

# Marvelous Microsoft Exam DP-700 Tutorials Are Leading Materials & Verified DP-700: Implementing Data Engineering Solutions Using Microsoft Fabric

P.S. Free 2026 Microsoft DP-700 dumps are available on Google Drive shared by VCEPrep: <https://drive.google.com/open?id=1Y9TZFr-oemiwwAlslCoD1iDjSX-Dqs-->

We believe that one of the most important things you care about is the quality of our DP-700 exam materials, but we can ensure that the quality of it won't let you down. Many candidates are interested in our DP-700 exam materials. What you can set your mind at rest is that the DP-700 exam materials are very high quality. DP-700 exam materials draw up team have a strong expert team to constantly provide you with an effective training resource. They continue to use their rich experience and knowledge to study the real exam questions of the past few years, to draw up such an exam materials for you. In other words, you can never worry about the quality of DP-700 Exam Materials, you will not be disappointed.

## Microsoft DP-700 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> <li>Implement and manage an analytics solution: This section of the exam measures the skills of Microsoft Data Analysts regarding configuring various workspace settings in Microsoft Fabric. It focuses on setting up Microsoft Fabric workspaces, including Spark and domain workspace configurations, as well as implementing lifecycle management and version control. One skill to be measured is creating deployment pipelines for analytics solutions.</li> </ul>
Topic 2	<ul style="list-style-type: none"> <li>Monitor and optimize an analytics solution: This section of the exam measures the skills of Data Analysts in monitoring various components of analytics solutions in Microsoft Fabric. It focuses on tracking data ingestion, transformation processes, and semantic model refreshes while configuring alerts for error resolution. One skill to be measured is identifying performance bottlenecks in analytics workflows.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>Ingest and transform data: This section of the exam measures the skills of Data Engineers that cover designing and implementing data loading patterns. It emphasizes preparing data for loading into dimensional models, handling batch and streaming data ingestion, and transforming data using various methods. A skill to be measured is applying appropriate transformation techniques to ensure data quality.</li> </ul>

## Free PDF Pass-Sure Microsoft - Exam DP-700 Tutorials

Without bothering to stick to any formality, our DP-700 learning quiz can be obtained within five minutes. No need to line up or queue up to get our DP-700 practice materials. They are not only efficient on downloading aspect, but can expedite your process of

review. No harangue is included within DP-700 Training Materials and every page is written by our proficient experts with dedication. Our website experts simplify complex concepts and add examples, simulations, and diagrams to explain anything that might be difficult to understand.

## Microsoft Implementing Data Engineering Solutions Using Microsoft Fabric Sample Questions (Q16-Q21):

### NEW QUESTION # 16

You have a Fabric capacity that contains a workspace named Workspace1. Workspace1 contains a lakehouse named Lakehouse1, a data pipeline, a notebook, and several Microsoft Power BI reports.

A user named User1 wants to use SQL to analyze the data in Lakehouse1.

You need to configure access for User1. The solution must meet the following requirements:

Provide User1 with read access to the table data in Lakehouse1.

Prevent User1 from using Apache Spark to query the underlying files in Lakehouse1.

Prevent User1 from accessing other items in Workspace1.

What should you do?

- A. Assign User1 the Member role for Workspace1. Share Lakehouse1 with User1 and select Read all SQL endpoint data.
- **B. Assign User1 the Viewer role for Workspace1. Share Lakehouse1 with User1 and select Read all SQL endpoint data.**
- C. Share Lakehouse1 with User1 directly and select Read all SQL endpoint data.
- D. Share Lakehouse1 with User1 directly and select Build reports on the default semantic model.

**Answer: B**

Explanation:

To meet the specified requirements for User1, the solution must ensure:

Read access to the table data in Lakehouse1: User1 needs permission to access the data within Lakehouse1. By sharing Lakehouse1 with User1 and selecting the Read all SQL endpoint data option, User1 will be able to query the data via SQL endpoints.

Prevent Apache Spark usage: By sharing the lakehouse directly and selecting the SQL endpoint data option, you specifically enable SQL-based access to the data, preventing User1 from using Apache Spark to query the data.

Prevent access to other items in Workspace1: Assigning User1 the Viewer role for Workspace1 ensures that User1 can only view the shared items (in this case, Lakehouse1), without accessing other resources such as notebooks, pipelines, or Power BI reports within Workspace1.

This approach provides the appropriate level of access while restricting User1 to only the required resources and preventing access to other workspace assets.

### NEW QUESTION # 17

You need to ensure that the data engineers are notified if any step in populating the lakehouses fails. The solution must meet the technical requirements and minimize development effort.

What should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

**Answer:**

Explanation:

Explanation:

### NEW QUESTION # 18

You have a Fabric workspace named Workspace1 that contains an Apache Spark job definition named Job1.

You have an Azure SQL database named Source1 that has public internet access disabled.

You need to ensure that Job1 can access the data in Source1.

What should you create?

- A. an integration runtime
- B. an on-premises data gateway
- C. a data management gateway
- **D. a managed private endpoint**

**Answer: D**

Explanation:

To allow Job1 in Workspace1 to access an Azure SQL database (Source1) with public internet access disabled, you need to create a managed private endpoint. A managed private endpoint is a secure, private connection that enables services like Fabric (or other Azure services) to access resources such as databases, storage accounts, or other services within a virtual network (VNet) without requiring public internet access. This approach maintains the security and integrity of your data while enabling access to the Azure SQL database.

#### NEW QUESTION # 19

You have a Fabric workspace that contains an eventstream named EventStream1. EventStream1 outputs events to a table in a lakehouse.

You need to remove files that are older than seven days and are no longer in use.

Which command should you run?

- **A. VACUUM**
- B. CLONE
- C. COMPUTE
- D. OPTIMIZE

**Answer: A**

Explanation:

VACUUM is used to clean up storage by removing files no longer in use by a Delta table. It removes old and unreferenced files from Delta tables. For example, to remove files older than 7 days:

```
VACUUM delta.`/path_to_table` RETAIN 7 HOURS;
```

#### NEW QUESTION # 20

DRAG DROP

You have a Fabric eventhouse that contains a KQL database. The database contains a table named TaxiData a. The following is a sample of the data in TaxiData.

You need to build two KQL queries. The solution must meet the following requirements:

One of the queries must partition RunningTotalAmount by VendorID.

The other query must create a column named FirstPickupDateTime that shows the first value of each hour from tpep\_pickup\_datetime partitioned by payment\_type.

How should you complete each query? To answer, drag the appropriate values to the correct targets. Each value may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

**Answer:**

Explanation:

#### NEW QUESTION # 21

.....

Our DP-700 study guide boasts high quality and we provide the wonderful service to the client. We boost the top-ranking expert team which compiles our DP-700 guide prep elaborately and check whether there is the update every day and if there is the update the system will send the update automatically to the client. The content of our DP-700 Preparation questions is easy to be mastered and seizes the focus to use the least amount of answers and questions to convey the most important information. And our quality of DP-700 exam questions is the best in this field for you to pass the DP-700 exam.
