完美的AI-201在線考題&優秀的Salesforce認證培訓 - 優秀的Salesforce Salesforce Certified Agentforce Specialist

如果你還在猶豫是否選擇VCESoft，你可以先到VCESoft網站下載我們免費提供的部分考試練習題和答案來確定我們的可靠性。如果你選擇下載我們的提供的所有考試練習題和答案，VCESoft敢100%保證你可以以高分數一次性通過Salesforce AI-201 認證考試。

最新的 AI Specialist AI-201 免費考試真題 (Q238-Q243):

問題 #238

Which use case is best supported by Salesforce Agent's capabilities?

- A. Enable Salesforce admin users to create and train custom large language models (LLMs) using CRM data.
- **B. Bring together a conversational interface for interacting with AI for all Salesforce users, such as developers and ecommerce retailers.**
- C. Enable data scientists to train predictive AI models with historical CRM data using built-in machine learning capabilities

答案: **B**

解題說明:

Salesforce Agent is designed to provide a conversational AI interface that can be utilized by different types of Salesforce users, such as developers, sales agents, and retailers. It acts as an AI-powered assistant that facilitates natural interactions with the system, enabling users to perform tasks and access data easily. This includes tasks like pulling reports, updating records, and generating personalized responses in real time.

問題 #239

A company wants to retrieve patient history details to augment the AI agent response. [he company wants to leverage the Data Cloud search index feature. What is best practice when considering retrieval-augmented generation (RAG) for information that may contain personally identifiable information (PII)?

- A. Encrypt embeddings, but still index PII records.
- **B. Mask sensitive fields and index only non-PII data.**
- C. Depend on the agent's prompt to avoid exposing PII.

答案： B

解題說明：

According to the AgentForce Data Governance and RAG Security Guidelines, when implementing retrieval-augmented generation (RAG) using Data Cloud search indexes, best practice is to ensure that personally identifiable information (PII) and other sensitive data are never indexed or embedded in the retrieval system.

The documented recommendation is to mask or exclude sensitive fields before creating embeddings or indexing content. This prevents the large language model (LLM) from accessing or generating responses that could inadvertently expose confidential information. Masking can include redacting names, IDs, contact details, or any regulated medical information.

問題 #240

At Universal Containers, a sales manager is tackling a tough challenge as several new junior sales reps struggle with objection handling and price negotiations for complex deals. The manager lacks the time to personally guide each sales rep through their specific customer scenarios before their critical meetings. The junior sales reps have asked for a tool that would allow them to practice their pitches by simulating tough conversations and receive personalized feedback that is specific to the commerce opportunity they are working on. Which Salesforce solution should an Agentforce Specialist recommend?

- **A. Sales Coach**
- B. Employee Coach
- C. SDR Agent

答案： A

解題說明：

The AgentForce for Sales Overview defines Sales Coach as the AI-powered solution designed to help sales professionals practice and improve selling skills. The guide describes: "Sales Coach simulates customer interactions, allows reps to role-play objection handling, and provides personalized feedback based on real opportunity data." This directly matches the scenario where sales reps want to practice negotiation and objection handling with scenario-specific feedback.

問題 #241

How does Secure Data Retrieval ensure that only authorized users can access necessary Salesforce data for dynamic grounding?

- A. Retrieves Salesforce data based on the Prompt template's object permissions.
- **B. Retrieves Salesforce data based on the user's permissions executing the prompt.**
- C. Retrieves Salesforce data based on the 'Run As' users permissions.

答案： B

解題說明：

Secure Data Retrieval enforces Salesforce's security model by dynamically grounding data access in the permissions of the user executing the prompt. This ensures compliance with CRUD (Create, Read, Update, Delete) and FLS (Field-Level Security) settings, preventing unauthorized access to sensitive data. For example, if a user lacks access to a specific object or field, the AI model cannot retrieve it for dynamic grounding.

問題 #242

Universal Containers has a requirement to provide a sales summary for its sales reps who are using Employee Agents, but they are not happy with the default answer. Which best practice should the AgentForce Specialist recommend?

- A. Update the standard record summary action.
