SAP Certified Associate - Implementation Consultant - SAP S/4HANA Cloud Public Edition, Sourcing and Procurement Sample Questions (Q20-Q25):

NEW QUESTION # 20

Which scope item covers the requisitioning of raw materials and goods for production?

- A. Procurement of Direct Materials (J45)
- B. Requisitioning (18J)
- C. Quality Management in Procurement (1FM)
- D. Consumable Purchasing (BNX)

Answer: A

Explanation:

The scope item "Procurement of Direct Materials (J45)" specifically covers the requisitioning of raw materials and goods for production. Here's why this is the correct answer:

* Procurement of Direct Materials (J45): This scope item focuses on the procurement of materials that are directly used in the production process. It includes functionalities such as creating purchase requisitions, managing material requirements planning (MRP), and ensuring timely availability of raw materials for production.

* Requisitioning (18J): The Requisitioning scope item is more generic and covers the creation of purchase requisitions for various purposes, including indirect materials and services. It does not specifically focus on direct materials for production.

* Consumable Purchasing (BNX): This scope item is tailored for purchasing consumable materials, such as office supplies or maintenance materials, which are not directly tied to production processes.

* Quality Management in Procurement (1FM): This scope item deals with quality inspections and assurance in procurement processes but does not address the requisitioning of raw materials for production.

NEW QUESTION # 21

Which of the following are sources of supply for a purchasing document? Note: There are 2 correct answers to this question.

- A. Contract
- B. Request for quotation
- C. Purchase info record
- D. Purchase requisition

Answer: A,C

NEW QUESTION # 22

Which document can you use as a reference while posting supplier invoices for lean services? Note: There are 2 correct answers to this question.

- A. Service Type Based Pricing Condition
- B. Service Product Master Data
- C. Service Entry Sheet
- D. Service Purchase Order

Answer: C,D

Explanation:

When posting supplier invoices for lean services, you can use the following documents as references:

* Service Purchase Order (Option A): A service purchase order specifies the services to be procured, including quantities, prices, and terms. It serves as the primary reference document for lean services procurement. The SAP Lean Services Guide confirms that

service purchase orders are used for invoice posting.

* Service Entry Sheet (Option B):A service entry sheet records the confirmation of services rendered by the supplier. It is often required to validate the services before posting the supplier invoice. The same SAP Lean Services Guidedocuments the role of service entry sheets in the invoicing process.

* C. Service Type Based Pricing Condition:Pricing conditions are part of the pricing determination process and are not used as direct reference documents for posting supplier invoices.

* D. Service Product Master Data:Service product master data defines the characteristics of services but is not used as a reference document for invoice posting.

* SAP Lean Services Guide:Explains the use of service purchase orders and service entry sheets in lean services procurement and invoicing.<https://help.sap.com>

* SAP Invoice Management Guide:Provides details on the documents required for posting supplier invoices.

Why the Other Options Are Incorrect:Key References:

NEW QUESTION # 23

Which of the following are purchasing info record categories?Note: There are 2 correct answers to this question.

- A. External
- B. Service
- C. Standard
- D. Pipeline

Answer: B,C

Explanation:

InSAP S/4HANA Cloud Public Edition, purchasing info records can have different categories based on the type of procurement being managed. Below are the two correct answers:

* Standard (Option A):The "Standard" category is used for regular procurement of materials or services.

It stores information such as prices, terms, and conditions agreed upon with vendors. TheSAP Purchasing Info Record Guideconfirms that "Standard" is a valid category.

* Service (Option C):The "Service" category is used for procurement of services rather than physical materials. It includes details such as service descriptions, pricing, and terms. The sameSAP Purchasing Info Record Guidelists "Service" as a valid category.

* B. Pipeline:"Pipeline" refers to a procurement process where materials are delivered directly from the vendor to the production line without intermediate storage. However, it is not a category for purchasing info records.

* D. External:"External" is not a recognized category for purchasing info records in SAP S/4HANA Cloud Public Edition.

* SAP Purchasing Info Record Guide:Describes the categories of purchasing info records and their usage in procurement processes.<https://help.sap.com>

* SAP S/4HANA Cloud Procurement Guide:Provides details on managing purchasing info records and their categories.

Why the Other Options Are Incorrect:Key References:

NEW QUESTION # 24

In which application can you see the available business context capacity remaining for extension items?

- A. Extensibility Explorer app
- B. Custom Reusable Elements app
- C. Extensibility Inventory app
- D. Extensibility Cockpit app

Answer: D

Explanation:

TheExtensibility Cockpit app is used to view the available business context capacity remaining for extension items inSAP S/4HANA Cloud Public Edition. This app provides insights into the extensibility limits and helps administrators manage customizations effectively.

* Extensibility Cockpit app (Option A):The Extensibility Cockpit app displays the remaining capacity for custom extensions, such as custom fields, custom logic, and UI adaptations. It ensures that organizations stay within the predefined extensibility limits. TheSAP Extensibility Guideconfirms this functionality.

* B. Extensibility Inventory app:The Extensibility Inventory app provides an overview of existing extensions but does not show the remaining capacity.

* C. Custom Reusable Elements app:This app is used for managing reusable custom elements, not for tracking extensibility capacity.

* D. Extensibility Explorer app: The Extensibility Explorer app helps identify extensibility options for specific business contexts but does not display capacity limits.

* SAP Extensibility Guide: Explains the role of the Extensibility Cockpit app in managing extensibility capacity. <https://help.sap.com>

* SAP S/4HANA Cloud Extensibility Documentation: Provides details on extensibility tools and their functionalities.

Why Option A is Correct: Why the Other Options Are Incorrect: Key References:
