DumpsKing is continuing to provide the candidates with Citrix certification exam-related reference materials for years. DumpsKing is

the website that is validated by all the 1Y0-204 test-takers, which can provide all candidates with the best questions and answers. DumpsKing comprehensively ensures the interests of all candidates, which enjoys immense praise of the candidates. Moreover DumpsKing is the most trusted website on the current market.

Citrix 1Y0-204 is an exam that tests the knowledge and skills of candidates in administering Citrix Virtual Apps and Desktops 7. 1Y0-204 exam is designed for IT professionals who want to validate their expertise in managing and maintaining Citrix Virtual Apps and Desktops environments. 1Y0-204 exam measures the ability of the candidates to install, configure, manage, monitor, and troubleshoot Citrix Virtual Apps and Desktops 7.

Citrix 1Y0-204 Certification is an excellent choice for IT professionals who are interested in virtualization and want to demonstrate their expertise in managing and deploying Citrix Virtual Apps and Desktops 7. It is a valuable credential that can help individuals advance their careers and open up new opportunities in the IT industry.

Citrix Virtual Apps and Desktops 7 Administration Sample Questions (Q26-Q31):

NEW QUESTION # 26

Scenario: A Citrix Administrator previously configured a Citrix Virtual Desktops Site to use evaluation licenses.

The administrator then installed valid advanced licenses on the Citrix License Server and confirmed that licenses show correctly in the licensing console. However, a user reports an issue about logging on to the published desktop. The user receives an error message stating that the evaluation license is about to expire.

What should the administrator do to fix this issue?

- A. Restart the License service.
- B. Remove the evaluation license.
- C. Verify the host name entry in the license file.
- **D. Change the product edition in Citrix Studio.**

Answer: D

NEW QUESTION # 27

Which tool can a Citrix Administrator utilize to verify that a policy is bound and showing the number of hits?

- **A. nsconnmsg**
- B. nstrace.sh
- C. nstepdump.sh
- D. nscollect

Answer: A

Explanation:

The nsconnmsg tool can be used to display the policy bound hits on a Citrix ADC appliance. This tool can show the number of times a policy was evaluated and the number of times it was hit. The nsconnmsg tool can also display other statistics and information about the Citrix ADC configuration and performance¹

1: Citrix ADC Command Reference

NEW QUESTION # 28

What is the minimum built-in delegated administration role required to create an Application Group?

- A. Machine Catalog Administrator
- B. Host Administrator
- **C. Delivery Group Administrator**
- D. Help Desk Administrator

Answer: C

Explanation:

The minimum built-in delegated administration role required to create an Application Group is the Delivery Group Administrator. This role has the necessary permissions to manage application groups within a delivery group¹.

NEW QUESTION # 29

Enlightened Data Transport (EDT) has been disabled in a new Citrix Virtual Apps and Desktops site. A Citrix Administrator deploys a NetScaler Gateway behind the corporate firewall to allow remote users to access internal Citrix resources. Which port and protocol must be opened in the firewall to allow external access?

- A. SSL 443
- B. HTTP 80
- C. TCP 1494
- D. TCP 2598

Answer: A

Explanation:

When EDT is disabled, ICA fallback communication occurs over TCP rather than UDP.

Remote users connecting through NetScaler Gateway reach internal Citrix resources using ICA over SSL.

Citrix documentation specifies that NetScaler Gateway communicates with clients using:

* TLS/SSL over port 443, regardless of whether EDT is enabled or not.

This port must be opened on the perimeter firewall to allow:

* Secure ICA proxy traffic

* Authentication traffic

* Connection establishment

* STA ticket validation via Gateway

Why the other options are incorrect:

* 1494 - Raw ICA (not used externally when Gateway is in front).

* 2598 - Session Reliability port; also not used by external clients connecting via Gateway.

* 80 - Unencrypted HTTP (never appropriate for secure remote access).

NetScaler Gateway always requires SSL 443 for secure ICA proxy connections.

Documentation References

* Citrix Gateway Deployment Guide # Ports and Protocols

* ICA/HDX Network Port Requirements

* Citrix Virtual Apps and Desktops # EDT and Fallback Behavior

NEW QUESTION # 30

A Citrix Administrator needs to match the host name 'www.example.com' in all HTTP requests.

Which expression, when used, meets this requirement?

- A. HTTP.REQ.HOSTNAME.EQ('www.example.com')
- B. HTTP.RES.HOSTNAME.EQ('www.example.com')
- C. HTTP.RES.HOSTNAME.CONTAINS('www.example.com')
- D. HTTP.REQ.HOSTNAME('example.com')

Answer: A

Explanation:

This expression matches the host name 'www.example.com' in all HTTP requests by using the EQ operator, which performs a case-sensitive string comparison. The other options are incorrect because they either use the wrong message type (HTTP.RES instead of HTTP.REQ), the wrong method (HOSTNAME instead of HOSTNAME.EQ), or the wrong operator (CONTAINS instead of EQ).

NEW QUESTION # 31
