Three formats of Netskope NSK300 practice exams meet the diverse needs

We apply international recognition third party for payment for NSK300 exam materials, therefore, if you choose us, your money safety will be guaranteed. The third party will guarantee your interests. Besides, NSK300 exam materials of us is high-quality, they will help you pass the exam successfully. We also pass guarantee and money back guarantee if you fail to pass the exam. NSK300 Exam Braindumps offer you free update for one year, and in the following year, you can know the latest information for the exam. The latest version for NSK300 will be sent to your email automatically.

Netskope NSK300 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Netskope Platform Management: This section of the exam measures the skills of Security Administrators and covers essential administrative tasks required to manage the Netskope Security Cloud Platform. It includes managing DLP functions, handling identity integrations, and monitoring Netskope components to maintain platform stability. The domain ensures professionals can manage daily operations and maintain strong access, data, and security controls.

Topic 2	<ul style="list-style-type: none"> • Netskope Platform Monitoring: This section of the exam measures the capabilities of Security Operations Center (SOC) Analysts and focuses on monitoring the platform through reporting and analytics tools. It highlights how Netskope insights support visibility into user activity, cloud app behavior, and policy effectiveness to help organizations maintain a continuous cloud security posture.
Topic 3	<ul style="list-style-type: none"> • Netskope Platform Implementation: This section of the exam measures the abilities of Cloud Security Engineers and focuses on implementing the Netskope Security Cloud Platform using recommended steering architectures and deployment approaches. It includes key concepts such as API-enabled protection and real-time protection features, ensuring candidates understand how to deploy Netskope to secure cloud usage effectively within enterprise networks.
Topic 4	<ul style="list-style-type: none"> • Cloud Security Solutions: This section of the exam measures the skills of Cloud Security Analysts and covers the core components and functions of the Netskope Security Cloud Platform. It includes understanding how the platform integrates with enterprise environments, the deployment methods supported by Netskope, and the role of various microservices in delivering cloud-based security. The focus is on ensuring candidates can recognize how Netskope's architecture protects users, applications, and data across cloud services.
Topic 5	<ul style="list-style-type: none"> • Netskope Platform Troubleshooting: This section of the exam measures the skills of Support Engineers and focuses on identifying and resolving common issues within the Netskope platform. It includes troubleshooting client connectivity problems, analyzing steering methods, resolving general connectivity concerns, and addressing SAML integration issues. The section ensures candidates can diagnose and fix issues that impact platform performance and user access.

Netskope Certified Cloud Security Architect Sample Questions (Q20-Q25):

NEW QUESTION # 20

What are three valid Instance Types for supported SaaS applications when using Netskope's API-enabled Protection? (Choose three.)

- A. API Data Protection
- B. Quarantine
- C. DLP Scan
- D. Forensic
- E. Behavior Analytics

Answer: A,B,C

Explanation:

When using Netskope's API-enabled Protection for supported SaaS applications, the valid instance types are:

API Data Protection (B): This type is used to connect to cloud apps using APIs to find sensitive content, enforce policy controls, and quarantine malware1.

DLP Scan (D): This instance type involves scanning for data loss prevention, which is a key component of Netskope's API Data Protection1.

Quarantine (E): This instance type allows for the isolation of potentially harmful or sensitive data until it can be reviewed or remediated1.

Behavior Analytics and Forensic (A) are not listed as instance types for API-enabled Protection in the provided resources.

NEW QUESTION # 21

You do not want a scheduled Advanced Analytics dashboard to be automatically updated when Netskope makes improvements to that dashboard. In this scenario, what would you do to retain the original dashboard?

- A. Ask Netskope Support to provide the dashboard and import into your Personal folder.
- B. Download the dashboard you want and Import from File into your Group or Personal folder.
- C. Copy the dashboard into your Group or Personal folders and schedule from these folders.
- D. Create a new dashboard from scratch that mimics the Netskope dashboard you want to use.

Answer: C

NEW QUESTION # 22

You have deployed Netskope to all users of the organization and you are now ready to begin ingesting all events, alerts, and Web transactions into your SIEM as a part of your requirements.

What are three ways in which you would accomplish this task? (Choose three.)

- A. Use the Netskope Publisher to a stream syslog to your SIEM.
- **B. Use custom API calls to ingest to a data lake and then into your SIEM.**
- **C. Use Cloud Log Shipper to an IaaS storage repository and then into your SIEM.**
- **D. Use syslog directly to Splunk.**

Answer: B,C,D

NEW QUESTION # 23

Given the following:

```
user eq 'user@company.com' and access_method eq 'Client' and activity eq 'Download' or activity eq 'Upload' and site eq 'Amazon S3'
```

Which result does this Skope IT query provide?

- A. The query returns all events of an IP address downloading or uploading to or from Amazon S3 using the Netskope Client.
- **B. The query returns all events of user@company.com downloading or uploading to or from the site 'Amazon S3' using the Netskope Client.**
- C. The query returns all events of everyone except user@company.com downloading or uploading to or from the site "Amazon S3" using the Netskope Client.
- D. The query returns all events of user@company.com downloading or uploading to or from the application "Amazon S3" using the Netskope Client.

Answer: B

Explanation:

The given Skope IT query specifies the following conditions:

User equals 'user@company.com'

Access method equals 'Client'

Activity equals 'Download' or 'Upload'

Site equals 'Amazon S3'

The query combines these conditions using logical operators (AND and OR).

The result of this query will include all events where the specified user ('user@company.com') is either downloading or uploading data to or from the site 'Amazon S3' using the Netskope Client.

It does not include events related to other users or IP addresses. Reference:

NEW QUESTION # 24

You configured a pair of IPsec tunnels from the enterprise edge firewall to a Netskope data plane. These tunnels have been implemented to steer traffic for a set of defined HTTPS SaaS applications accessed from end-user devices that do not support the Netskope Client installation. You discover that all applications steered through this tunnel are non-functional.

According to Netskope, how would you solve this problem?

- A. Downgrade from IKE v2 to IKE v1.
- **B. Install the Netskope root and intermediate certificates on the end-user devices.**
- C. Disable Perfect Forward Secrecy on the tunnel configuration.
- D. Restart the tunnel to stop the tunnel from flapping.

Answer: B

Explanation:

When applications steered through an IPsec tunnel are non-functional, it is often due to the lack of proper trust establishment between the end-user devices and the Netskope data plane. The solution is to install the Netskope root and intermediate certificates

on the end-user devices . This ensures that the devices recognize and trust the encrypted connection established by the IPsec tunnel, allowing the HTTPS SaaS applications to function correctly. Without these certificates, the devices may not be able to verify the security of the connection, leading to application failures.

NEW QUESTION # 25

As the saying goes, to sensible men, every day is a day of reckoning. Time is very important to people. People often complain that they are wasting their time on study and work. They do not have time to look at the outside world. Now, NSK300 exam guide gives you this opportunity. NSK300 test prep helps you save time by improving your learning efficiency. They can provide remote online help whenever you need. And after-sales service staff will help you to solve all the questions arising after you purchase NSK300 learning question, any time you have any questions you can send an e-mail to consult them. All the help provided by NSK300 test prep is free. It is our happiest thing to solve the problem for you. Please feel free to contact us if you have any problems.
