## Microsoft MB-820 Desktop Practice Test Software's Top Features

As we all know it is not easy to obtain the MB-820 certification, and especially for those who cannot make full use of their sporadic time. But you are lucky, we can provide you with well-rounded services on MB-820 practice braindumps to help you improve ability. You would be very pleased and thankful if you can spare your time to have a look about features of our MB-820 Study Materials. With the pass rate high as 98% to 100%, you can totally rely on our MB-820 exam questions.

## Microsoft MB-820 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>Develop by using AL objects: Building and extending tables and reports is discussed in this topic. It also explains Designing and creating an XMLport. Lastly, it discusses how to work with entitlement and permission set objects.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>Describe Business Central: Describing the components and capabilities of Business Central, and describing the core solution and extensions approach for Business Central are focal points of this topic. It also explains the difference between Business Central Online and Business Central on-premises features.</li></ul>

Topic 3	<ul style="list-style-type: none"> <li>• Work with development tools: Implementing semi-automated test processes and managing and assessing telemetry are its sub-topics.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>• Install, develop, and deploy for Business Central: It delves into the installation and configuration of a Business Central development environment. Moreover, it discusses creating, debugging, and deploying an extension in Business Central.</li> </ul>

## Microsoft Dynamics 365 Business Central Developer Sample Questions (Q76-Q81):

### NEW QUESTION # 76

You need to create the code related to the Subcontract Documents table to meet the requirement for the quality department. How should you complete the code segment? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

**Answer:**

Explanation:

□ Explanation:

### NEW QUESTION # 77

A company is setting up a custom telemetry trace signal to send traces on failed customer statement emails.

□ For each of the following statements, select Yes if the statement is true. Otherwise, select No.

**Answer:**

Explanation:

### NEW QUESTION # 78

You need to determine why the debugger does not start correctly.

What is the cause of the problem?

- A. The "executionContext\*" parameter is not set to "Debug".
- B. The "userId" parameter is specified, and the next user session that is specified in the "breakOnNext" parameter is snapshot debugged.
- C. The "breakOnNext" parameter is not set to -WebServiceClient".
- **D. The "userId" parameter must have the GUID of the user specified, not the username.**

**Answer: D**

Explanation:

In Microsoft Dynamics 365 Business Central, when configuring snapshot debugging, it is crucial that the parameters in the configuration file are correctly set. From the options provided, the issue with the debugger not starting correctly is most likely due to an incorrect "userId" parameter.

\* Option A is the cause of the problem. The "userId" parameter must be the GUID of the user, not the username. The snapshot debugger needs the exact GUID to attach to the right session for debugging.

\* Option B is incorrect because "breakOnNext" set to "WebClient" is a valid setting. This tells the debugger to break on the next client action in the web client, which is a typical scenario.

\* Option C is not the cause of the problem. The "userId" parameter is meant to specify which user session to debug, and this works in conjunction with the "breakOnNext" parameter.

\* Option D is incorrect as the "executionContext" parameter does not need to be set to "Debug" for snapshot debugging to work. "DebugAndProfile" is a valid value for the "executionContext" parameter, as it allows for debugging and collecting performance information.

Therefore, the reason why the debugger does not start correctly is due to Option A: The "userId" parameter must have the GUID of the user specified, not the username.

### Topic 3, Fabrikam Inc

#### Company background and technical environment

##### Current environment

Fabrikam Inc. is a medium-sized company that plans to implement Dynamics 365 Business Central as an ERP system. The company has a development department that will help with the ERP implementation.

Most employees work remotely from different countries or regions and speak different languages. The various locations and languages cause issues with the current on-premises software.

##### Planned improvements

Fabrikam Inc. plans to implement new and modern software to manage the company. The company wants to use Business Central because it is cloud-based and meets all company requirements.

The company intends to improve reporting and integration functionality by using modern tools such as Power BI and APIs. To reduce the amount of information sent by email, the company plans to expose vendor information to be consumed from external users.

##### Technical specifications

The development department installed Visual Studio Code to create Business Central extensions so the ERP system could be customized according to company needs. All extensions must be developed for the Business Central 2024 wave 1 online version. The development department plans to use telemetry to control the appropriate use of each new development and works directly in licensed sandbox environments supplied by Microsoft.

The following departments at Fabrikam Inc. have multiple requirements:

- \* Development
- \* Control
- \* Accounting
- \* Quality

##### Development department

The development department designed an extension for the purchase department. Because the developers plan to work with telemetry for monitoring operations, they need the Application Insights information. To accomplish this, the department must add a setting in the corresponding file.

The quality department does not want to receive any warning about the Application Insights setting when the extension is compiled.

##### Control department

The control department requires customization to Business Central by using a per-tenant extension (PTE) named Subcontract Docs. The PTE includes a table named Subcontract Documents. The table has the following fields:

- \* ID: A unique identifier
- \* Subcontract No.: Related to the standard Vendors table
- \* Description: A short description of a received document
- \* Document: A media type that has the document
- \* Comments: Comments about the document
- \* Date: When the document was imported
- \* Amount: Amount related with the imported document
- \* Posted Indicates if the document is managed

The extension must be in English - United States (ENU) and Spanish Traditional Sort (ESP) so the application can be used in both languages. The translations must be on the table, not on the page, to avoid repeating them.

The control department does not want to use translation files.

The control department manager requires a brief guide for the Description and Comments fields when employees create a new record so users know what to include in the fields. The guide must disappear as soon as users add a value in the fields.

The Subcontract Documents table must be displayed on a new page named Subcontract Document List through an action from the standard Vendor page.

The Amount field, included in the Subcontract Document List, must be formatted in bold format when the record is posted (field Posted = true).

The control department also requires a report to display a list of subcontract documents named Subcontract Documents Excel List.

The report must meet the following requirements:

- \* Downloads a file only in Microsoft Excel.
- \* Includes a predefined format with two worksheets; one with the posted subcontract documents and another with the unposted subcontract documents.

##### Accounting department

The accounting department plans to use Power BI to analyze information generated by the control department.

The accounting department plans to expose an API named API Customer Lines. To improve the performance, the API must use read-only information and work with a Query object to summarize the data.

The accounting department must expose data such as the following.

The qty column must be the sum of the Outstanding quantity field of Sales Order Lines. It must be in descending order by quantity. The department also exposes a page named Fabrikam Vendor API that includes vendor information from the Vendor table, such as

number and name. The API must use the replica database to improve performance.

Because Fabrikam Inc. is based in multiple countries and regions, the company periodically must send accounting movements between two dates to the local tax offices named Fabrikam Accounting.

The format for this file must be an XML file generated by an XMLport object. For security reasons, it is not possible to receive data from this XMLport.

The department has a version 1.0.0.1 installed for an extension named Quality Control. The department develops a new version 1.0.0.2 and uses a codeunit with the subtype Upgrade to update it. The department requires the values for AppVersion and DataVersion on the table OnUoAradePerCompany after using NavAocGetCurrentModuleInformation.

The generated XML file must have a schema like this:

Quality department

The quality department requires that every new app or extension is designed to meet standard company guidelines. The quality department plans to follow the standard Business Central data model. The quality development must be able to use triggers correctly.

The department must ensure that when a vendor is deleted, the system also removes each record in the Subcontract Documents table related to the vendor. If the subcontract document record has the field Posted = false, it must not be possible to delete the record.

### NEW QUESTION # 79

You are creating a new Business Central report.

You plan to use triggers and functions to dynamically create a dataset and control the report behavior.

You must provide the following implementation.

- \* Run when the report is loaded.
- \* Run when the data item is iterated for the last time.
- \* Skip the rest of the report.

You need to select the triggers and functions for the report.

Which triggers and functions should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

**Answer:**

Explanation:

### NEW QUESTION # 80

A company owns and operates hotels, restaurants, and stores.

When the staff orders materials from the purchasing department, the requests are not directed to the correct approvers.

The staff requires a new field named Approver from which they can select the appropriate approver. The field must include the following options:

- \* Hotel manager
- \* Restaurant manager
- \* Store manager
- \* Purchasing manager

You need to create the Approver field in the Item table by using an AL extension.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

**Answer:**

Explanation:

Explanation:

To create the Approver field in the Item table using an AL extension, perform the following actions in sequence:

- \* Create an enum object named Approver and include all options.
- \* Create a table extension object for an Item table with an Approver field of enum type named Approver in the fields section.
- \* Create a page extension object that extends the ItemCard object. Add the field to the fields section.

Build and extend tables:

To add a new field to an existing table in Business Central using AL extension, you need to define an enumeration (enum) with the possible values for the new field. Then, you create a table extension object where you add the new field and specify its type as the enum you created. This adds the field to the Item table. Finally, you modify the user interface to display the new field by creating a

page extension for the Item Card page and adding the new field to it.

### NEW QUESTION # 81

• • • • •

The price for MB-820 training materials is reasonable, and no matter you are a student at school or an employee in the company, you can afford it. In addition, MB-820 exam materials cover most of knowledge points for the exam, and you can pass the exam as well as improve your professional ability in the process of learning. MB-820 Exam Materials are high-quality, and you can improve your efficiency. We have online and offline chat service. If you have any questions about MB-820 exam materials, you can contact us, and we will give you reply as soon as possible.
