High-quality NIOS-DDI-Expert Exam Duration Spend Your Little Time and Energy to Pass NIOS-DDI-Expert: Infoblox Qualified NIOS DDI Expert - INE exam

For candidates who are searching for NIOS-DDI-Expert training materials for the exam, the quality of the NIOS-DDI-Expert exam dumps must be your first concern. Our NIOS-DDI-Expert exam materials can reach this requirement. With a professional team to collect the first-hand information of the exam, we can ensure you that the NIOS-DDI-Expert Exam Dumps you receive are the latest information for the exam. Moreover, we also pass guarantee and money back guarantee, if you fail to pass the exam, we will refund your money, and no other questions will be asked.

You may urgently need to attend NIOS-DDI-Expert certificate exam and get the certificate to prove you are qualified for the job in some area. But why NIOS-DDI-Expert certificate is valuable and useful and can help you a lot? Because passing the test certification can help you prove that you are competent in some area and if you buy our NIOS-DDI-Expert Study Materials you will pass the test almost without any problems. We are professional in these career for more than ten years and can give you promised success.

>> NIOS-DDI-Expert Exam Duration <<

New NIOS-DDI-Expert Test Book & NIOS-DDI-Expert Test Simulator Online

If you buy NIOS-DDI-Expert study materials, you will get more than just a question bank. You will also get our meticulous after-sales service. The purpose of the NIOS-DDI-Expert study materials' team is not to sell the materials, but to allow all customers who have purchased NIOS-DDI-Expert study materials to pass the exam smoothly. The trust and praise of the customers is what we most want. We will accompany you throughout the review process from the moment you buy NIOS-DDI-Expert Study Materials. We will provide you with 24 hours of free online services.

Infoblox Qualified NIOS DDI Expert - INE Sample Questions (Q25-Q30):

NEW QUESTION # 25

Which of the following transport protocols are supported by scheduled NIOS Grid Backup? (Select all that apply.)

- A. HTTPS
- B. FTP
- C. SFTP
- D. SCP

Answer: A,B,C,D

Explanation:

Comprehensive and Detailed In-Depth Explanation:NIOS Grid Backup allows scheduled exports of the configuration database (DNS, DHCP, Grid settings) to an external server. Supported protocols ensure flexibility and security:

* A (SFTP):Secure File Transfer Protocol (SSH-based) is supported for encrypted backups to remote servers (port 22). Widely used for secure transfers. Correct.
* B (SCP):Secure Copy Protocol (also SSH-based) is supported, offering a simple, secure file transfer option (port 22). Correct.
* C (FTP):File Transfer Protocol (unencrypted, port 21) is supported for legacy systems, though less secure. Correct.
* D (HTTPS):Web-based secure transfer (port 443) is supported, allowing backups to HTTP servers with SSL/TLS encryption. Correct.
* Setup:In Grid Manager (Grid > Grid Manager > Backup), you configure the protocol, server IP, and credentials.
* Practical Example:In an INE lab, you'd schedule a backup using SFTP to a remote server, test restoration, and troubleshoot connectivity issues, reinforcing Grid deployment skills.
* Note:All four are explicitly supported per NIOS documentation, making this a comprehensive list.
References:Infoblox NIOS Administrator Guide - Grid Backup; INE Course Objective: NIOS DDI Grid Deployment.

NEW QUESTION # 26

You need to reset the database on a Grid member and disconnect it from the Grid, but you would like it to preserve its current network settings. What command can you use to do this?

- A. reset database
- B. reset all
- C. It is possible to reset without losing network settings
- D. reset member

Answer: A

Explanation:

Comprehensive and Detailed In-Depth Explanation:Resetting a Grid member's database while retaining network settings requires a targeted CLI command:

* Requirements:Clear DNS/DHCP/Grid data, disconnect from the Grid, keep IP/hostname for reconnection or standalone use.
* Commands:
* reset database:Wipes the NIOS database (zones, leases, Grid membership), leaving network settings (IP, gateway, etc.) intact. The member becomes standalone, requiring rejoining if needed.
* set factory:Full reset to factory defaults, erasing everything (database, network, licenses).
* Options:
* A (reset all):Not a valid command (see Q28). Incorrect.
* B (reset database):Meets all criteria-clears database, disconnects, preserves network. Correct.
* C (reset member):Not a specific CLI command; vague term. Incorrect.
* D:Misinterprets the question as a statement-it's possible with B, but this isn't a command. Incorrect.
* Practical Example:In an INE lab, you'd run reset database on a test member, verify its IP persists via show network, and troubleshoot rejoining the Grid.References:Infoblox NIOS CLI Reference Guide - Reset Commands; INE Course Content: NIOS DDI Grid Troubleshooting.

NEW QUESTION # 27

Which of the following statements about restarting Grid services are true? (Select all that apply.)

- A. By default, the Grid restarts services every day
- B. You can poll members to see which services will be restarted

- C. You can schedule service restarts
- D. You can force service restart on a member

Answer: C,D

Explanation:
Comprehensive and Detailed In-Depth Explanation:Restarting services (e.g., DNS, DHCP) on NIOS Grid members is a common administrative task, often required after configuration changes. Let's break down each option with detailed reasoning:
* A:"Poll members to see which services will be restarted" suggests proactively querying members for restart eligibility. NIOS doesn't offer a specific polling feature for this-administrators check service status (e.g., via Grid Manager > Members > Services) or logs, but there's no pre-restart polling tool.
Incorrect.
* B:In Grid Manager (Grid > Grid Manager > Members), you can select a member and click "Restart Services" with a "Force Restart" option, overriding any checks for necessity. This is useful in troubleshooting (e.g., clearing a hung DNS service). Correct.
* C:NIOS allows scheduling service restarts via the "Schedule Restart" option in Grid Manager, letting you specify a time to minimize disruption (e.g., off-hours). This aligns with Grid management best practices taught in INE. Correct.
* D:There's no default daily restart policy in NIOS. Restarts occur only when triggered by an admin or system event (e.g., upgrade). This would disrupt service unnecessarily if true. Incorrect.
* Practical Example:During an INE lab, you might force a restart on a member to resolve a DHCP failover issue or schedule a restart after updating a DNS zone to ensure propagation, reflecting real- world Grid troubleshooting.References:Infoblox NIOS Administrator Guide - Managing Grid Services; INE Course Content: NIOS DDI Grid Troubleshooting.

NEW QUESTION # 28
The Infoblox appliance has an LCD panel. To join a node to a Grid, the administrator should use the LCD panel at the front of the Infoblox appliance.

- A. True
- B. False

Answer: B

Explanation:
Comprehensive and Detailed In-Depth Explanation:Infoblox physical appliances (e.g., IB-1400 series) feature an LCD panel for basic configuration, but its role in Grid joining is limited:
* LCD Capabilities:The panel allows setting IP addresses, hostnames, and basic network parameters (e.
g., via arrow keys and menu options). It's useful for initial setup or recovery.
* Grid Joining Process:Joining a node to a Grid requires:
* Configuring the node's IP and Grid Master IP.
* Authenticating with Grid credentials (e.g., shared secret).
* Initiating the join via Grid Manager (Grid > Members > Add) or CLI (set membership).
* Why False:The LCD can set preliminary network settings, but full Grid joining-specifying the Grid Master, VPN details, and completing sync-requires CLI or GUI access. The panel lacks the interface for these steps.
* Practical Example:In an INE lab, you'd use the LCD to set an IP on a new node, then SSH to run set membership and join the Grid, troubleshooting connectivity via logs.References:Infoblox NIOS Administrator Guide - LCD Panel; INE Course Content: NIOS DDI Grid Deployment.

NEW QUESTION # 29
When controlling Grid Members under Grid > Grid Manager > Members, what control options are available from the Toolbar? Choose 3 answers

- A. Reboot
- B. Restart GUI
- C. Restart
- D. Suspend

Answer: A,C,D

Explanation:
Comprehensive and Detailed In-Depth Explanation:Grid Manager Toolbar (Grid > Members) offers member controls:

* A (Reboot):Reboots the appliance-full restart. Correct.
* B (Restart):Restarts services (e.g., DNS, DHCP) without reboot. Correct.
* C (Suspend):Pauses services-useful for maintenance. Correct.
* D:"Restart GUI" isn't a member-level option-GUI runs on GM, not per member. Incorrect.
* Practical Example:In an INE lab, reboot a member, restart services, suspend another, and troubleshoot impacts.References:Infoblox NIOS Administrator Guide - Member Controls; INE Course Content: NIOS DDI Grid Troubleshooting.

NEW QUESTION # 30
......

Our PracticeVCE's NIOS-DDI-Expert exam training material is the leader of NIOS-DDI-Expert certification exam. Our NIOS-DDI-Expert exam training materials is the result of PracticeVCE's experienced IT experts with constant exploration, practice and research for many years. It has high accuracy and wide coverage. If you buy our NIOS-DDI-Expert Dumps PDF, we guarantee that we will provide one year free renewal service.
