA Suite
- B. Subledger Accounting
- C. Security Console
- D. **BPM Worklist**

Answer: D

Explanation:

The BPM Worklist component provides a human workflow service that handles all interactions with users or groups in business processes. The BPM Worklist allows users to view, act on, track, and administer workflow tasks that require their attention. Users can also delegate, escalate, or reassign tasks to other users or groups as needed. Reference:
