This test is designed for Hitachi Vantara employees and partners who install Hitachi Virtual Storage Platform (VSP) 5000 series systems. The test will validate that the successful candidate has knowledge and skills in installing, configuring and supporting VSP 5000 series systems at customer sites. This includes strong knowledge of the systems' hardware and associated program products, thorough understanding of installation and configuration procedures, and associated support activities. This test covers Hitachi Virtual Storage Platform models VSP 5100(H), VSP 5500(H), VSP 5200(H) and VSP 5600(H).

**Audience:** Hitachi Vantara Employee and Partner Installation Professionals

Hitachi VSP 5000 series installation professionals should have strong knowledge and skills in installing and supporting storage systems deployed as part of VSP 5000 series solutions implementation. They perform pre-installation checks and install, configure and test the systems so they can be handed over in an operational state to customers. They also provide post-installation services, including support, maintenance, updates and upgrades, and have knowledge of problem-determination and incident-resolution procedures, tools and techniques.

| Test Objectives   |   |
|---|---|
| <b>Section 1 System Architecture</b>                      |   |
| 1.1   | Describe the different VSP 5000 models and their specifications.  |
| 1.2   | Describe the VSP 5000 systems architecture, their components and their functions.                         |
| 1.3   | Describe the front-end design and layout of VSP 5000 systems and the supported Channel Boards (CHBs).     |
| 1.4   | Describe the back-end design and layout of VSP 5000 systems and the supported Disk Adapters (DKAs).       |
| <b>Section 2 System Pre-installation and Installation</b> |   |
| 2.1   | Describe the VSP 5000 storage systems pre-installation procedures and documentation.                      |
| 2.2   | Describe the VSP 5000 disk controllers (DKCs) interconnections.   |
| 2.3   | Describe the "New Installation" procedure for VSP 5000 storage systems and when it is appropriate to use. |
| 2.4   | Describe the VSP 5000 storage systems network settings.   |
| 2.5   | Describe the VSP 5000 storage microcode upgrade procedures.   |
| <b>Section 3 System Configuration</b>                     |   |
| 3.1   | Describe the key steps involved in the installation of VSP 5000 storage systems.                          |
| 3.2   | Describe how to create Parity Groups on VSP 5000 storage systems.   |

\* Depending on the location and course delivery format, this closed-book, proctored qualification test may also be offered and administered by the instructor at the conclusion of the supporting course.

Our HQT-4160 study guide boosts both the high passing rate which is about 98%-100% and the high hit rate to have few difficulties to pass the test. Our HQT-4160 exam simulation is compiled based on the resources from the authorized experts' diligent working and the Real HQT-4160 Exam and confer to the past years' exam papers thus they are very practical. The content of the questions and answers of HQT-4160 exam quiz is refined and focuses on the most important information.

Hitachi HQT-4160 exam is a great way for IT professionals to demonstrate their expertise in the installation of Hitachi Vantara VSP 5000 series storage systems. It is an excellent opportunity for individuals to showcase their skills and knowledge to potential employers and to advance their careers in the field of data storage and management.

Hitachi HQT-4160 certification exam is designed to test the skills and knowledge of IT professionals who are responsible for the installation of Hitachi Vantara's VSP 5000 Series storage systems. Hitachi Vantara Qualified Professional - VSP 5000 Series Installation certification validates the expertise of professionals who can install, configure, and maintain complex storage solutions in a variety of environments. HQT-4160 Exam covers a wide range of topics, including hardware installation, firmware upgrades, network configuration, and system troubleshooting. Candidates who pass the Hitachi HQT-4160 exam demonstrate a deep understanding of the VSP 5000 Series storage systems and are well-equipped to handle complex storage deployments.

## Hitachi HQT-4160 Exam Questions [2026]-Achieve Highest Scores

Do you want to pass your exam with the least time? Our HQT-4160 learning materials are high-quality, and you just need to spend 48 to 72 hours on learning, you can pass the exam successfully. What's more, free demo for HQT-4160 exam dumps is available, and you can have a try before buying, so that you can have a deeper understanding of what you are going to buy. If you fail to pass the exam by using HQT-4160 Exam Braindumps, we will give you full refund, and no other questions will be asked. We have online and offline chat service, and if you any questions for HQT-4160 training materials, you can have a conversation with us.

The HQT-4160 Exam consists of 60 multiple-choice questions, with a time limit of 90 minutes. The test covers a range of topics, including Hitachi's storage architecture, storage management, and installation and configuration of Hitachi VSP 5000 series. The test questions are designed to be challenging, requiring a broad understanding of storage technologies and problem-solving skills.

## Hitachi Vantara Qualified Professional - VSP 5000 Series Installation Sample Questions (Q55-Q60):

### NEW QUESTION # 55

What are essential steps in the VSP 5000 parts-replacement process? (Choose Two)

- A. Testing the new parts
- B. Configuring network settings
- C. Documenting the process
- D. Verifying part numbers

**Answer: A,D**

Explanation:

When performing a parts replacement on the Hitachi VSP 5000 storage system, certain steps are critical to ensure safety, compatibility, and system integrity:

Verifying part numbers (A)

Ensures the replacement part is compatible with the system.

Prevents accidental installation of incorrect components, which could cause failures or downtime.

Testing the new parts (C)

After installation, verify that the component functions correctly.

May involve self-tests or diagnostic checks provided by the system.

Confirms that the system operates as expected before returning to normal service.

### NEW QUESTION # 56

What is the first step in troubleshooting incidents on VSP 5000 storage systems?

- A. Contacting customer support
- B. Checking the log files
- C. Upgrading the firmware
- D. Rebooting the system

**Answer: B**

Explanation:

In the Hitachi VSP 5000 storage system, log files are the first source of information when troubleshooting any incident.

Reasons to start with log files:

Identify error messages related to hardware, connectivity, or software issues.

Determine the exact time and nature of failures.

Assist in diagnosing problems without disrupting operations.

Provide detailed information for support escalation if needed.

### NEW QUESTION # 57

You need to create Parity Groups on a VSP 5100. Which three actions must you perform? (Choose three.)

- A. Use the Maintenance Utility to choose the drive allocation method (Manual or Automatic).
- B. Use Storage Navigator to create the Parity Groups.
- C. Use the Maintenance Utility to add the drives that you want to allocate to these Parity Groups.
- D. Use the Web Console to select the appropriate drive type.
- E. Mount the drives in the appropriate slots of the Disk Unit (DKU).

**Answer: A,B,E**

Explanation:

Use Storage Navigator to create the Parity Groups.

Parity Groups are created and managed through the Storage Navigator interface.

Use the Maintenance Utility to choose the drive allocation method (Manual or Automatic).

The Maintenance Utility allows you to specify how drives will be allocated to Parity Groups, either manually or automatically.

Mount the drives in the appropriate slots of the Disk Unit (DKU).

Drives must be physically installed in the correct DKU slots before they can be assigned to Parity Groups.

### NEW QUESTION # 58

How does the management software improve the operation of VSP 5000 systems?

- A. By simplifying user access controls
- B. By reducing physical maintenance needs
- C. By increasing the energy consumption
- D. By automating routine tasks

**Answer: D**

Explanation:

The Hitachi VSP 5000 management software provides a centralized interface to monitor, configure, and manage the storage system.

One of its key benefits is automation of routine operational tasks, such as:

Creating and provisioning storage volumes

Assigning storage to hosts

Monitoring system health and generating alerts

Performing replication or backup scheduling

Rebuilding or rebalancing RAID groups automatically

Automation reduces manual intervention, minimizes errors, and improves operational efficiency.

### NEW QUESTION # 59

Which management tool is used to create a Parity Group in a VSP 5000 system?

- A. Hitachi Command suite
- B. Storage Navigator 2
- C. Web Console
- D. Maintenance Utility

**Answer: B**

Explanation:

Storage Navigator 2 is the primary management tool used for configuring and managing storage on VSP 5000 systems, including the creation of Parity Groups.
