SAP C-WME-2506 Exam Sample Questions - New C-WME-2506 Exam Fee

Once you have practiced on our SAP Certified Associate - WalkMe Digital Adoption Consultant test questions, the system will automatically memorize and analyze all your practice. You must finish the model test in limited time. There have a timer on the right of the interface. Once you begin to do the exercises of the C-WME-2506 test guide, the timer will start to work and count down. If you don't finish doing the exercises, all your exercises of the C-WME-2506 Exam Questions will be delivered automatically. Then the system will generate a report according to your performance. You will clearly know where you are good at or not.

SAP C-WME-2506 Exam Syllabus Topics:

Topic	Details
Topic 1	• Getting Started with Building WalkMe Solutions: This section of the exam evaluates the capabilities of WalkMe implementers and focuses on the practical aspects of creating and configuring WalkMe solutions. It includes understanding the WalkMe Editor, planning solution flows, creating Smart Walk-Thrus, Launchers, and ShoutOuts, and managing end-user guidance effectively. Candidates should be comfortable building initial WalkMe experiences that improve SAP usability and provide contextual help for users navigating SAP applications.
Topic 2	• Starting your Digital Adoption Journey: WalkMe Fundamentals: This section of the exam measures the skills of SAP project managers and covers the foundational concepts of digital adoption within SAP environments using WalkMe. Candidates are expected to understand the value of digital adoption platforms, the basic components of WalkMe, and how these tools align with business goals. The section emphasizes knowledge of the user experience within SAP and the ability to identify opportunities for improving digital workflows through in-app guidance and automation.
Topic 3	• Advancing your Skills in Building WalkMe Solutions: This section of the exam tests the advanced competencies of functional and business analysts in designing more complex and customized WalkMe solutions within SAP platforms. It requires a deeper understanding of user segmentation, advanced rules and triggers, performance optimization, and the use of analytics to refine user experiences. Candidates are expected to demonstrate their ability to design scalable and impactful guidance that aligns with SAP business processes and drives user adoption across the enterprise.

SAP Certified Associate - WalkMe Digital Adoption Consultant Sample Questions (Q26-Q31):

NEW QUESTION # 26
Your product team released a new feature last month and would like to get end user feedback within Insights.
Which of the options below is the best approach?

- A. Use a 3rd party survey tool and send it to your users in an automated email campaign.
- B. Use a Shuttle linking to a Google Form with detailed questions.
- C. Add a ShoutOut on the feature page that activates a WalkMe Survey with multiple questions.
- D. Create a Survey and place it in the WalkMe Menu.

Answer: C

Explanation:
To collect end user feedback within WalkMe Insights, the most effective approach is to use WalkMe's native Survey tool, as it integrates directly with Insights for seamless data collection and analysis. Placing a ShoutOut on the feature page that activates a WalkMe Survey with multiple questions ensures high visibility and context-specific engagement, as users are prompted to provide feedback while interacting with the new feature. This method leverages WalkMe's analytics to track responses and correlate them with user behavior, providing actionable insights.
The other options are less optimal:
* A Survey in the WalkMe Menu(A) is less targeted, as users may not proactively access it.
* A Shuttle to a Google Form(B) lacks integration with Insights, making data analysis cumbersome.
* A 3rd party survey tool via email(D) is disconnected from the feature context and WalkMe's analytics.
Extract from Official WalkMe Documentation:
According to the WalkMe Insights User Guide (SAP WalkMe Digital Adoption Consultant StudyGuide, Section 3.5: Surveys):
"WalkMe Surveys, when triggered by a ShoutOut on a relevant page, are ideal for collecting contextual feedback. Responses are tracked in Insights, enabling analysis of user sentiment and feature adoption." The courseAdvancing Your Skills in Building WalkMe Solutionsexplains:
"For feature-specific feedback, use a ShoutOut to launch a WalkMe Survey on the feature page. This ensures users provide input in context, with data seamlessly captured in Insights for analysis." Option C is the best approach for collecting feedback within Insights.
References:
SAP WalkMe Digital Adoption Consultant Study Guide, Section 3.5: Surveys.
WalkMe Insights User Guide, "Creating and Analyzing Surveys" Section.

NEW QUESTION # 27
The Dynamic Layout of a ShoutOut in the Editor consists of which three layers? Note: There are 3 correct answers to this question.

- A. Z-index
- B. Frame
- C. Canvas
- D. Widget
- E. Player

Answer: B,C,D

Explanation:
The Dynamic Layout of a WalkMe ShoutOut in the Editor is composed of three layers: theFrame,Canvas, andWidget.
TheFramedefines the outer structure and positioning of the ShoutOut (e.g., size and placement on the screen). TheCanvasis the content area where text, images, or buttons are placed. TheWidgetincludes interactive elements, such as the call to action button or close button, that users can interact with. These layers work together to create a customizable and visually appealing ShoutOut.
The other options are incorrect:
* Z-index(C) is a CSS property that controls stacking order, not a layer of the ShoutOut's layout.
* Player(E) refers to the WalkMe Player, which delivers content but is not part of the ShoutOut's internal structure.
Extract from Official WalkMe Documentation:
According to the WalkMe Editor User Guide (SAP WalkMe Digital Adoption Consultant Study Guide, Section 2.9: ShoutOuts):
"The Dynamic Layout of a ShoutOut consists of three layers: the Frame, which sets the structural boundaries; the Canvas, which holds the content; and the Widget, which includes interactive components like buttons." The courseAdvancing Your Skills in Building WalkMe Solutionselaborates:
"When designing ShoutOuts, understand the Dynamic Layout's three layers-Frame, Canvas, and Widget- to effectively customize appearance and functionality for user engagement." Options A, B, and D are the correct layers of a ShoutOut's Dynamic Layout.
References:
SAP WalkMe Digital Adoption Consultant Study Guide, Section 2.9: ShoutOuts.
WalkMe Editor User Guide, "ShoutOut Dynamic Layout" Section.
Course:Advancing Your Skills in Building WalkMe Solutions, Module 12: Designing Effective ShoutOuts.

NEW QUESTION # 28
Which of the options below is a use case for when to use jQuery?
Note: There are 3 correct answers to this question.

- A. To target a very specific element on your website.
- B. To redesign the entire layout of the WalkMe balloons.
- C. To close the WalkMe menu and start an Onboarding task.
- D. If the WalkMe element selector algorithm is not consistently identifying your element.
- E. To grab a dynamic value from an on screen element and incorporate it into a ShoutOut for a personalized experience.

Answer: A,D,E

NEW QUESTION # 29
How would you write a jQuery selector for the following HTML element: <div class="button" id="blueBtn"
>Click Here</div>?

- A. div#button
- B. div.blueBtn
- C. #blueBtn
- D. div#blueBtn

Answer: D

Explanation:
In jQuery, selectors are used to target HTML elements based on their tag, class, ID, or other attributes. The HTML element <div

class="button" id="blueBtn">Click Here</div> has both an ID (blueBtn) and a class (button). The most specific and efficient selector is one that uses the ID, as IDs are unique within a webpage.

The syntax div#blueBtn targets a <div> element with the ID blueBtn, ensuring precision while also specifying the element type for clarity, which is a best practice in WalkMe for robust selector reliability.

The other options are incorrect or less optimal:

* Option A(div#button) incorrectly uses the class name as an ID.

* Option B(#blueBtn) is valid but less specific, as it doesn't confirm the element is a <div>.

* Option D(div.blueBtn) targets the class, which is less specific than the ID and could match multiple elements.

Extract from Official WalkMe Documentation:

Per the WalkMe Editor User Guide (SAP WalkMe Digital Adoption Consultant Study Guide, Section 2.7: jQuery Selectors):

"When writing jQuery selectors for WalkMe, prioritize specificity and reliability. For elements with unique IDs, use the format tag#id (e.g., div#blueBtn) to ensure accurate targeting while clarifying the element type." The courseAdvancing Your Skills in Building WalkMe Solutionsstates:

"For an HTML element like <div id="blueBtn" class="button">, the selector div#blueBtn is preferred in WalkMe, as it combines the unique ID with the tag name for maximum reliability." Option C, div#blueBtn, is the correct jQuery selector.

References:

SAP WalkMe Digital Adoption Consultant Study Guide, Section 2.7: jQuery Selectors.

Course:Advancing Your Skills in Building WalkMe Solutions, Module 10: Advanced Selector Techniques.

NEW QUESTION # 30

You have been given a project where end users are inputting incorrect information on a form, and the company wants to add some WalkMe content to help people complete the form correctly to improve data integrity. Which of the following solutions would you suggest FIRST?

- A. Onboarding Task to encourage users to complete the form
- B. Add a Resource to the Menu that provides additional details
- C. Create Guidance or Validation SmartTips
- D. Create a Smart Walk-Thru to guide users through the process

Answer: C

Explanation:

To address incorrect form inputs and improve data integrity,Guidance or Validation SmartTipsare the most direct and effective solution to suggest first. Guidance SmartTips provide on-screen instructions for each field, while Validation SmartTips check user inputs against predefined rules (e.g., format, required fields) and display error messages if incorrect. This approach targets the root issue-user errors in specific fields-and provides real-time feedback to ensure accurate data entry.

The other options are less immediate:

* Onboarding Task(B) is better for guiding users through a multi-step process, not form-specific errors.

* Smart Walk-Thru(C) is useful for complex processes but may be overkill for a single form.

* Resource in the Menu(D) requires users to seek help proactively, which is less effective than in- context guidance.

Extract from Official WalkMe Documentation:

According to the WalkMe Editor User Guide (SAP WalkMe Digital Adoption Consultant Study Guide, Section 2.5: SmartTips):

"For forms with frequent user errors, Guidance SmartTips offer field-specific instructions, and Validation SmartTips enforce correct inputs, improving data integrity directly at the point of entry." The courseGetting Started with Building WalkMe Solutionsadvises:

"Start with SmartTips for form-related issues, using Guidance to clarify field requirements and Validation to catch errors, as they provide targeted, real-time support." Option A, Guidance or Validation SmartTips, is the first solution to suggest.

References:

SAP WalkMe Digital Adoption Consultant Study Guide, Section 2.5: SmartTips.

WalkMe Editor User Guide, "SmartTips for Forms" Section.

Course:Getting Started with Building WalkMe Solutions, Module 7: Addressing Form Errors.

NEW QUESTION # 31

......

Holding a SAP Certified Associate - WalkMe Digital Adoption Consultant C-WME-2506 Certification in a certain field definitely shows that one have a good command of the C-WME-2506 knowledge and professional skills in the related field. However, it is

universally accepted that the majority of the candidates for the SAP Certified Associate - WalkMe Digital Adoption Consultant exam are those who do not have enough spare time and are not able to study in the most efficient way.
