

Exam CWAP-405 Dumps & Dumps CWAP-405 Torrent

DOWNLOAD the newest ValidDumps CWAP-405 PDF dumps from Cloud Storage for free: <https://drive.google.com/open?id=1M0gw3DNm9OzeyhNTU1P12qY5uV6U4Iou>

The content of our CWAP-405 practice engine is based on real exam by whittling down superfluous knowledge without delinquent mistakes rather than dropping out of reality. Being subjected to harsh tests of market, our CWAP-405 exam questions are highly the manifestation of responsibility carrying out the tenets of customer oriented. And our CWAP-405 Study Materials are warmly praised and welcomed by the customers all over the world.

By updating the study system of the CWAP-405 study materials, we can guarantee that our company can provide the newest information about the exam for all people. We believe that getting the newest information about the exam will help all customers pass the CWAP-405 Exam easily. If you purchase our study materials, you will have the opportunity to get the newest information about the CWAP-405 exam. More importantly, the updating system of our company is free for all customers.

Exam CWAP-405 Dumps - Successfully Pass The Certified Wireless Analysis Professional

Even though we have already passed many large and small examinations, we are still unconsciously nervous when we face examination papers. CWAP-405 practice quiz provide you with the most realistic test environment, so that you can adapt in advance so that you can easily deal with formal exams. What we say is true, apart from the examination environment, also includes CWAP-405 Exam Questions which will come up exactly in the real exam. And our CWAP-405 study materials always contain the latest exam Q&A.

CWNP Certified Wireless Analysis Professional Sample Questions (Q49-Q54):

NEW QUESTION # 49

What is used to respond with an uplink transmission to an MU-RTS trigger frame in the 802.11ax PHY?

- A. HE SU PPDU
- B. VHT PPDU
- **C. HE TB PPDU**
- D. HE MU PPDU

Answer: C

Explanation:

An HE TB PPDU (High Efficiency Trigger-Based Packet Data Unit) is used to respond with an uplink transmission to an MU-RTS trigger frame in the 802.11ax PHY (Physical Layer). An MU-RTS trigger frame is a frame that initiates a multi-user transmission opportunity (MU-TXOP) by requesting multiple stations (STAs) to send clear-to-send (CTS) frames on different spatial streams or resource units (RUs). An HE TB PPDU is a frame that contains data from multiple STAs that have been allocated RUs by an MU-RTS trigger frame or another type of trigger frame. An HE SU PPDU (High Efficiency Single User Packet Data Unit) is a frame that contains data from a single STA using all available spatial streams or RUs. An HE MU PPDU (High Efficiency Multi User Packet Data Unit) is a frame that contains data from multiple STAs using different spatial streams or RUs without being triggered by another frame. A VHT PPDU (Very High Throughput Packet Data Unit) is a frame that uses the 802.11ac PHY and does not support multi-user transmissions.

NEW QUESTION # 50

Given a protocol analyzer can decrypt WPA2-PSK data packets providing the PSK and SSID are configured in the analyzer software. When performing packet capture (in a non-FT environment) which frames are required in order for PSK frame decryption to be possible?

- **A. 4-Way Handshake**
- B. Authentication
- C. Probe Response
- D. Reassociation

Answer: A

Explanation:

The 4-way handshake is the process that establishes the pairwise transient key (PTK) between the client and the AP in WPA2-PSK. The PTK is derived from the PSK, the SSID, and some random numbers exchanged in the handshake frames. The PTK is used to encrypt and decrypt the data frames between the client and the AP. Therefore, in order to decrypt WPA2-PSK data packets, a protocol analyzer needs to capture the 4-way handshake frames and have the PSK and SSID configured in the analyzer software¹² References:

* CWAP-405Study Guide, Chapter 3: 802.11 MAC Layer Frame Formats and Technologies, page 87

* CWAP-405Objectives, Section 3.5: Analyze security exchanges

NEW QUESTION # 51

You are troubleshooting an intermittent problem with some WLAN VoIP phones resulting in dropped calls. You configure your capture on a fixed channel matching the current operating channel of a test phone. So far, you have been unsuccessful in capturing the problem because the VoIP phone always roams to another AP before the problem occurs. What would be the best setup for your packet capture to make sure you capture the problem?

- A. Determine which channel the phone is likely to roam to next and capture on that channel.
- B. Configure all APs in monitor mode and have the packets streamed back to your analyzer.
- C. Configure the capture adaptor to scan all channels used in the environment.
- **D. Use multiple capture adaptors and the channel aggregator feature of a protocol analyzer to capture on all AP channels in the client's area.**

Answer: D

Explanation:

Since the VoIP phone roams across APs and channels, a single-channel capture risks missing the problem. Using multiple adapters

with channel aggregation ensures simultaneous monitoring of all relevant channels, guaranteeing that the roaming event and dropped call behavior are fully captured for analysis.

NEW QUESTION # 52

Where, in a protocol analyzer, would you find an indication that a frame was transmitted as part of an A- MPDU?

- A. A-MPDU flag in the QoS Control Field
- B. The HT Operation Element
- C. The Aggregation flag in the Radio Tap Header
- D. A-MPDU flag in the Frame Control Field

Answer: C

Explanation:

In a protocol analyzer, you would find an indication that a frame was transmitted as part of an A-MPDU by looking at the Aggregation flag in the Radio Tap Header. The Radio Tap Header is a pseudo-header that is added by some wireless capture devices to provide additional information about the physical layer characteristics of a frame. The Aggregation flag is one of the fields in this header, and it indicates whether the frame belongs to an A-MPDU or not. If the flag is set to 1, it means that the frame is part of an A-MPDU; if it is set to 0, it means that the frame is not part of an A-MPDU . References: CWAP-405 Certified Wireless Analysis Professional Study and Reference Guide, Chapter 9: PHY Layer Frame Formats and Technologies, page 303; CWAP-405 Certified Wireless Analysis Professional Study and Reference Guide, Chapter 9: PHY Layer Frame Formats and Technologies, page 304.

NEW QUESTION # 53

You want to simplify viewing frames of a particular type in Wireshark. What is used to specify frames for colorization?

- A. Filters are used to define the frames that should be colorized
- B. A scripting language is available to modify the code before recompilation
- C. Custom code must be written and the binaries recompiled
- D. Automated protocol analysis is used and no additional options may be specified

Answer: A

Explanation:

Protocol analyzers also support highlighting or colorization and filtering. The highlighting feature allows you to define colors for packets or frames matching particular criteria. It allows those frames to stand out as you browse through the captured frames

NEW QUESTION # 54

.....

In light of the truth that different people have various learning habits, we launch three CWAP-405 training questions versions for your guidance. In addition, you can freely download the demo of CWAP-405 learning materials for your consideration. We promise there will be no extra charges for such a try, on the contrary, we sincerely suggest you to try the demos of our CWAP-405 Exam Questions and make a well-content choice. You will find that our CWAP-405 training guide is worthy to buy for your time and money!
