

# Exam AWS-Solutions-Associate Bootcamp, AWS-Solutions-Associate Valid Exam Practice

P.S. Free 2025 Amazon AWS-Solutions-Associate dumps are available on Google Drive shared by Exams-boost: <https://drive.google.com/open?id=1s5OG1758HKKjsRu2q4uMllaCfHQw-dP2>

What is more difficult is not only passing the Financials in AWS Certified Solutions Architect - Associate (SAA-C03) (AWS-Solutions-Associate) certification exam, but the acute anxiety and the excessive burden also make the candidate nervous to qualify for the AWS Certified Solutions Architect - Associate (SAA-C03) (AWS-Solutions-Associate) certification. If you are going through the same tough challenge, do not worry because Exams-boost is here to assist you.

The AWS-Solutions-Architect-Associate certification exam tests an individual's ability to design and deploy AWS applications that are scalable, secure, and highly available. It also tests their ability to select the appropriate AWS services for a given scenario and troubleshoot common AWS issues. AWS-Solutions-Associate Exam consists of multiple-choice questions and is proctored online.

## AWS-Solutions-Associate Valid Exam Practice | AWS-Solutions-Associate Latest Exam Labs

We all want to be the people who are excellent and respected by others with a high social status. If you want to achieve that you must boost an authorized and extremely useful AWS-Solutions-Associate certificate to prove that you boost good abilities and plenty of knowledge in some area. Passing the test AWS-Solutions-Associate Certification can help you realize your goal and if you buy our AWS-Solutions-Associate latest torrent you will pass the AWS-Solutions-Associate exam successfully. You can just free download the demo of our AWS-Solutions-Associate exam questions to have a check the excellent quality.

The AWS Certified Solutions Architect - Associate certification is essential for professionals looking to advance their careers in cloud computing. It is a globally recognized certification that demonstrates an individual's expertise in designing, deploying, and managing AWS-based applications. AWS Certified Solutions Architect - Associate (SAA-C03) certification also validates a candidate's knowledge of AWS services, security, and compliance.

## Amazon AWS Certified Solutions Architect - Associate (SAA-C03) Sample Questions (Q320-Q325):

### NEW QUESTION # 320

A solutions architect observes that a nightly batch processing job is automatically scaled up for 1 hour before the desired Amazon EC2 capacity is reached. The peak capacity is the same every night and the batch jobs always start at 1 AM. The solutions architect needs to find a cost-effective solution that will allow for the desired EC2 capacity to be reached quickly and allow the Auto Scaling group to scale down after the batch jobs are complete.

What should the solutions architect do to meet these requirements?

- A. Increase the minimum capacity for the Auto Scaling group.
- B. Change the scaling policy to add more EC2 instances during each scaling operation.

- C. Increase the maximum capacity for the Auto Scaling group.
- D. Configure scheduled scaling to scale up to the desired compute level.

**Answer: A**

#### NEW QUESTION # 321

For each DB Instance class, what is the maximum size of associated storage capacity?

- A. 500GB
- B. 5GB
- C. 2TB
- **D. 1TB**

**Answer: D**

#### NEW QUESTION # 322

In order to optimize performance for a compute cluster that requires low inter-node latency, which of the following feature should you use?

- A. EC2 Dedicated Instances
- **B. Multiple Availability Zones**
- C. Placement Groups
- D. VPC private subnets
- E. AWS Direct Connect

**Answer: B**

Explanation:

Reference: <http://aws.amazon.com/ec2/faqs/> (enhanced networking)

#### NEW QUESTION # 323

An online e-commerce business is running a workload on AWS. The application architecture includes a web tier, an application tier for business logic, and a database tier for user and transactional data management. The database server has a 100 GB memory requirement. The business requires cost-efficient disaster recovery for the application with an RTO of 5 minutes and an RPO of 1 hour. The business also has a regulatory for out-of-region disaster recovery with a minimum distance between the primary and alternate sites of 250 miles.

Which of the following options can the Solutions Architect design to create a comprehensive solution for this customer that meets the disaster recovery requirements?

- A. Back up the application and database data frequently and copy them to Amazon S3. Replicate the backups using S3 cross-region replication, and use AWS CloudFormation to instantiate infrastructure for disaster recovery and restore data from Amazon S3.
- **B. Employ a multi-region solution with fully functional web, application, and database tiers in both regions with equivalent capacity. Activate the primary database in one region only and the standby database in the other region. Use Amazon Route 53 to automatically switch traffic from one region to another using health check routing policies.**
- C. Employ a pilot light environment in which the primary database is configured with mirroring to build a standby database on m4.large in the alternate region. Use AWS CloudFormation to instantiate the web servers, application servers and load balancers in case of a disaster to bring the application up in the alternate region. Vertically resize the database to meet the full production demands, and use Amazon Route 53 to switch traffic to the alternate region.
- D. Use a scaled-down version of the fully functional production environment in the alternate region that includes one instance of the web server, one instance of the application server, and a replicated instance of the database server in standby mode. Place the web and the application tiers in an Auto Scaling behind a load balancer, which can automatically scale when the load arrives to the application. Use Amazon Route 53 to switch traffic to the alternate region.

**Answer: B**
