## Archer-Expert 시험응시 & Archer-Expert 퍼펙트 덤프 공부문제

Archer Archer-Expert 덤프 결제에 관하여 불안정하게 생각되신다면 paypal에 대해 알아보시면 믿음이 생길 것입니다. 더욱 안전한 지불을 위해 저희 사이트의 모든 덤프는 paypal을 통해 지불을 완성하게 되어 있습니다. Paypal을 거쳐서 지불하면 저희측에서 Archer Archer-Expert 덤프를 보내드리지 않을 시 paypal에 환불신청하실 수 있습니다.

## 최신 Archer Certification Archer-Expert 무료 샘플문제 (Q14-Q19):

### 질문 # 14

When importing data through the Data Import Wizard, if you choose the Import Type as "Update Existing Records", which of the following is true?

- A. Matching records will be updated and unmatched records will be added as new records.
- **B. Matching records will be updated and unmatched records will be discarded.**
- C. A number of the matching records will be updated.
- D. Matching records will be discarded and unmatched records will be added as new records.

정답: B

### 질문 # 15

When Sarah gets to work, she logs into her Windows computer using her username and password. As part of her daily routine, she needs to view some reports inside Archer. How does Sarah access Archer reports without typing her login details again?

- A. By manually entering her credentials
- B. With biometric authentication
- **C. Through Windows Integrated SSO**

- D. By using a password manager

**정답: C**

**설명:**

The scenario described is a classic implementation of Windows Integrated Authentication (WIA), a form of Single Sign-On (SSO). As detailed in the Archer Installation and Troubleshooting guides, when Archer is configured for Windows Integrated SSO, it leverages the Kerberos or NTLM protocol. Since Sarah has already authenticated to the Windows Domain at the start of her shift, her browser passes her "security token" directly to the Archer web server (IIS).

The Archer Control Panel (ACP) must be configured to recognize the domain, and the user's Archer account must have their Windows account name (e.g., DOMAIN\Username) populated in the "Domain Account" field. This creates a seamless "handshake" that bypasses the Archer login screen entirely. Unlike a password manager (Option C), which still technically "types" the details, or biometrics (Option B), which requires a new physical scan, Windows Integrated SSO provides a passive experience where the existing OS-level authentication is trusted by the application, drastically improving user workflow and productivity.

**질문 # 16**

The HR department needs to update their business hierarchy. The most updated instance of the business hierarchy is stored in Archer. They have no direct access to Archer. As an administrator, you are asked to extract this data and load it into an external database. Which feature allows you to do so?

- **A. Data Publication**
- B. Data Import
- C. Data Feed
- D. Data Gateway

**정답: A**

**설명:**

While the Data Feed Manager (Option C) is primarily used to bring data into Archer, the Data Publication Service (DPS) is the specific tool designed to push data out of Archer into an external SQL Server database.

As taught in the Data Integration module of Administration II, Data Publication allows an administrator to define a "Publication Task" that maps Archer applications and levels to external database tables.

This is the ideal solution for Sarah's HR request because the HR department can then point their own reporting tools or databases to that external "target" database without ever needing an Archer login. Data Gateway (Option B) is a legacy term or refers to specific API connectors, and Data Import (Option D) is strictly for ingestion. Data Publication ensures that the most recent "Golden Record" of the business hierarchy in Archer is synchronized to the external environment on a scheduled basis, maintaining data consistency across the enterprise.

**질문 # 17**

When executing an advanced search, some fields appear as available for selection, and some fields are automatically selected for you in the "Fields to Display" Pane. If you are looking for a field in the Available list, but do not see it, which of the following field configurations is likely to be in effect?

- **A. "Make This a Searchable Field" Option is disabled for this field.**
- B. "Make this the key field" option is selected for the field.
- C. "Display this field in global search results" option is enabled for the field.
- D. "Display advanced formatting options" option is enabled for the field.

**정답: A**

**설명:**

In Archer, not every field created in an application is automatically indexed for searching. Within the Field Properties (General Tab), there is a checkbox titled "Searchable." As taught in Archer Administration II, if this option is unchecked, the field will be invisible to the Advanced Search tool.

This is often done by administrators to improve system performance or to hide technical "helper" fields (like those used in calculations or DDEs) that have no business value for end-user reporting. If a field is missing from the "Available" list in the search builder, the administrator must go back to the Application Builder, edit the field's properties, and ensure the "Searchable" checkbox is enabled. Option B (Key Field) would actually make the field more prominent, and Options C and D do not control the visibility of fields within the Advanced Search interface.

### 질문 # 18

Which is NOT a valid question type in the Question Library?

- A. Date
- B. Values List
- C. Attachment
- D. User/Groups List

정답: C

설명:

While the standard Archer Application Builder supports a wide array of field types, the Questionnaire module uses a more specialized subset of fields within the Question Library. According to the Questionnaires and Assessment Maintenance curriculum, questions are designed to gather specific response data that can be scored.

Valid question types include Values List (for multiple choice), Date (for timestamped responses), Numeric (for quantitative data), and Text (for qualitative comments). The User/Groups List is also a valid question type, often used to identify stakeholders or owners during an assessment. However, an Attachment is not a standalone question type in the library. In Archer Questionnaires, attachments are typically handled as

"supporting evidence" linked to a specific question or the record as a whole, but you cannot define a question as an "Attachment type" in the same way you define a "Values List" question.

### 질문 # 19

.....

학원다니면서 많은 지식을 장악한후 Archer Archer-Expert시험보시는것도 좋지만 회사다니느라 야근하랴 시간이 부족한 분들은 Archer Archer-Expert덤프만 있으면 엄청난 학원수강료 필요없이 20~30시간의 독학만으로도 Archer Archer-Expert시험패스가 충분합니다. 또한 취업생분들은 우선 자격증으로 취업문을 두드리고 일하면서 실무를 익혀가는방법도 좋지 않을까 생각됩니다.

Archer-Expert시험응시 : <https://www.pass4test.net/Archer-Expert.html>

Pass4Test의 Archer Archer-Expert 덤프로 시험을 준비하면 Archer Archer-Expert시험패스를 예약한것과 같습니다, Archer Archer-Expert시험준비자료 MB2-706덤프의 각 버전은 어떤 시스템에 적용하나요, 고객님의 Pass4Test Archer Archer-Expert덤프와 서비스에 만족 할 수 있도록 저희는 계속 개발해 나갈 것입니다, Pass4Test의 Archer인증 Archer-Expert로 시험패스하다 더욱 넓고 좋은곳으로 고고싱 하세요, Archer Archer-Expert시험준비자료 다른 자료판매사이트도 많겠지만 저희는 저희 자료에 자신이 있습니다, 이렇게 어려운 시험은 우리Archer인증 Archer-Expert덤프로 여러분의 고민과 꿈을 한방에 해결해드립니다.

그래서 이제는 정말 무서워요, 준호를 본 로버트도 감탄한 어조로 말했다, Pass4Test의 Archer Archer-Expert 덤프로 시험을 준비하면 Archer Archer-Expert시험패스를 예약한것과 같습니다, MB2-706덤프의 각 버전은 어떤 시스템에 적용하나요?
