Free update for 365 days for Deep-Security-Professional study guide materials is available. That is to say, in the following year, you can get the latest information of the exam for free. Besides, our system will send the latest version of Deep-Security-Professional exam dumps to your email automatically. And you just need to receive them and carry on your practice. With the experienced experts to compile Deep-Security-Professional Study Guide materials, the quality can be guaranteed. And if you choose us, we will help you pass the exam successfully, and obtaining a certificate isn't a dream.

Eliminates confusion while taking the Trend Deep-Security-Professional certification exam. Prepares you for the format of your Trend Deep-Security-Professional exam dumps, including multiple-choice questions and fill-in-the-blank answers. Comprehensive, up-to-date coverage of the entire Trend Deep-Security-Professional Certification curriculum.

Deep-Security-Professional Valid Dumps Free, Deep-Security-Professional New Questions

If applicants fail to find reliable material, they fail the Deep-Security-Professional examination. Failure leads to loss of money and time. You just need to rely on VerifiedDumps to avoid these losses. VerifiedDumps has launched three formats of real Deep-Security-Professional Exam Dumps. This product is enough to get ready for the Trend Deep-Security-Professional test on the first attempt. Three formats are easy to use and meet the needs of every Trend Micro Certified Professional for Deep Security (Deep-Security-Professional) test applicant. The Trend Deep-Security-Professional practice material's three formats are Desktop practice test software, web-based practice exam, and PDF.

Trend Deep-Security-Professional certification exam is designed to validate the skills and knowledge of IT professionals in implementing and managing Trend Micro's Deep Security solution. Trend Micro Certified Professional for Deep Security certification is ideal for professionals who specialize in cybersecurity and want to enhance their expertise in cloud security and virtualization. By passing Deep-Security-Professional exam, individuals demonstrate their proficiency in deploying and maintaining Trend Micro's Deep Security solution, which provides protection for physical, virtual, and cloud environments.

Trend Deep-Security-Professional Exam is a certification test designed to assess an individual's knowledge and expertise in deep security techniques. Deep-Security-Professional exam is created and managed by the industry-leading cybersecurity solutions company, Trend Micro. Trend Micro Certified Professional for Deep Security certification is designed to validate the technical expertise of security professionals who are focused on managing workload security within on-premise, virtual and cloud environments.

Trend Micro Certified Professional for Deep Security Sample Questions (Q20-Q25):

NEW QUESTION # 20

In the policy displayed in the exhibit, the state of the Web Reputation Protection Module is set to "Inherited (On)", while the state for the other Protection Module is set to "On". Why is the Web Reputation Protection Module displayed differently than the other Protection Modules.

- A. In this example, the state for the Web Reputation Protection Module is inherited from the parent policy, while the other Protection Modules were turned on at the computer level.
- B. In this example, the state for the Web Reputation Protection Module is listed as "In-herited (On)" as it was inherited from the default setting in the Base Policy.
- C. The state for a Protection Module is always displayed as "Inherited (On)" until the module components are installed on the Deep Security Agent.
- **D. In this example, the state for the Web Reputation Protection Module is inherited from the parent policy, while the other Protection Modules were turned on specifically in this child policy.**

Answer: D

NEW QUESTION # 21

What is the purpose of the override.properties file?

- A. This file is used to transfer policy settings from one installation of Deep Security Manager to another
- B. This file contains the original out-of-the-box configuration properties for Deep Security Manager. This file is renamed to dsm.properties upon initialization of Deep Security Manager.
- C. This file allows Deep Security Agents to override enforced behavior by providing new policy configuration details.
- **D. This file allows properties to be tested on Deep Security Manager without affecting the original configuration.**

Answer: D

Explanation:

The properties specified in this configuration file override the properties specified in the dsm.properties file. This file can be created manually by a support engineer to modify product behavior without affecting the original configuration.

Explication: Study Guide - page (42)

NEW QUESTION # 22

Your VMware environment is configured without using NSX. How can Deep Security provide protection to the virtual images hosted on your ESXi servers?

- A. You can install a Deep Security Virtual Appliance on the ESXi server. This will provide agentless support for Anti-Malware, Intrusion Prevention, Integrity Monitoring, Firewall and Web Reputation.
- B. Without NSX, you will be unable to use Deep Security to protect your virtual machines.
- **C. Without NSX, a Deep Security Agent must be installed on each virtual machine hosted on the ESXi server.**
- D. Without NSX, you can only enable Anti-Malware and Integrity Monitoring protection on the virtual machines. NSX is required to support Intrusion Prevention, Firewall and Web Reputation

Answer: C

Explanation:

Customers protecting VMware environments without NSX can use a Deep Security Agent on each of their virtual machines. By using the Deep Security Agent, the VMware environment can be protected using all the Deep Security Protection Module.

protect-vmware-environments

Explication: Study Guide - page (432)

NEW QUESTION # 23

Based on the policy configuration displayed in the exhibit, which of the following statements is true?

- A. Changes to any of the Deep Security policies will be sent to the Deep Security Agents as soon as the changes are saved.
- **B. Administrators with access to the protected Server will be able to uninstall the Deep Security Agent through Windows Control Panel.**

- C. If the Deep Security Manager does not receive a message from the Deep Security agent every 20 minutes, an alert will be raised.
- D. Deep Security Agents will send event information to Deep Security Manager every 10 minutes.

Answer: B

NEW QUESTION # 24

Which of the following VMware components is not required to enable agentless protection using Deep Security.

- A. VMware NSX
- B. VMware vCenter
- C. VMware ESXi
- **D. VMware vRealize**

Answer: D

Explanation:

For agentless protection (such as with VMware NSX integration), vCenter, ESXi, and NSX are required, as they provide the virtualization platform, centralized management, and security services integration, respectively. VMware vRealize is a cloud automation and management suite and is not required for Deep Security's agentless protection.

From the official documentation:

"Agentless protection requires VMware NSX, ESXi hypervisors, and vCenter Server. VMware vRealize is not required for Deep Security agentless deployment." Option C is correct.

Options A, B, D are required components for agentless integration.
