There is a ton of Oracle Inventory Cloud 2025 Implementation Professional (1z0-1073-25) prep material available on the internet. But the main thing to notice is their validity and reliability. Many applicants remain unsuccessful in locating the right Oracle Inventory Cloud 2025 Implementation Professional (1z0-1073-25) practice test and lose their time and money.

Oracle 1z0-1073-25 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• Implementing Inventory Replenishment: This section tests the ability of Inventory Replenishment Planners to configure and execute automated replenishment strategies. Candidates should understand how to define PAR locations and apply Min-Max planning. It assesses hands-on knowledge in running replenishment plans that maintain inventory levels across different storage locations.
Topic 2	<ul style="list-style-type: none">• Enabling Redwood Capabilities: This section measures the ability of Oracle Technical Architects to enable and manage Redwood UI capabilities. It focuses on understanding how new Redwood features enhance user experiences and what implications they may have on existing system configurations.
Topic 3	<ul style="list-style-type: none">• Implementing Inventory Counts: This domain targets the skills of Warehouse Inventory Controllers and covers all aspects of cycle counting and physical inventory processes. It emphasizes the configuration of ABC classifications, troubleshooting inventory counting processes, and accurate execution of stock audits. Candidates must demonstrate their understanding of how to maintain inventory accuracy through routine and scheduled counts.

Topic 4	<ul style="list-style-type: none"> • Implementing Enterprise Structures: This section of the exam measures the knowledge of Oracle Cloud Inventory Consultants and covers the foundational concepts of enterprise structure setup. Candidates must understand the purpose and interaction of components like Item Organizations and Inventory Organizations. It also assesses the ability to configure Inventory Organizations and tailor enterprise structure settings to support business operations efficiently.
Topic 5	<ul style="list-style-type: none"> • Implementing Advanced Inventory Transactions: This part of the exam assesses the skills of Supply Chain Analysts in handling complex inventory flows. It explores advanced scenarios like consignment processes, supply chain orchestration, and back-to-back orders. Candidates must also demonstrate configuration of barcode scanning, product recalls, and support for electronic signatures in compliance environments.

1z0-1073-25 Test Questions - Free 1z0-1073-25 Vce Dumps

In order to meet the needs of all customers, our company employed a lot of leading experts and professors in the field. These experts and professors have designed our 1z0-1073-25 exam questions with a high quality for our customers. We can promise that our products will be suitable for all people. As long as you buy our 1z0-1073-25 practice materials and take it seriously consideration, we can promise that you will pass your exam and get your certification in a short time. So choose our 1z0-1073-25 exam questions to help you review, you will benefit a lot from our 1z0-1073-25 study guide.

Oracle Inventory Cloud 2025 Implementation Professional Sample Questions (Q71-Q76):

NEW QUESTION # 71

Where do Oracle Supply Chain applications derive their legal entity information from?

- A. Division
- **B. Business Unit**
- C. Ledger

Answer: B

NEW QUESTION # 72

What happens when you accrue at receipt in receipt accounting?

- A. Less accounting and reconciliation take place.
- B. Less timely accounting takes place.
- **C. Accrual and expense are booked upon receipt. (*)**
- D. Expenses and payables are booked when a supplier invoice is processed.

Answer: C

NEW QUESTION # 73

Against a Purchase Order quantity of 100, your receiving agent has received 50 items in the receiving type subinventory. Later in the day, 25 items have been put away to inventory. What is the item availability in the Manage Item Quantity UI?

- A. On-Hand: 25, Receiving: 50, Inbound: 50
- **B. On-Hand: 25, Receiving: 25, Inbound: 50 (*)**
- C. On-Hand: 25, Receiving: 25, Inbound: 0
- D. On-Hand: 50, Receiving: 50, Inbound: 0

Answer: B

NEW QUESTION # 74

You are planning to create a new transaction type, Audit Movement, to track all inventory movements planned for periodical audit in your warehouse. Which statement is true about the Audit Movement transaction type?

- A. Material status control cannot be enabled.
- **B. User-defined transaction source can be included.**
- C. User-defined transaction actions can be included.

Answer: B

NEW QUESTION # 75

SIMULATION

Back to Back fulfillment

Overview of Back-to-Back Fulfillment

The back-to-back fulfillment process is one in which specific sales order demand triggers supply creation, and a link is established between the sales order and the supply.

Note: Back-to-back flow is currently supported only for discrete manufacturing.

The following figure provides a high-level flow diagram showing the back-to-back supply creation and fulfillment process flow.

Back-to-back fulfillment is where supply is procured and then received at a warehouse only after an order is placed.

The supply is reserved against a sales order until shipping.

This process provides support to create and link supply after a sales order is entered and scheduled, allowing you to reduce your inventory while maintaining the ability to respond to customer demands.

You create supply for a back-to-back order using one or more of the following back-to-back flows:

- * Buy: Procurement from an external supplier.
- * Make: Production in an internal manufacturing facility (includes in-house manufacturing and contract manufacturing).
- * Transfer: Transfer from another warehouse.
- * On hand: Reservation of on-hand supply in the fulfillment organization.

Note: For information about back-to-back flows for contract manufacturing, see the Implementing Contract Manufacturing chapter in this guide.

After the supply is received into the fulfillment warehouse, the back-to-back order is ready for shipment to the customer.

Answer:

Explanation:

Explanation:

Back-to-Back Fulfillment in Oracle Inventory Cloud

Back-to-back fulfillment in Oracle Inventory Cloud is a supply chain process where supply is created only after a sales order is placed. This process links the demand (customer sales order) directly to the supply (procurement, manufacturing, transfer, or existing stock), ensuring efficient inventory management while meeting customer demands. Below is a detailed step-by-step explanation of the back-to-back fulfillment process.

1. Overview of Back-to-Back Fulfillment Process

The back-to-back (B2B) fulfillment process ensures that supply is created only when a customer order is received.

Supply is specifically reserved for the sales order until shipping.

This process helps reduce excess inventory while maintaining responsiveness to customer needs.

It supports four fulfillment strategies: Buy, Make, Transfer, and On Hand Reservation.

Back-to-back fulfillment is mainly used in discrete manufacturing environments.

2. Step-by-Step Back-to-Back Fulfillment Process in Oracle Inventory Cloud

The back-to-back fulfillment process consists of the following key steps:

Step 1: Process Sales Order

The sales order is created in Oracle Order Management.

The order is validated for correctness (items, quantities, prices, etc.).

The order is scheduled, and the system checks if on-hand inventory is available.

If no inventory is available, Oracle Supply Chain Orchestration initiates a back-to-back fulfillment request.

Step 2: Determine Supply Sources

Oracle Supply Chain Orchestration (SCO) determines the best supply source based on predefined rules and sourcing strategies.

The system evaluates the following supply options:

Buy: Procurement from an external supplier.

Make: Internal manufacturing or contract manufacturing.

Transfer: Movement of inventory from another warehouse or distribution center.

On Hand: Direct reservation of existing inventory.

Step 3: Create and Manage the Supply Order

A supply order is generated in Oracle Supply Chain Orchestration.

The order is assigned to the appropriate fulfillment method:

Buy Order: A purchase requisition is created in Oracle Procurement Cloud, and the supplier provides the required goods.

Make Order: A work order is created in Oracle Manufacturing Cloud, and production begins.

Transfer Order: A transfer request is initiated in Oracle Inventory Management, moving stock from another warehouse.

On-Hand Reservation: If stock is available, it is reserved against the sales order.

Oracle monitors the progress of the supply order until completion.

Step 4: Receive and Consolidate Supply in Warehouse

Once supply is procured, manufactured, or transferred, it is received in the fulfillment warehouse.

If it is a purchased item, a receipt is created in Oracle Receiving.

If it is a manufactured item, the work order is completed, and inventory is updated.

The system ensures that the received inventory is linked to the original sales order.

Step 5: Ship to Customer

The sales order is released for fulfillment.

A Pick Release process is initiated in Oracle Inventory Cloud to allocate stock.

The order is picked, packed, and shipped using Oracle Shipping Execution.

A shipping confirmation is generated, and an invoice is created in Oracle Receivables.

The sales order is marked as complete, and the supply order is closed.

3. Detailed Explanation of Back-to-Back Fulfillment Flows

1. Buy Flow (Procurement)

If the supply is sourced externally, the system generates a purchase order in Oracle Procurement Cloud.

The supplier delivers the goods, which are received in Oracle Receiving.

The inventory is updated, and the order is prepared for shipment.

The sales order is fulfilled once the goods arrive.

2. Make Flow (Manufacturing)

If the item is manufactured internally, a work order is created in Oracle Manufacturing Cloud.

Production is executed, and the finished product is stored in inventory.

The system reserves the item against the sales order.

The order is fulfilled when the product is available.

3. Transfer Flow (Warehouse Transfer)

If the item is available in another warehouse, a transfer order is generated in Oracle Inventory Cloud.

The inventory is moved to the fulfillment warehouse.

Once received, the inventory is reserved and prepared for shipment.

The sales order is completed upon shipment.

4. On Hand Flow (Inventory Reservation)

If the item is available in stock, the system directly reserves it.

The order moves to the shipping phase without additional procurement or manufacturing steps.

The pick, pack, and ship process is executed, and the order is fulfilled.

4. Key Benefits of Back-to-Back Fulfillment in Oracle Inventory Cloud

✓ Reduced Inventory Holding Costs - Stock is only procured, manufactured, or transferred when needed.

✓ Improved Order Fulfillment Efficiency - Orders are linked directly to supply, reducing delays.

✓ Better Customer Satisfaction - Customers receive products faster with reduced stockouts.

✓ Automated Supply Chain Coordination - Oracle Cloud applications ensure seamless integration between order management, procurement, manufacturing, and inventory.

✓ Flexibility in Sourcing - Users can choose between procurement, manufacturing, transfer, or existing stock to fulfill demand efficiently.

5. Oracle Cloud Modules Involved in Back-to-Back Fulfillment

6. Example Use Case: Back-to-Back Fulfillment in Action

Scenario:

A customer places an order for 100 units of Item XYZ, but there is no stock available in the warehouse.

Solution:

The system checks stock availability and identifies that back-to-back fulfillment is required.

The sourcing rules determine that procurement from an external supplier is the best option.

A purchase requisition is created in Oracle Procurement Cloud.

The supplier delivers the items, and they are received into inventory.

The inventory is reserved against the sales order.

The shipping process is initiated, and the order is delivered to the customer.

The sales order and supply order are closed.

NEW QUESTION # 76

.....

If you want to give up your certificate exams as you fail 1z0-1073-25 exam or feel it too difficult, please think about its advantages after you obtain a Oracle certification. Many special positions require employees to have a qualification. If you think it is very difficult for you to pass exams, our 1z0-1073-25 Valid Exam Cram PDF can help you to achieve your goal. Our exam materials are collected from the real test center and edited by our experienced experts. If you need 100% passing rate, our 1z0-1073-25 valid exam cram PDF can help you.
