NSE6_FSR-7.3 Reliable Test Pdf | NSE6_FSR-7.3 Practice Test Online
We know that time is very precious to everyone, especially the test takers to study our NSE6_FSR-7.3 exam questions. Saving time means increasing the likelihood of passing the NSE6_FSR-7.3 exam. In order not to delay your review time, our NSE6_FSR-7.3 Actual Exam can be downloaded instantly. Within about 5 - 10 minutes of your payment, you will receive our login link available for immediate use of our NSE6_FSR-7.3 study materials.

Fortinet NSE6_FSR-7.3 Exam Syllabus Topics:

Topic	Details
Topic 1	• Security Management: This section covers how Security Engineers implement role-based access control (RBAC) and set up team structures within FortiSOAR to streamline security management.
Topic 2	• System Configuration: FortiSOAR requires careful setup of applications for FortiSoar System Administrators. It covers system fixtures, and proxy settings to function optimally.
Topic 3	• SOC and SOAR Overview: Security Engineers can gain an understanding of SOC and SOAR deployment requirements, including licensing management for FortiSOAR.

Topic 4	• System Operation: For System Engineers, this section covers Elasticsearch data management that may need to be externalized or migrated to accommodate system needs. Additionally, this section covers configuring the recommendation engine and utilizing the war room functionality.
Topic 5	• System Monitoring and Maintenance: For FortiSOAR Administrators, this domain covers using various tools for system monitoring to ensure consistent performance. This includes how to regularly oversee FortiSOAR processes, along with other critical functions.

Fortinet NSE6_FSR-7.3 Practice Test Online | NSE6_FSR-7.3 Valid Exam Notes

Iif you still spend a lot of time studying and waiting for NSE6_FSR-7.3 qualification examination, then you need our NSE6_FSR-7.3 test prep, which can help solve all of the above problems. I can guarantee that our study materials will be your best choice. Our NSE6_FSR-7.3 valid practice questions have three different versions, including the PDF version, the software version and the online version, to meet the different needs, our NSE6_FSR-7.3 Study Materials have many advantages, and you can free download the demo of our NSE6_FSR-7.3 exam questios to have a check.

Fortinet NSE 6 - FortiSOAR 7.3 Administrator Sample Questions (Q42-Q47):

NEW QUESTION # 42
What are two features of the FortiSOAR perpetual trial license? (Choose two.).

- A. It is a multi-tenant type license.
- B. It has restrictions on the number of actions that can be performed.
- C. It provides access to FortiSOAR for a limited amount of time per day.
- D. It has restrictions on the number of users.

Answer: B,D

Explanation:
The FortiSOAR perpetual trial license includes limitations on both the number of users and the number of actions that can be performed. These restrictions are in place to provide prospective users with a functional evaluation of FortiSOAR while limiting its usage in a production environment. The trial license does not support multi-tenancy and restricts the overall capacity for scaling, making it suitable only for testing and familiarization with FortiSOAR's capabilities.

NEW QUESTION # 43
Which two statements about upgrading a FortiSOAR HA cluster are true7 (Choose two.)

- A. Upgrading a FortiSOAR HA cluster requires no downtime.
- B. It is recommended that the passive secondary node be upgraded first, and then the active primary node.
- C. Nodes can be upgraded while the primary node or secondary node are in the HA cluster.
- D. The upgrade procedure for an active-active cluster and an active-passive cluster are the same.

Answer: B,D

Explanation:
Upgrading a FortiSOAR HA cluster follows the same procedure regardless of whether it is configured in an active-active or active-passive setup. The process generally involves upgrading one node at a time to minimize service disruption. Best practices recommend upgrading the passive secondary node first before moving to the active primary node. This sequence helps maintain cluster stability and ensures that at least one node remains operational during the upgrade.

NEW QUESTION # 44

What are two use cases for configuring a FortiSOAR HA cluster?
(Choose two.)

- A. Disaster recovery
- B. Multi-tenancy
- C. Data externalization
- D. Scaling

Answer: A,D

NEW QUESTION # 45

Which two system monitoring reports are available on the System Monitoring widget?
(Choose two.)

- A. Playbook Health Status
- B. Service Status
- C. CPU Usage
- D. RAM Usage

Answer: B,C

NEW QUESTION # 46

When configuring an HA cluster with an externalized PostgreSQL database, which two tiles on the database server need to be configured to trust all FortiSOAR nodes' incoming connections? (Choose two.)

- A. postgreaq1.conf
- B. db_config.yml
- C. pg_hba.conf
- D. db_external_config.yml.

Answer: A,C

Explanation:
In a FortiSOAR High Availability (HA) cluster setup with an externalized PostgreSQL database, it is necessary to configure the database server to allow incoming connections from all FortiSOAR nodes. This configuration involves modifying the pg_hba.conf file to set up host-based authentication and control which IP addresses can connect. The postgresql.conf file must also be adjusted to enable listening on all necessary IP addresses, which is critical for FortiSOAR nodes to connect to the database server securely and reliably.
Together, these configurations ensure that all FortiSOAR nodes can access the database, facilitating effective HA functionality.
