What does the "?" represent in the Ariba expression below?
HierarchicalType=="SubAgreement" ? false : true

- A. else

- B. then
- C. if
- D. replace

Answer: B

Explanation:
The"?" symbol in Ariba expressions functions as the equivalent of "then" in conditional logic. The expression is a shorthand form of a ternary operator common in programming:
* The condition HierarchicalType=="SubAgreement" is evaluated first.
* Iftrue, the expression returns the value immediately after the "?" - in this case,false.
* The ":" symbol separates the "then" and "else" parts, so if the condition is false, the expression returns the value after the colon - true.Hence, "?" corresponds to the "then" clause of the if-then-else logic, making option C the correct answer.This syntax allows concise inline conditionals within Ariba's expression language.
