personId
string
> The person ID.

personEmail
string
> The email address of the person.
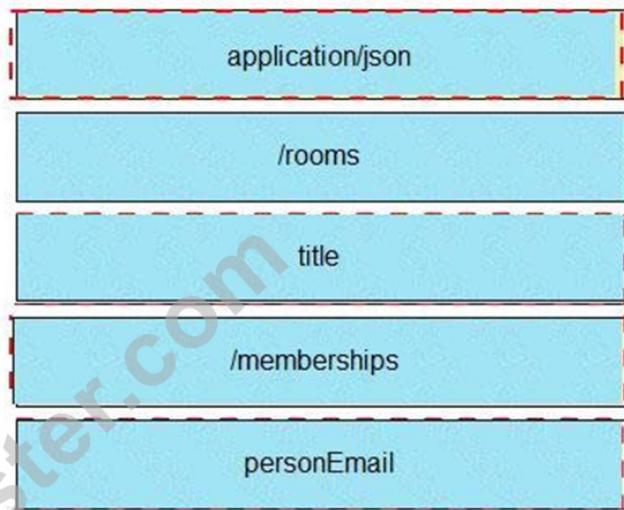

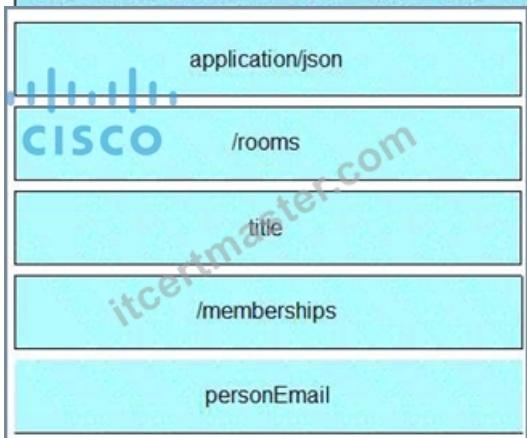

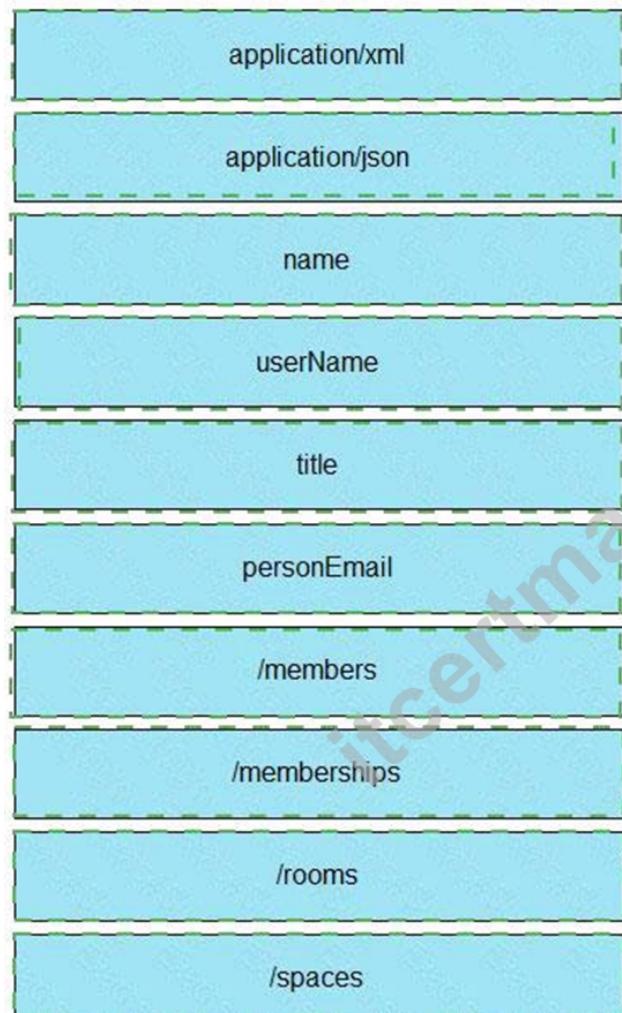

isModerator
boolean
> Whether or not the participant is a room moderator.

A developer is creating a Python Script that will use the Webex Teams REST API to automatically create a new collaboration space with him and his team leads on-demand via a Linux terminal command. Drag and drop the code snippets from the left onto the numbers on the right that match the missing sections in the exhibit to complete the script. Not all code snippets are used.

application/xml	<item 1>
application/json	<item 2>
name	<item 3>
userName	<item 4>
title	<item 5>
personEmail	
/members	
/memberships	
/rooms	
/spaces	

Answer:

Explanation:

application/xml		application/json
application/json		/rooms
name		title
userName		/memberships
title		personEmail
personEmail		
/members		
/memberships		
/rooms		
/spaces		

| application/json |
|---|
| /rooms |
| title |
| /memberships |
| personEmail |
