The applicants who used it previously to prepare for the CCFA-200b certification exam have rated our CCFA-200b Dumps as one of the best. Our customers receive CrowdStrike Falcon Administrator (CCFA-200b) questions updates for up to 365 days after their purchase.

CrowdStrike Falcon Administrator Sample Questions (Q70-Q75):

NEW QUESTION # 70

Under which scenario can Sensor Tags be assigned?

- A. While triaging a detection
- B. While managing hosts in the Falcon console
- C. While updating a sensor in the Falcon console
- D. While installing a sensor

Answer: D

Explanation:

Check in documentation, there are two kind of tags, the Falcon Grouping Tags that can be managed in falcon console or API and the Sensor Grouping Tags that are configured as parameter in cli, that kind of tags can be differentiated because it appears with the prefix SensorGroupingTags followed with the name of the tag. If you want to modify a sensor tag is necessary change a registry key value and reboot the device or waiting until the sensor is upgraded.

NEW QUESTION # 71

What is the primary purpose of using glob syntax in an exclusion?

- A. To specify exclusion patterns to easily add files and folders and extensions to be prevented
- B. To specify a Domain be excluded from detections
- C. To specify exclusion patterns to easily exclude files and folders and extensions from detections
- D. To specify a network share be excluded from detections

Answer: C

Explanation:

Glob syntax is used to specify exclusion patterns to easily exclude files and folders and extensions from detections. Glob syntax allows you to use wildcards (*) and ranges ([a-z]) to match multiple characters or values in a file path or name. For example, you can use glob syntax to exclude all files with .exe extension in a folder by using C:\Folder*.exe as an exclusion pattern2.

NEW QUESTION # 72

Why is it important to know your company's event data retention limits in the Falcon platform?

- A. Your query will require you to specify the data pool associated with the date you wish to search
- B. Data such as process records are kept for a shorter time than event data
- C. This is not necessary; you simply select "All Time" in your query to search all data
- D. You will not be able to search event data into the past beyond your retention period

Answer: D

Explanation:

It is important to know your company's event data retention limits in the Falcon platform because you will not be able to search event data into the past beyond your retention period. The retention period is the amount of time that event data is stored in the Falcon Cloud, and it may vary depending on your subscription plan and settings. The other options are either incorrect or not related to knowing your retention limits.

NEW QUESTION # 73

Which role is required to manage groups and policies in Falcon?

- A. Falcon Host Analyst
- B. Falcon Host Administrator
- C. Falcon Host Security Lead
- D. Prevention Hashes Manager

Answer: B

Explanation:

The Falcon Host Administrator role is required to manage groups and policies in Falcon. This role allows users to create, edit and delete groups and policies, as well as assign them to hosts. The other roles do not have this capability. Reference: [CrowdStrike Falcon User Guide], page 17.

NEW QUESTION # 74

Which of the following is NOT a way to determine the sensor version installed on a specific endpoint?

- A. Use the Sensor Report to filter to the specific endpoint
- B. Use Host Management to select the desired endpoint. The agent version will be listed in the columns and details
- C. From a command line, run the `sc query csagent -version` command
- D. Use the Investigate > Host Search to filter to the specific endpoint

Answer: C

Explanation:

From a command line, running the `sc query csagent -version` command is not a way to determine the sensor version installed on a specific endpoint. This command will only show the status of the csagent service, not the sensor version. The other options are valid ways to determine the sensor version installed on a specific endpoint using Falcon UI or API. You can use the Sensor Report, the Host Search, or the Host Management features to filter, search, or select the desired endpoint and view the sensor version information.

NEW QUESTION # 75

.....

All questions on our CCFA-200b exam questions are strictly in accordance with the knowledge points on newest test syllabus.
