We not only do a good job before you buy our SDS test guides, we also do a good job of after-sales service. Because we are committed to customers who decide to choose our SDS study tool. We put the care of our customers in an important position. We provide you with global after-sales service. If you have any questions that need to be consulted, you can contact our staff at any time to help you solve problems related to our SDS qualification test. Our thoughtful service is also part of your choice of buying our learning materials. Once you choose to purchase our SDS test guides, you will enjoy service.

In order to meet the demand of all customers and protect your machines network security, our company can promise that our SDS test training guide have adopted technological and other necessary measures to ensure the security of personal information they collect, and prevent information leaks, damage or loss. In addition, the SDS exam dumps system from our company can help all customers ward off network intrusion and attacks prevent information leakage, protect user machines network security. If you choose our SDS study questions as your study tool, we can promise that we will try our best to enhance the safety guarantees and keep your information from revealing, and your privacy will be protected well. You can rest assured to buy the SDS exam dumps from our company.

Our SDS exam questions are supposed to help you pass the exam smoothly. Don't worry about channels to the best SDS study materials so many exam candidates admire our generosity of offering help for them. Up to now, no one has ever challenged our leading position of this area. The existence of our SDS learning guide is regarded as in favor of your efficiency of passing the exam.

DASCA Senior Data Scientist Sample Questions (Q53-Q58):

NEW QUESTION # 53

Which of the following is NOT an example of the applications of neural networks?

- A. None of the above
- B. Character recognition
- C. Image compression
- D. Traveling salesman's problem
- E. Stock market prediction

Answer: D

Explanation:

Neural networks have been widely applied in various domains:

Option A (Character recognition): Correct application - neural networks are highly effective for OCR (Optical Character Recognition).

Option B (Stock market prediction): Correct application - neural networks are used to model time-series and nonlinear patterns in finance.

Option D (Image compression): Correct application - neural nets (autoencoders) are used for dimensionality reduction and compression.

Option C (Traveling salesman's problem): NOT a typical neural network application. This is a combinatorial optimization problem usually solved with heuristics, dynamic programming, or optimization algorithms (not standard neural networks).

Thus, the correct answer is Option C (Traveling salesman's problem).

NEW QUESTION # 54

What is Scrum?

- A. Scrum and Agile are the same
- B. None of the above
- C. Agile is a subset of Scrum
- **D. Scrum is a subset of Agile**

Answer: D

Explanation:

Scrum is a framework used to implement Agile principles. Agile itself is the overarching philosophy or mindset, while Scrum is one of the most popular frameworks that apply Agile values in practice.

Option A (Correct): Scrum is indeed a subset of Agile. Agile defines the principles (from the Agile Manifesto), and Scrum provides the structure (roles, artifacts, ceremonies).

Option B: Incorrect. Agile is broader and not a subset of Scrum.

Option C: Incorrect. Scrum and Agile are not the same; Agile is the philosophy, Scrum is a methodology under Agile.

Option D: Incorrect because Option A is valid.

Thus, the correct answer is Option A: Scrum is a subset of Agile.

NEW QUESTION # 55

The Big Data Vision Workshop process is ideal for organizations who:

- A. Have a wealth of data that they do not know how to monetize
- B. Have a desire to leverage the Big Data Vision Workshop to identify where and how to leverage data and analytics to power their business models
- C. Have a desire to leverage Big Data to transform their business but do not know where and how to start
- D. Both A and B
- **E. All of the above**

Answer: E

Explanation:

The Big Data Vision Workshop is an early-phase framework designed to help organizations shape their data-driven transformation journey. It is particularly beneficial when:

Option A: Organizations want to leverage big data but lack clarity on where to start.

Option B: Organizations already have large volumes of data but struggle to derive monetization strategies from it.

Option C: Organizations want to identify use cases where data and analytics can enhance or even redefine their business models.

Since all three statements apply, the correct answer is Option E (All of the above).

NEW QUESTION # 56

Which of the following is correct?

i. LaTeX is used to publish work in a scientific journal

ii. LaTeX is a markup language that can be compiled into formatted documents iii. LaTeX is for publishing scientific papers

- A. i, ii
- B. i, iii
- C. ii, iii
- D. i, ii, iii

Answer: D

Explanation:

LaTeX is a high-quality typesetting system widely used in academia, particularly in scientific publishing.

Statement i: Correct. LaTeX is widely used to prepare manuscripts for scientific journals, theses, and technical reports.

Statement ii: Correct. LaTeX is a markup language (similar to HTML in concept) that compiles into formatted PDFs/documents.

Statement iii: Correct. LaTeX is a standard for publishing scientific papers due to its ability to handle complex mathematical equations, references, and formatting.

Thus, all three statements are true # Option B (i, ii, iii).

NEW QUESTION # 57

Which of the following is a Python library for fitting Bayesian networks to real data?

- A. MyLib
- B. PyMC
- C. SCIMC
- D. MCMC
- E. SciLib

Answer: B

Explanation:

The correct answer is PyMC (Option B).

PyMC is an open-source Python library widely used for Bayesian statistical modeling and probabilistic machine learning. It provides a robust framework for defining and fitting Bayesian networks to real data using Markov Chain Monte Carlo (MCMC) sampling techniques, as well as variational inference methods.

This makes it a powerful tool for data scientists who want to work with uncertainty modeling, probabilistic inference, and causal reasoning in complex datasets.

Let's clarify the other options to avoid confusion:

* Option A: SciLib- There is no standard Python library by this name that is related to Bayesian networks. (It may be confused with SciPy or SciKit-Learn, but those are not specialized for Bayesian inference.)

* Option C: MyLib- This is not a recognized Python package in the data science ecosystem.

* Option D: MCMC- While Markov Chain Monte Carlo is the technique used in Bayesian estimation, it is not a standalone library. Instead, PyMC implements MCMC as part of its computational framework.

* Option E: SCIMC- No such Python library exists; it appears to be a distractor.

PyMC's primary strength is its ability to let data scientists define models in a probabilistic programming style, making it easier to represent uncertainties and hidden variables in data. This aligns with DASCA's emphasis on ensuring data scientists understand both statistical foundations and the tools required to implement them programmatically.

In practice, PyMC is often used in applications such as:

- * Forecasting (e.g., time series with uncertainty bounds)
- * Causal inference (estimating hidden relationships in data)
- * Risk modeling (finance, healthcare, or supply chain domains)
- * Machine learning with uncertainty quantification

Thus, PyMC is the correct library for fitting Bayesian networks in Python.
