Free Plat-Dev-301 pdf torrent & Salesforce Plat-Dev-301 exam answers & Plat-Dev-301 vce dumps

With the pass rate reaching 98.75%, our Plat-Dev-301 test materials have gained popularity in the international market. Many candidates have recommended our products to their friends. In addition, Plat-Dev-301 exam materials are edited by skilled professionals, and they possess the professional knowledge for the exam, therefore you can use the exam materials at ease. Free demo for Plat-Dev-301 Exam Dumps are available, and you can have a try before buying, so that you can have a better understanding of what you are going to buy.

Salesforce Certified Platform Developer II - Multiple Choice Sample Questions (Q82-Q87):

NEW QUESTION # 82

Universal Containers is using a custom Salesforce application to manage customer support cases. The support team needs to collaborate with external partners to resolve certain cases. However, they want to control the visibility and access to the cases shared with the external partners. Which Salesforce feature can help achieve this requirement?

- A. Role hierarchy
- B. Criteria-based sharing rules
- C. Sharing sets
- **D. Apex managed sharing**

Answer: D

Explanation:

Apex managed sharing is the correct feature to control the visibility and access to cases shared with external partners. It allows developers to programmatically create sharing records that grant access to users based on specific criteria, providing granular control over record sharing.

NEW QUESTION # 83

Universal Containers develops a Salesforce application that requires frequent interaction with an external REST API. To avoid duplicating code and improve maintainability, how should they implement the API integration for code reuse?

- A. Use a separate Apex class for each API endpoint to encapsulate the integration logic,
- **B. Create a reusable Apex class for the API integration and invoke it from the relevant Apex classes.**
- C. Include the API integration code directly in each Apex class that requires it.
- D. Store the API integration code as a static resource and reference it in each Apex class.

Answer: B

Explanation:

Creating a reusable Apex class for API integration allows for code encapsulation and maintainability. This class can then be invoked from any other Apex class that requires interaction with the API, preventing code duplication.

NEW QUESTION # 84

Which scenario requires a developer to use an Apex callout instead of Outbound Messaging?

- A. The target system uses a SOAP API.
- B. The callout needs to be invoked from a flow.
- C. The callout needs to be asynchronous.
- **D. The target system uses a REST API.**

Answer: D

Explanation:

Outbound Messaging in Salesforce provides a way to send notifications from Salesforce to external applications using SOAP-based web service calls. However, when the target system requires interactions with RESTful web services, a developer must use an Apex callout. This is because Outbound Messaging is limited to SOAP and cannot directly interact with REST APIs. Apex callouts provide the flexibility to make HTTP requests to REST endpoints, thus allowing developers to programmatically interact with virtually any web service provided by external systems.

Apex Web Services and Callouts

Outbound Messaging

NEW QUESTION # 85

A Visualforce page loads slowly due to the large amount of data it displays. Which strategy can a developer use to improve the performance?

- A. Use the transient keyword for the List variables used in the custom controller.
- B. Use an <apex:actionPoller> in the page to load all of the data asynchronously.

- C. Use lazy loading to load the data on demand, instead of in the controller's constructor.
- D. Use Javascript to move data processing to the browser instead of the controller.

Answer: C

Explanation:

Lazy loading is a strategy to improve the performance of a Visualforce page that loads a large amount of data. By loading the data on demand, rather than in the controller's constructor, the initial page load is faster, and additional data is only loaded when necessary.

NEW QUESTION # 86

A company uses Salesforce to sell products to customers. They also have an external product information management (PIM) system that is the system of record for products.

A developer received these requirements:

* Whenever a product is created or updated in the PIM, a product must be created or updated as a Product? record in Salesforce and a PricebookEntry record must be created or updated automatically by Salesforce.

= The PricebookEntry should be created in a Pricebook2 that is specified in a custom setting.

What should the developer use to satisfy these requirements?

- A. Invocable Action
- B. Event Monitoring
- C. Custom Apex REST
- D. SOBJECT Tree REST

Answer: C

Explanation:

Custom Apex REST services are the optimal solution for integrating Salesforce with an external PIM system. When a product is created or updated in the PIM, the external system can make a REST call to a custom Apex REST endpoint in Salesforce, which then can create or update the Product2 and PricebookEntry records. This method allows using custom settings to determine the Pricebook2 dynamically.

NEW QUESTION # 87

.....

Real4exams Salesforce Plat-Dev-301 Dumps are the certification training material that guarantees 100% sail through the test at the first attempt. The accuracy rate of Real4exams test answers and test questions is very high, so you only need to use the training material that guarantees you will pass the exam at the first time. If you don't believe it, try our free demo. If you don't pass the exam, Real4exams will give you a FULL REFUND. So you have nothing to lose. Having used it, you can find it is high quality dumps. Hurry to have a try. We provide you with free demo and you can visit [Real4exams.com](https://www.real4exams.com) to download those questions.

Valid Plat-Dev-301 Dumps Demo: https://www.real4exams.com/Plat-Dev-301_braindumps.html

Real4exams presents Salesforce Plat-Dev-301 Exam Dumps, a product that is best to help you to clear your Salesforce Certified Platform Developer II - Multiple Choice Exam, Among these important sectors, customer service is also a crucial link to boost the sales of the Plat-Dev-301 test braindumps: Salesforce Certified Platform Developer II - Multiple Choice, After your payment, we will send the updated Valid Plat-Dev-301 Dumps Demo - Salesforce Certified Platform Developer II - Multiple Choice exam study material to you immediately, Besides, you will be allowed to free update the Plat-Dev-301 dumps latest one-year after you buy.
