- B. Each template group can contain up to three IPsec tunnel templates.
- **C. A template group can include a system template and an SD-WAN template.**

Answer: C,D,E

NEW QUESTION # 19

Refer to the exhibits. The exhibits show the SD-WAN zone configuration of an SD-WAN template prepared on FortiManager and the policy package configuration.

When the administrator tries to install the configuration changes, FortiManager fails to commit.

What should the administrator do to fix the issue?

Ⓜ

- A. Configure both HUB1-VPN1 and HUB1-VPN2 as the destination of policy 3.
- B. Configure branch1_fgt as the installation target for policy 3.
- C. Configure a normalized interface for the IPsec tunnel HUB1-VPN1.
- **D. Configure HUB1 as the destination of policy 3.**

Answer: D

Explanation:

Policy 3 points traffic To = HUB1-VPN1, which is an SD-WAN member interface. In SD-WAN you must reference the SD-WAN zone (the logical interface) in policies, not its member tunnels.

Change the policy's To interface to the zone HUB1, and the install will succeed.

NEW QUESTION # 20

You manage an SD-WAN topology. You will soon deploy 50 new branches. Which three tasks can you do in advance to simplify this deployment? (Choose three.)

- A. Create model devices.
- B. Create policy blueprint.
- C. Define metadata variables value for each device.
- D. Create a ZTP template.
- E. Update the DHCP server configuration.

Which statement best describes the cause of the issue?

- A. You can assign only one template with a tunnel type of static to each FortiGate device.
- B. You should use the same outgoing interface of both templates.
- C. You should review the branch1_fgt configuration for configured tunnels in the rootVDOM.
- D. You can assign only one IPsec template to each FortiGate device.

Answer: D
