Free PDF 2026 CCAAK: High Pass-Rate Confluent Certified Administrator for Apache Kafka Reliable Braindumps Pdf

The only way to save yourself from this scenario is by relying on Confluent CCAAK study material. Lead2PassExam equips you with the excellent Confluent CCAAK dumps material to help you clear the Confluent CCAAK real examination on the maiden attempt. One of the leading factors of Lead2PassExam in this industry is offering only top-rated and updated CCAAK Exams practice questions.

Confluent CCAAK Exam Syllabus Topics:

Topic	Details
Topic 1	• Apache Kafka® Fundamentals: This section of the exam measures skills of a Kafka Administrator and covers core concepts such as Kafka architecture, components, and data flow. It assesses the candidate's understanding of topics like topics and partitions, brokers, producers, consumers, and message retention.

Topic 2	• Observability: This section of the exam measures skills of a Site Reliability Engineer and focuses on monitoring Kafka clusters. It assesses knowledge of metrics, logging, and alerting tools, including how to use them to maintain cluster health and performance visibility.
Topic 3	• Apache Kafka® Security: This section of the exam measures skills of a Site Reliability Engineer and focuses on securing Kafka environments. It includes authentication mechanisms such as TLS and SASL, authorization using ACLs, and encrypting data at rest and in transit to ensure secure communication and access control.

Confluent Certified Administrator for Apache Kafka Sample Questions (Q37-Q42):

NEW QUESTION # 37
A customer has a use case for a ksqlDB persistent query. You need to make sure that duplicate messages are not processed and messages are not skipped.
Which property should you use?

- A. processing.guarantee=exactly_once
- B. ksql.fail.on.production.error=false
- C. ksql.streams auto offset.reset=earliest
- D. ksql.streams auto.offset.reset=latest

Answer: A

Explanation:
processing.guarantee=exactly_once ensures that messages are processed exactly once by ksqlDB, preventing both duplicates and message loss.

NEW QUESTION # 38
How does Kafka guarantee message integrity after a message is written on a disk?

- A. Only message metadata can be altered using command line (CLI) tools.
- B. A message can be edited by the producer, producing to the message offset.
- C. A message cannot be altered once it has been written.
  C A message can be grouped with message sharing the same key to improve read performance

Answer: C

Explanation:
Kafka ensures message immutability for data integrity. Once a message is written to a Kafka topic and persisted to disk, it cannot be modified. This immutability guarantees that consumers always receive the original message content, which is critical for auditability, fault tolerance, and data reliability.

NEW QUESTION # 39
How can load balancing of Kafka clients across multiple brokers be accomplished?

- A. Partitions
- B. Replicas
- C. Connectors
- D. Offsets

Answer: A

Explanation:
Partitions are the primary mechanism for achieving load balancing in Kafka. When a topic has multiple partitions, Kafka clients (producers and consumers) can distribute the load across brokers hosting these partitions.

NEW QUESTION # 40

What is the relationship between topics and partitions? (Choose two.)

- A. There is no relationship between topics and partitions.
- B. A partition may have more than one topic.
- C. A topic may have more than one partition.
- D. A topic always has one partition.
- E. A partition is always linked to a single topic.

Answer: C,E

Explanation:
Kafka topics are split into one or more partitions to enable parallelism and scalability.
Each partition belongs to exactly one topic; it cannot span multiple topics.

NEW QUESTION # 41

Why does Kafka use ZooKeeper? (Choose two.)

- A. For controller election
- B. To prevent replication between clusters
- C. To scale the number of brokers in the cluster
- D. To access information about the leaders and partitions

Answer: A,D

Explanation:
ZooKeeper stores metadata such as partition leadership and ISR (in-sync replicas), which brokers use to coordinate.
Kafka uses ZooKeeper to perform leader election for the Controller broker, which manages cluster metadata and leadership changes.

NEW QUESTION # 42

......

If you want to success in your career as a Confluent Certified Professional, you must think outside the box. It would be beneficial if you considered adding Confluent Certified Administrator for Apache Kafka to your resume. To get this certification, you must pass the CCAAK exam conducted by Confluent. Passing the Confluent Certified Administrator for Apache Kafka exam will help you advance your career. It is not an easy task to pass the Confluent Certified Administrator for Apache Kafka certification exam on the first attempt, but now Lead2PassExam is here to help. To assist you with remote study, Lead2PassExam provides Confluent CCAAK Exam Questions to make your test preparation complete. The Confluent CCAAK exam questions simulate the actual exam pattern, allowing you to pass the Confluent Certified Administrator for Apache Kafka certification exam the first time.
