

# Simplified Document Sharing and Accessibility With Microsoft GH-900 PDF (Dumps)

P.S. Free & New GH-900 dumps are available on Google Drive shared by RealValidExam: [https://drive.google.com/open?id=1JOZUMK44YAd\\_pnKK7DrdjgJkkwzeTVFt](https://drive.google.com/open?id=1JOZUMK44YAd_pnKK7DrdjgJkkwzeTVFt)

Our GH-900 practice materials have picked out all knowledge points for you, which helps you get rid of many problems. In addition, time is money in modern society. It is important to achieve all things efficiently. So our GH-900 study guide just needs less time input, which can suit all people's demands. In the meantime, all knowledge points of our GH-900 Preparation questions have been adapted and compiled carefully to ensure that you absolutely can understand it quickly.

## Microsoft GH-900 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>• Modern Development: This domain assesses abilities of DevOps Engineers and Continuous Integration Specialists in implementing modern development practices. It emphasizes understanding DevOps principles and leveraging GitHub Actions for automation and CI</li><li>• CD pipeline implementation. Candidates also learn GitHub's tools and best practices for conducting and managing code reviews.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>• Collaboration Features: This section measures skills of Software Engineers and Team Leads and covers collaborative workflows using GitHub. It includes forking repositories, creating and managing pull requests, reviewing and merging code changes, and using GitHub Actions to support CI</li><li>• CD pipelines. Candidates also explore project management features such as creating and managing issues, using labels, milestones, and project boards, and tracking progress through GitHub Projects.</li></ul>
Topic 3	<ul style="list-style-type: none"><li>• Project Management: This section is designed for Project Coordinators and Product Managers and focuses on using GitHub Projects for project management. Candidates learn to create and manage GitHub Projects, utilize project boards for organizing tasks, and integrate project workflows with issues and pull requests to maintain project visibility and progress.</li></ul>
Topic 4	<ul style="list-style-type: none"><li>• Benefits of the GitHub Community: This section targets Community Managers and Open Source Contributors, focusing on engaging with the GitHub community. Candidates learn to participate in open source projects, utilize GitHub Discussions for collaboration and support, and contribute meaningfully to community-driven projects.</li></ul>

## Quiz First-grade Microsoft GH-900 - GitHub Foundations Reliable Exam Answers

RealValidExam offers a free demo of the GH-900 exam dumps for customers to try out before purchasing. This allows individuals to examine the GH-900 exam prep material and make decisions. Customers will receive free updates to the GH-900 exam questions for three months if any changes are made to the GitHub Foundations (GH-900) exam content after the purchase of the GH-900 Practice Questions. RealValidExam has helped thousands of individuals worldwide in obtaining their GH-900 certification through their real GH-900 pdf dumps and practice tests. Passing the GitHub Foundations (GH-900) exam on the first attempt can save individuals both time and money.

### Microsoft GitHub Foundations Sample Questions (Q63-Q68):

#### NEW QUESTION # 63

Which of the following GitHub syntax formats is consistent with the associated text?

- A. 1. This is an ordered list
- B. \* This is a heading
- C. This is a link
- D. <!-- This is a comment -->
- E. This is bolded text

**Answer: D**

Explanation:

GitHub supports various syntax formats that align with Markdown and HTML conventions. Here's a breakdown of the provided options:

Comment Syntax:

Option C is correct. The syntax <!-- This is a comment --> is used in Markdown files to insert comments. These comments will not be rendered in the final output, making them useful for adding notes or instructions within the code or documentation.

Incorrect Options:

Option A (\* This is a heading) is incorrect because an asterisk (\*) denotes an unordered list item, not a heading. A heading in Markdown is typically created with one or more hash symbols (#).

Option B (This is a link) is incorrect because this is plain text and not the syntax for creating a link. The correct syntax would be [This is a link](URL).

Option D (This is bolded text) is incorrect because this is plain text, not the correct Markdown syntax for bold text, which should be **\*\*This is bolded text\*\*** or **\_\_This is bolded text\_\_**.

Option E (1. This is an ordered list) is incorrect as it does represent an ordered list item, but it was not the syntax format asked about in the question. The question specifically focuses on matching associated text with syntax, where only the comment option is correct.

#### NEW QUESTION # 64

What folder is the definition files stored in when creating custom issue forms?

- A. .issues
- B. .issues/ISSUE\_TEMPLATE
- C. .GitHub
- D. .github/ISSUE\_TEMPLATE

**Answer: D**

Explanation:

When creating custom issue forms on GitHub, the definition files are stored in the .github/ISSUE\_TEMPLATE folder. This directory is used to define issue templates and forms that help standardize the information collected when users open new issues in the repository.

The .github folder is a special directory used for various repository configurations and workflows.

### NEW QUESTION # 65

Workflows can reference actions in:

(Each correct answer presents a complete solution. Choose three.)

- A. An enterprise marketplace.
- B. A published Docker container image on Docker Hub.
- C. The same repository as your workflow file.
- D. Any public repository.
- E. GitHub Packages.

**Answer: B,C,D**

Explanation:

As mentioned in the answer to Question no. 66, GitHub Actions workflows can reference actions from a variety of sources:

Any Public Repository:

Option A is correct. Actions can be sourced from any public GitHub repository.

The Same Repository as Your Workflow File:

Option B is correct. Actions within the same repository as the workflow file can be referenced directly.

A Published Docker Container Image on Docker Hub:

Option E is correct. Workflows can also use actions provided as Docker container images from Docker Hub.

Incorrect Options:

Option C and D are not relevant for directly referencing actions in workflows.

GitHub Docs: Reusing Workflows

### NEW QUESTION # 66

What qualifier finds issues that mention a certain user?

- A. @mentioned:
- B. mentions:
- C. threads:
- D. mentioned:

**Answer: B**

Explanation:

The qualifier mentions: is used in GitHub's search functionality to find issues that mention a certain user. For example, if you want to find all issues where a specific user is mentioned, you would use mentions:username. This helps in tracking where a user has been involved in discussions across issues or pull requests.

### NEW QUESTION # 67

Which of the following describes a branch in Git?

- A. A new repository that shares code with the original "upstream" repository
- B. A physical copy of the entire project stored on disk
- C. A pointer to an identical snapshot of the project at a specific point in time
- D. A separate, isolated copy of the project's codebase

**Answer: D**

Explanation:

In Git, a branch is a fundamental concept that represents an independent line of development within a project.

Here's a more detailed explanation:

\* Branch in Git:

\* Option C is correct because a branch in Git is essentially a separate, isolated copy of the project's codebase where you can make changes without affecting the main codebase. Branches allow developers to work on features, fixes, or experiments in parallel to the main project.

\* Other Options:

\* Option A is incorrect because while a branch does point to a specific commit (which represents a snapshot of the project), the

description lacks the emphasis on the isolated and parallel development aspect that is critical to the understanding of branches.

\* Option B is incorrect because a branch is not a physical copy stored on disk; it is a logical reference within the repository.

\* Option D is incorrect because that description better fits the concept of a fork, not a branch. A fork is a new repository that is a copy of another repository, usually used to contribute back to the original ( " upstream " ) repository.
