If you want to attend the exam, Getcertkey GAQM CASPO-001 questions and answers can offer you convenience. The dumps are indispensable and the best.

## GAQM Certified Agile Scrum Product Owner (CASPO) Sample Questions (Q40-Q45):

### NEW QUESTION # 40

Who must do all the work to make sure Product Backlog items conform to the Definition of "Done"? (Choose the best answer)

- A. The Scrum Master
- B. The Scrum Team
- C. The Product Owner
- **D. The Developers**
- E. QA Specialists

**Answer: D**

Explanation:

The Scrum Guide clearly assigns the responsibility for delivering a "Done" Increment to the Developers: "The Developers are the

people in the Scrum Team that are committed to creating any aspect of a usable Increment each Sprint." This includes all work-development, testing, integration, etc.-needed to meet the Definition of "Done," a shared commitment that ensures quality. Option A (Scrum Team) is too broad; while the Scrum Team collaborates, only the Developers perform the hands-on work. Option C (Product Owner) is incorrect- they manage the Product Backlog, not the execution. Option D (QA Specialists) introduces a role not defined in Scrum; quality is the Developers' collective responsibility. Option E (Scrum Master) is wrong-they facilitate, not build. Thus, B is correct.

#### NEW QUESTION # 41

What is typical work for a Product Owner in a Sprint? (Choose the best two answers)

- A. Collaborate with stakeholders, user communities, and product managers.
- B. Work with the Developers on Product Backlog refinement.
- C. Update the work plan for the Developers on a daily basis.
- D. Attend every Daily Scrum to answer functional questions on the discussed Sprint Backlog items.
- E. Create financial reporting upon the spent hours reported by the Developers.

**Answer: A,B**

Explanation:

The Scrum Guide outlines the Product Owner's responsibilities as maximizing value through Product Backlog management, which includes:

\* C: "Developing and explicitly communicating the Product Goal" and refining the Product Backlog with Developers to ensure clarity and readiness.

#### NEW QUESTION # 42

Which phrase best describes a Product Owner? (Choose the best answer)

- A. Go-between between Developers and customers
- B. Value optimizer
- C. Requirements engineer
- D. Team manager

**Answer: B**

Explanation:

The Scrum Guide defines the Product Owner as "accountable for maximizing the value of the product resulting from the work of the Scrum Team." Option B (Value optimizer) encapsulates this core focus on value delivery. Option A (Requirements engineer) is too narrow-while they manage requirements, their role transcends engineering to strategic vision. Option C (Team manager) is incorrect-they don't manage the team; the Scrum Master supports team self-management. Option D (Go-between) understates their authority; they actively shape the product, not just relay information. Thus, B is the best description.

#### NEW QUESTION # 43

What are two typical activities for a Product Owner in a Sprint? (Choose the best two answers)

- A. Collaborate with stakeholders, user communities, and product managers.
- B. Work with the Developers on Product Backlog refinement.
- C. Update the work plan for the Developers on a daily basis.
- D. Attend every Daily Scrum to answer functional questions on the discussed Sprint Backlog items.
- E. Create financial reporting upon the spent hours reported by the Developers.

**Answer: A,B**

Explanation:

The Product Owner's role during a Sprint centers on maximizing value through Product Backlog management and stakeholder engagement, as outlined in the Scrum Guide.

\* C: Refinement is a key activity: "The Product Owner may do the above work [Product Backlog management], or may delegate the responsibility to others. Regardless, the Product Owner remains accountable." Collaborating with Developers ensures items are clear and "Ready."

\* E:Stakeholder collaboration is critical: "The Product Owner is also accountable for effective Product Backlog management, which includes... representing the needs of many stakeholders in the Product Backlog."

\* A:Attending every Daily Scrum isn't typical; it's the Developers' event, and the Product Owner attends only if needed.

\* B:The Developers manage their work plan (Sprint Backlog); the Product Owner doesn't update it.

#### NEW QUESTION # 44

What best describes the relationship of the Product Owner and the stakeholders? (Choose the best answer)

- A. The Product Owner writes the User Stories as provided by the stakeholders.
- B. The Product Owner has the final call over the requirements and should involve the stakeholders as little as possible.
- **C. The Product Owner actively asks for stakeholder input and expectations to process into the Product Backlog.**
- D. The Product Owner provides the stakeholders with acceptance forms at the Sprint Review to record their formal agreement over the delivered software.

**Answer: C**

Explanation:

The Scrum Guide states: "The Product Owner is also accountable for effective Product Backlog management, which includes... representing the needs of many stakeholders in the Product Backlog." Option C reflects this collaborative approach—actively seeking stakeholder input to shape the Product Backlog. Option A is too passive; the Product Owner interprets, not just transcribes. Option B contradicts Scrum's emphasis on stakeholder engagement. Option D introduces a formal process not in Scrum; the Sprint Review is for feedback, not signed agreements. Thus, C is best.

#### NEW QUESTION # 45

.....

The Getcertkey has specially designed the GAQM CASPO-001 desktop practice exam software for the self-assessment of the learned concepts. Our GAQM CASPO-001 desktop practice exam software can be installed on all types of windows operating computers. This is GAQM CASPO-001 practice exam for the applicant's practice that could be solved without internet access.
