NCARB Project-Management Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Contracts: This section of the exam measures the skills of project managers and covers the analysis of contracts that govern the relationships between architects, owners, contractors, and consultants. It highlights verifying adherence to agreements, interpreting key contractual elements, and ensuring consultant work is properly integrated into the project.
Topic 2	<ul style="list-style-type: none">Project Quality Control: This section of the exam measures skills of project managers and covers procedures for ensuring quality and maintaining the Standard of Care throughout the project. It focuses on applying regulatory requirements, reviewing documentation for quality, reducing risks and liabilities, and managing the design process to preserve its objectives

Topic 3	<ul style="list-style-type: none"> • Resource Management: This section of the exam measures the skills of project managers and covers how to determine the right team composition and manage time allocation for successful project delivery. It focuses on evaluating criteria for assembling teams and ensuring resources are properly managed to execute the project within agreed terms.
Topic 4	<ul style="list-style-type: none"> • Project Work Planning: This section of the exam measures the skills of architectural associates and covers the development and communication of an effective project work plan. It emphasizes maintaining schedules, setting clear criteria for work planning, and ensuring consistent communication with stakeholders, including owners, contractors, consultants, and internal staff.
Topic 5	<ul style="list-style-type: none"> • Project Execution: This section of the exam measures skills of architectural associates and covers the management of project execution through administrative procedures rather than design decisions. It addresses evaluating budgets, managing scope changes, preparing project documentation in line with delivery methods, and securing necessary approvals from relevant authorities.

Our Project-Management learn tool create a kind of relaxing leaning atmosphere that improve the quality as well as the efficiency, on one hand provide conveniences, on the other hand offer great flexibility and mobility for our customers. And we believe you will love our Project-Management Exam Questions if you can free download the demo of our Project-Management learning guide.

NCARB ARE 5.0 Project Management (PjM) Exam Sample Questions (Q37-Q42):

NEW QUESTION # 37

Which project delivery method allows the owner to engage the architect, contractor, and key consultants in a single collaborative contract?

- A. Construction Manager at Risk (CMAR)
- B. Design-Build
- C. Design-Bid-Build
- **D. Integrated Project Delivery (IPD)**

Answer: D

Explanation:

Integrated Project Delivery (IPD) is a project delivery method characterized by a single, multiparty contract involving the owner, architect, contractor, and key consultants. IPD promotes early collaboration, shared risk/reward, and transparency to optimize project outcomes. This contrasts with traditional methods like Design- Bid-Build where contracts are separate. ARE 5.0 PjM includes IPD as a critical topic, focusing on teamwork, roles, and responsibilities unique to this delivery method.

NEW QUESTION # 38

Construction of a gymnasium is scheduled to be complete 365 days from the date of the notice to proceed. On Friday, day 355 of the schedule, the contractor submits a punch list to the architect for substantial completion. The architect agrees to review the punch list on-site after the weekend.

On Monday, the architect discovers that a subcontractor left open a skylight over the weekend, allowing heavy rain to fall into the courtyard area and damage the gymnasium floor. It was determined the flooring must be replaced. The lead time for new flooring is 8-10 weeks, and installation will take 14 days. The architect's agreement with the owner is contracted to end 30 days after substantial completion.

Which of the following documents must the architect prepare immediately? Check the two that apply.

- A. A punch list for areas not damaged for contractor approval
- B. A notice to the contractor for withholding final payment
- C. An invoice for additional services for owner payment
- D. A change order to purchase new flooring
- E. A revised schedule for owner approval
- F. A request for liquidated damages for contractor review

Answer: A,D

Explanation:

The punch list is valid only for work deemed substantially complete. Since the floor is damaged, substantial completion cannot yet be certified, but the architect can and should prepare a punch list for other non-affected areas. Meanwhile, the replacement flooring constitutes a change in scope, requiring a change order. The contractor, being responsible for the damage, will need to correct the work per the General Conditions (A201).

Incorrect choices:

- A). The contractor revises the schedule, not the architect.
- B). The owner assesses liquidated damages, not the architect directly.
- C). No additional services have been performed yet.
- E). Final payment withholding applies after project closeout, not now.

NEW QUESTION # 39

A key Project Manager leaves an architectural firm halfway through a project. Several days of lost productivity pass while the new Project Manager determines the customized organization that the previous Project Manager used. The new Project Manager recommends implementing new office policies to create standards and quality control methods for the entire office.

Which methods should be implemented? Check the four that apply.

- A. review current processes
- B. improve quality continuously
- C. standardize work flow
- D. change the project delivery sequence
- E. customize work flow
- F. measure performance

Answer: A,B,C,F

Explanation:

Comprehensive Detailed Explanation:

Best practices in quality management include:

- A). Reviewing existing methods to identify inefficiencies
 - B). Standardizing workflow to prevent variability and loss of knowledge
 - D). Measuring performance to track productivity and outcomes
 - E). Continuous improvement ensures the office adapts and grows
- C is incorrect as customization contradicts standardization and is the root of the issue. F is a drastic step not warranted by the situation.

NEW QUESTION # 40

What type of contract involves payment based on actual costs plus a fee?

- A. Cost-Plus Contract
- B. Lump Sum Contract
- C. Unit Price Contract
- D. Time and Materials Contract

Answer: A

Explanation:

Cost-Plus Contracts reimburse the contractor for actual costs plus an agreed fee or percentage. This contract type shifts some risk to the owner but allows flexibility for uncertain scopes. Lump sum contracts are fixed price; unit price contracts pay per unit; time and materials pay based on labor and material costs but usually with a cap. ARE 5.0 PjM covers contract types and their implications.

NEW QUESTION # 41

The construction documents for a new multi-tenant office building are 90% complete. The owner requests that the bid documents include the rough-in of security camera locations and access control points for the building. Which changes should the architect consider? Check the three that apply.

- A. Adjusting the Project schedule for delivery of documents and bidding
- B. Documenting the security system on the building permit application
- C. Lengthening the scheduled bidding time frame due to additional work
- D. Revising the consultant services agreement for a change in scope
- E. Revising the Construction Manager services for the expanded scope
- F. Revising the Design Fee agreement for additional services

Answer: A,D,F

Explanation:

Comprehensive Detailed Explanation:

Since the documents are nearly complete, integrating new scope such as security systems can affect both the schedule and the fee. The architect should adjust the delivery timeline to accommodate new coordination, drawings, or revisions (A). Additional services require revising the design agreement (C). If a security consultant or electrical engineer is involved, their scope must also be amended (D).

Option E (building permit application) is premature unless security is a life safety requirement. Option F (revising CM services) is outside the architect's direct responsibility.
