Pure Storage FlashArray-Implementation-Specialist practice test software contains many Pure Storage FlashArray-Implementation-Specialist practice exam designs just like the real Pure Storage Certified FlashArray Implementation Specialist (FlashArray-Implementation-Specialist) exam. These FlashArray-Implementation-Specialist practice exams contain all the FlashArray-Implementation-Specialist questions that clearly and completely elaborate on the difficulties and hurdles you will face in the final FlashArray-Implementation-Specialist Exam. Pure Storage Certified FlashArray Implementation Specialist (FlashArray-Implementation-Specialist) practice test is customizable so that you can change the timings of each session. Pass4sureCert desktop Pure Storage FlashArray-Implementation-Specialist practice test questions software is only compatible with windows and easy to use for everyone.

You can make your dream of passing the Pure Storage FlashArray-Implementation-Specialist exam come true with Pass4sureCert updated Pure Storage FlashArray-Implementation-Specialist practice test questions. Pass4sureCert offer Pure Storage FlashArray-Implementation-Specialist the latest dumps in three formats. Pure Storage FlashArray-Implementation-Specialist desktop practice test software creates a real exam environment so that you can feel like attempting the Pure Storage Certified FlashArray Implementation Specialist FlashArray-Implementation-Specialist actual exam.

## FlashArray-Implementation-Specialist Test Vce Free & New FlashArray-Implementation-Specialist Test Testking

During nearly ten years, our company has kept on improving ourselves on the FlashArray-Implementation-Specialist study questions, and now we have become the leader in this field. And now our FlashArray-Implementation-Specialist training materials have become the most popular FlashArray-Implementation-Specialist Practice Engine in the international market. There are so many advantages of our FlashArray-Implementation-Specialist guide quiz, and as long as you have a try on them, you will definitely love our exam dumps.

## Pure Storage Certified FlashArray Implementation Specialist Sample Questions (Q14-Q19):

NEW QUESTION # 14

Upon completion of a hardware upgrade activity, which command should be used to unset the maintenance tag?

- A. purealert tag --cancel
- B. purealert --unset
- C. purealert untag --maintenance

**Answer: C**

Explanation:

The command purealert untag --maintenance removes the maintenance tag after a hardware upgrade, signaling the system that maintenance mode has ended.

#### NEW QUESTION # 15

Which command should an Implementation Engineer use to allow Support access to an array?

- A. purearray remoteassist --connect
- B. purearray remoteassist
- C. purearray connect --remoteassist

**Answer: A**

Explanation:

The purearray remoteassist --connect command explicitly enables Support to establish a remote connection to the array for troubleshooting or assistance.

#### NEW QUESTION # 16

On a FlashArray//XR50R2/3 Fibre Channel (FC) array, what is the default type and placement of the PCIe FC card?

- A. 2-port in slot 0
- B. 4-port in slot 0
- C. 2-port in slot 2

**Answer: C**

Explanation:

On an X50R2/3 FC array, Pure ships each controller with a factory-installed dual-port 32 Gb Fibre Channel card in the PCIe slot numbered 2, providing out-of-the-box SAN connectivity.

#### NEW QUESTION # 17

A customer has ordered several FlashArrays and wants to have ActiveCluster configured. What is the maximum quantity of arrays supported with ActiveCluster?

- A. 0
- B. 1
- C. 2

**Answer: A**

Explanation:

FlashArray ActiveCluster is designed for synchronous replication between two FlashArray systems, enabling active-active configurations across two sites. This setup allows both arrays to serve I/O simultaneously, providing high availability and zero RPO (Recovery Point Objective). Each array in the ActiveCluster configuration maintains identical volume identities, ensuring seamless access for hosts regardless of the array they connect to. The configuration supports metro-area clustering, with a maximum round-trip latency of 11 milliseconds between arrays. Additionally, the Pure1 Cloud Mediator or an on-premises mediator is utilized to manage failover and prevent split-brain scenarios, eliminating the need for a third site or external gateway.

While ActiveCluster supports a two-site configuration, it does not support additional arrays within the same synchronous setup. For scenarios requiring protection across more than two sites, asynchronous replication solutions like ActiveDR™ can be employed. ActiveDR allows for asynchronous replication to a third site, providing broader disaster recovery capabilities.

Therefore, the maximum number of arrays supported in a single ActiveCluster configuration is two.

### NEW QUESTION # 18

What is the rack unit height of a FlashArray//XL?

- A. 0
- B. 1
- C. 2

**Answer: C**

Explanation:

The FlashArray//XL models are designed to fit into a 5U rack space, which is equivalent to 5 rack units. Each rack unit (U) is 1.75 inches in height, so a 5U chassis would be 8.75 inches tall. However, the FlashArray//XL chassis is designed to be 5U in height, providing a compact and efficient form factor for enterprise storage needs.

### NEW QUESTION # 19

.....

Pass4sureCert is an authoritative study platform to provide our customers with different kinds of FlashArray-Implementation-Specialist practice torrent to learn, and help them accumulate knowledge and enhance their ability to pass the exam as well as get their expected scores. There are three different versions of our FlashArray-Implementation-Specialist Study Guide: the PDF, the Software and the APP online. To establish our customers' confidence, we offer related free demos for our customers to download before purchase. With our FlashArray-Implementation-Specialist exam questions, you will be confident to win in the FlashArray-Implementation-Specialist exam.
