

FCP_ZCS-AD-7.4 Exam Braindumps - FCP_ZCS-AD-7.4 Quiz Torrent & FCP_ZCS-AD-7.4 Exam Quiz

Exam Details

Exam name	FCP - Azure Cloud Security 7.4 Administrator
Exam series	FCP_ZCS_AD-7.4
Time allowed	70 minutes
Exam questions	35 multiple-choice questions
Scoring	Pass or fail. A score report is available from your Pearson VUE account.
Language	English
Product version	FortiGate 7.4, FortiWeb 7.2

Exam Topics

Successful candidates have applied knowledge and skills in the following areas and tasks:

- Azure public cloud concepts
 - Describe public cloud basic concepts and components
 - Describe Azure basic concepts and components
- Azure components
 - Explain Azure components and networking elements
 - Explain Azure security services
- Fortinet product deployment
 - Describe the Fortinet solutions in Azure
 - Deploy a single FortiWeb instance
 - Deploy a single FortiGate instance
 - Configure FortiGate Azure SDN integration
- High availability (HA)
 - Configure HA using FortiGate in Azure
 - Configure load balancing and autoscaling
 - Explain Azure route server concepts
 - Explain Azure route server use cases
- VPN solutions in Azure
 - Explain the site-to-site connection options in Azure
 - Deploy connections between FortiGate and Azure VPN gateway
 - Explain Azure virtual WAN concepts
 - Deploy Azure virtual WAN

TroytecDumps has designed FCP - Azure Cloud Security 7.4 Administrator which has actual exam Dumps questions, especially for the students who are willing to pass the Fortinet FCP_ZCS-AD-7.4 exam for the betterment of their future. The study material is available in three different formats. Fortinet Practice Exam are also available so the students can test their preparation with unlimited tries and pass FCP - Azure Cloud Security 7.4 Administrator (FCP_ZCS-AD-7.4) certification exam on the first try.

Once the user has used our FCP_ZCS-AD-7.4 test prep for a mock exercise, the product's system automatically remembers and analyzes all the user's actual operations. The user must complete the test within the time specified by the simulation system, and there is a timer on the right side of the screen, as long as the user begins the practice of FCP_ZCS-AD-7.4 quiz guide, the timer will run automatic and start counting. If the user does not complete the mock test question in a specified time, the practice of all FCP_ZCS-AD-7.4 valid practice questions previously done by the user will automatically uploaded to our database. The system will then generate a report based on the user's completion results, and a report can clearly understand what the user is good at. Finally, the transfer can be based on the FCP_ZCS-AD-7.4 Valid Practice Questions report to develop a learning plan that meets your requirements. With constant practice, users will find that feedback reports are getting better, because users spend enough time on our FCP_ZCS-AD-7.4 test prep.

Latest FCP_ZCS-AD-7.4 Practice Exam Guide Materials: FCP - Azure Cloud Security 7.4 Administrator - TroytecDumps

If you don't work hard to improve your strength, you can't get the chance you want. Without chance, you will not be able to obtain your desired status and salary. This society is such a reality. It is also fair. Every year, many people purchase our FCP_ZCS-AD-7.4 study materials. With the help of our FCP_ZCS-AD-7.4 Exam Braindumps, they successfully passed the exam and got the certification, and became more and more successful than before. So if you buy our FCP_ZCS-AD-7.4 practice questions, you will have a brighter future!

Fortinet FCP - Azure Cloud Security 7.4 Administrator Sample Questions (Q10-Q15):

NEW QUESTION # 10

Your organization is in the process of optimizing its Azure network architecture and wants to dynamically manage and exchange routing information between its virtual networks and on-premises networks.

Which Azure service would help to provide a centralized point for efficient route management and dynamic routing?

- A. Azure ExpressRoute
- B. Azure Virtual WAN
- C. Azure Route Server
- D. Azure VPN Gateway

Answer: C

Explanation:

Azure Route Server enables dynamic route exchange using BGP between your Azure virtual network and network virtual appliances (NVAs) or on-premises networks. It provides a centralized and scalable solution for route management, allowing seamless integration of routing updates without manual configuration changes.

NEW QUESTION # 11

You are deploying a site-to-site IPsec VPN connection between your on-premise subnet and your Azure VNets.

What is the most important advantage for using FortiGate at both ends of the tunnel?

- A. It reduces the need for troubleshooting due to FortiGate automatic configuration
- B. It provides consistent security policies and configurations
- C. It allows scaling based on performance and capacity requirements
- D. It minimizes the need for encryption in transit

Answer: B

Explanation:

Using FortiGate at both ends of a site-to-site IPsec VPN tunnel provides the advantage of applying consistent security policies, configurations, and management tools across both the on-premises and Azure environments. This simplifies policy enforcement, improves operational efficiency, and ensures uniform threat protection.

NEW QUESTION # 12

How does Azure ExpressRoute contribute to achieving predictable latency for network traffic?

- A. By prioritizing Azure ExpressRoute traffic over other network traffic
- B. By relying on load balancing to dynamically optimize latency
- C. By using public internet connections for enhanced routing flexibility
- D. By establishing dedicated private connections to Azure data centers

Answer: D

Explanation:

Azure ExpressRoute provides dedicated private connections between on-premises infrastructure and Azure data centers, bypassing the public internet. This results in more predictable latency, higher reliability, and better security, making it ideal for mission-critical workloads.

NEW QUESTION # 13

What characterizes the branch-to-branch topology in an Azure virtual WAN?

- A. Improved scalability for branch offices connecting to Azure
- B. Enhanced security through centralized traffic management
- C. Increased redundancy through multiple connections to the central hub
- D. Simplified network architecture with reduced hub dependencies

Answer: A

Explanation:

The branch-to-branch topology in Azure Virtual WAN is characterized by direct connectivity between branches through the Virtual WAN backbone, which reduces dependency on centralized hubs. This results in a simplified network architecture, lowering latency and optimizing routing between branch locations.

NEW QUESTION # 14

Refer to the exhibit.

```
FGTHA-FGT-A # diagnose sys ha status
HA information
Statistics
    traffic.local = s:0 p:66317 b:50458201
    traffic.total = s:0 p:66306 b:50443269
    activity.ha_id_changes = 2
    activity.fdb = c:0 q:0

Model=98010, Mode=0 Group=0 Debug=0
nvcluster=0, ses_pickup=0, delay=0

[Debug_Zone HA information]
HA group member information: is_manage_primary=1.

[Kernel HA information]Silent vcluster bitmap=00000000000000000000000000000000

FGTHA-FGT-A # get system ha status
HA Health Status: OK
Model: FortiGate-VM64-AZURE
Mode: Standalone
Group Name:
Group ID: 0
Debug: 0
Cluster Uptime: 0 days 0:0:0
Cluster state change time: N/A
ses_pickup: disable
override: disable
System Usage stats:
HBDEV stats:
number of member: 0
number of vcluster: 0
```

A high availability, active-active FortiGate with Elastic Load Balancing (ELB) and Internal Load Balancing (ILB) was deployed in your Azure environment.

Which tools can you use to configure synchronization? (Choose two.)

- **A. FortiGate Clustering Protocol (FGCP)**
- B. Autoscale
- C. Software-defined network (SDN) Fabric Connector
- D. FortiManager
- **E. Heartbeat interfaces**

Answer: A,E

Explanation:

In a FortiGate active-active HA deployment in Azure, synchronization between instances is achieved using FortiGate Clustering Protocol (FGCP)- This is the primary protocol used to synchronize configuration and session information between HA peers.

FORTINET.

troytecdumps.com

Heartbeat interfaces- These interfaces are specifically configured to exchange HA state and sync data between the FortiGate VMs, ensuring cluster consistency.

FORTINET.
