NEW QUESTION # 57

What activities are applied to the entire system and cannot be changed after confirmation in SAP Central Business Configuration?

Note: There are 2 correct answers to this question

- A. Configuration activities
- B. Fiscal year variant
- C. Scoping
- D. Group currency

Answer: B,D

Explanation:

Fiscal year variant and group currency are activities that are applied to the entire system and cannot be changed after confirmation in SAP Central Business Configuration. These activities are part of the system provisioning step, which is the first step in the implementation process. Once the system provisioning is completed and confirmed, the system is locked for these activities and any changes would require a new system provisioning. Scoping and configuration activities, on the other hand, are not applied to the entire system and can be changed later on in the project experience step, which is the second step in the implementation process. Scoping and configuration activities allow the user to adapt the preconfiguration content to their company's needs and extend the configuration for areas not equipped with preconfiguration content. - A. SAP Process Orchestration
- **B. Predelivered APIs**
- C. SAP Cloud Connector
- **D. SAP Integration Suite**

Answer: B,D

To integrate SAP S/4HANA Cloud Public Edition with another SAP public cloud solution, you should use SAP Integration Suite and pre-delivered APIs. SAP Integration Suite is a cloud-based integration platform that provides a comprehensive set of capabilities to connect applications, data, and processes across different environments. Pre-delivered APIs are predefined interfaces that enable communication and data exchange between SAP S/4HANA Cloud Public Edition and other SAP public cloud solutions, such as SAP SuccessFactors, SAP Ariba, SAP Fieldglass, and SAP Concur. SAP Process Orchestration and SAP Cloud Connector are not the correct technologies for this scenario, as they are mainly used for integrating SAP S/4HANA Cloud Public Edition with on-premise or hybrid systems.
