Quiz SAP - Efficient C_ABAPD_2507 - Practice SAP Certified Associate - Back-End Developer - ABAP Cloud Exam Fee

The ExamDiscuss is offering valid, updated, and real SAP C_ABAPD_2507 practice test questions. The ExamDiscuss is committed to making the SAP C_ABAPD_2507 exam preparation the simplest, easiest, and fast. We are quite confident that with SAP C_ABAPD_2507 Practice Exam Questions you can pass the challenging SAP C_ABAPD_2507 exam.

SAP Certified Associate - Back-End Developer - ABAP Cloud Sample Questions (Q44-Q49):

NEW QUESTION # 44

In a subclass subl you want to redefine a component of a superclass superl. How do you achieve this? Note: There are 2 correct answers to this question.

- A. You implement the redefined component for a second time in superl.
- B. You add the clause REDEFINITION to the component in subl.
- C. You implement the redefined component in subl.
- D. You add the clause REDEFINITION to the component in superl.

Answer: B,C

Explanation:
To redefine a component of a superclass in a subclass, you need to do the following12:
You add the clause REDEFINITION to the component declaration in the subclass. This indicates that the component is inherited from the superclass and needs to be reimplemented in the subclass. The redefinition must happen in the same visibility section as the component declaration in the superclass. For example, if the superclass has a public method m1, the subclass must also declare the redefined method m1 as public with the REDEFINITION clause.
You implement the redefined component in the subclass. This means that you provide the new logic or behavior for the component that is specific to the subclass. The redefined component in the subclass will override the original component in the superclass when the subclass object is used. For example, if the superclass has a method m1 that returns 'Hello', the subclass can redefine the method m1 to return 'Hi' instead.
You cannot do any of the following:
You implement the redefined component for a second time in the superclass. This is not possible, because the superclass already has an implementation for the component that is inherited by the subclass. The subclass is responsible for providing the new implementation for the redefined component, not the superclass.
You add the clause REDEFINITION to the component in the superclass. This is not necessary, because the superclass does not need to indicate that the component can be redefined by the subclass. The subclass is the one that needs to indicate that the component is redefined by adding the REDEFINITION clause to the component declaration in the subclass.

NEW QUESTION # 45
You want to check the behavior of an ordinary class ZCL_ORDINARY with class LTCL_TEST. How do you specify LTCL_TEST as a test class?

- A. Create a parameter in the SETUP method of LTCL_TEST and set its value to "Test".
- B. Create LTCL_TEST in a special package that is reserved for test classes.
- C. Use the addition FOR TESTING in the class declaration of LTCL_TEST.
- D. Use the addition FOR TESTING: LTCL_TEST in the class declaration of ZCL_ORDINARY.

Answer: C

Explanation:
Comprehensive and Detailed Explanation From Exact Extract:
* ABAP Unit test classes are declared with the addition FOR TESTING in the class definition. RAP test guides also show the same ABAP Unit pattern for local test classes:
* CLASS ltcl_sc_r_agency DEFINITION FINAL FOR TESTING
* DURATION SHORT
* RISK LEVEL HARMLESS.
This is the canonical way to mark an ABAP class as a test class.

NEW QUESTION # 46
Which of the following are valid ABAP SQL type conversions? Note: There are 3 correct answers to this question.

- A. CAST (34 as I) AS f_i34
- B. CAST (29 as INT8) AS f_int8
- C. CAST (field_f2 as N (8)) AS f_n8
- D. CAST (field_f5 as DEC (15,2)) AS f_dec_15_2
- E. CAST ('field_f1' as CHAR (8))) AS f_chars

Answer: B,D,E

NEW QUESTION # 47

Which internal table type allows unique and non-unique keys?

- A. Standard
- B. Sorted
- C. Hashed

Answer: B

NEW QUESTION # 48

You want to extract date information of a flight date (f_info) and format it like yyyy-dd-mm using the following code:
SELECT FROM TABLE dbtab1
FIELDS f1,
extract_year(f_info) && '-' && extract_month(f_info) && '-' && extract_day(f_info) ...
For the extract_* functions to work, what can be the data dictionary types of f_info?
Note: There are 3 correct answers to this question.

- A. DATS
- B. TIMESTAMP
- C. TIMN
- D. UTCLONG
- E. TIMS

Answer: A,B,D

Explanation:
Comprehensive and Detailed Explanation From Exact Extract:
The EXTRACT_YEAR, EXTRACT_MONTH, and EXTRACT_DAY functions in ABAP SQL are SQL built-in functions used for extracting date components. These functions are only supported for timestamp- capable or date-capable fields.
According to the ABAP CDS Development Guide and SAP HANA SQL capabilities available to ABAP SQL via CDS or native SQL:
* DATS (ABAP Dictionary data type for dates) is fully supported for extract functions.
* TIMESTAMP and UTCLONG are also supported since they represent full date-time values and are mapped internally to TIMESTAMP with time zone considerations.
* TIMS is a time-only type and is not valid for extract date functions.
* TIMN is for time periods and is also not valid for extracting year, month, or day.
Therefore:
* Option B (UTCLONG) - correct
* Option C (TIMESTAMP) - correct
* Option D (DATS) - correct
* Options A (TIMS) and E (TIMN) - incorrect
Reference: ABAP CDS Development User Guide, section 2.2 - SQL expressions and supported built-in functions in code pushdown; extract_* documented for date/time-compatible types.

NEW QUESTION # 49

......

pattern, Rely on material of the free C_ABAPD_2507 braindumps online sample tests, and resource material available on our website .These free web sources are significant for C_ABAPD_2507 certification syllabus, And with our C_ABAPD_2507 exam questions.

Many study guides always jack up their prices for profiteering, Wim C_ABAPD_2507 Crouwel's calendar is a good example of his experimental type, When you grow older, it is more difficult for you to get a certificate.

Quiz SAP - C_ABAPD_2507 –High-quality Practice Exam Fee

ExamDiscuss has designed this set of real SAP C_ABAPD_2507 PDF Questions in accordance with the C_ABAPD_2507 exam syllabus and pattern, Rely on material of the free C_ABAPD_2507 braindumps online sample tests, and resource material available on our website .These free web sources are significant for C_ABAPD_2507 certification syllabus.

And with our C_ABAPD_2507 exam questions, Our most wanted version of the SAP Exam Questions is our PDF eBook, and it is convenient even students can easily use it.
