Google Associate-Google-Workspace-Administrator Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Managing Objects: This section of the exam measures the skills of Google Workspace Administrators and covers the management of user accounts, shared drives, calendars, and groups within an organization. It assesses the ability to handle account lifecycles through provisioning and deprovisioning processes, transferring ownership, managing roles, and applying security measures when access needs to be revoked. Candidates must understand how to configure Google Cloud Directory Sync (GCDS) for synchronizing user data, perform audits, and interpret logs. Additionally, it tests knowledge of managing Google Drive permissions, lifecycle management of shared drives, and implementing security best practices. The section also focuses on configuring and troubleshooting Google Calendar and Groups for Business, ensuring proper access control, resource management, and the automation of group-related tasks using APIs and Apps Script.
Topic 2	<ul style="list-style-type: none">Data Access and Authentication: This section of the exam evaluates the capabilities of Security Administrators and focuses on configuring policies that secure organizational data across devices and applications. It includes setting up Chrome and Windows device management, implementing context-aware access, and enabling endpoint verification. The section assesses the ability to configure Gmail Data Loss Prevention (DLP) and Access Control Lists (ACLs) to prevent data leaks and enforce governance policies. Candidates must demonstrate an understanding of configuring secure collaboration settings on Drive, managing client-side encryption, and restricting external sharing. It also covers managing third-party applications by controlling permissions, approving Marketplace add-ons, and deploying apps securely within organizational units. Lastly, this section measures the ability to configure user authentication methods, such as two-step verification, SSO integration, and session controls, ensuring alignment with corporate security standards and compliance requirements.

Topic 3	<ul style="list-style-type: none"> • Configuring Services: This section of the exam evaluates the expertise of IT Systems Engineers and emphasizes configuring Google Workspace services according to corporate policies. It involves assigning permissions, setting up organizational units (OUs), managing application and security settings, and delegating Identity and Access Management (IAM) roles. The section also covers creating data compliance rules, applying Drive labels for data organization, and setting up feature releases such as Rapid or Scheduled Release. Candidates must demonstrate knowledge of security configurations for Google Cloud Marketplace applications and implement content compliance and security integration protocols. Furthermore, it includes configuring Gmail settings such as routing, spam control, email delegation, and archiving to ensure communication security and policy alignment across the organization.
Topic 4	<ul style="list-style-type: none"> • Supporting Business Initiatives: This section of the exam measures the skills of Enterprise Data Managers and covers the use of Google Workspace tools to support legal, reporting, and data management initiatives. It assesses the ability to configure Google Vault for retention rules, legal holds, and audits, ensuring compliance with legal and organizational data policies. The section also involves generating and interpreting user adoption and usage reports, analyzing alerts, monitoring service outages, and using BigQuery to derive actionable insights from activity logs. Furthermore, candidates are evaluated on their proficiency in supporting data import and export tasks, including onboarding and offboarding processes, migrating Gmail data, and exporting Google Workspace content to other platforms.
Topic 5	<ul style="list-style-type: none"> • Troubleshooting: This section of the exam measures the skills of Technical Support Specialists and focuses on identifying, diagnosing, and resolving issues within Google Workspace services. It tests the ability to troubleshoot mail delivery problems, interpret message headers, analyze audit logs, and determine root causes of communication failures. Candidates are expected to collect relevant logs and documentation for support escalation and identify known issues. The section also evaluates knowledge in detecting and mitigating basic email attacks such as phishing, spam, or spoofing, using Gmail security settings and compliance tools. Additionally, it assesses troubleshooting skills for Google Workspace access, performance, and authentication issues across different devices and applications, including Google Meet and Jamboard, while maintaining service continuity and network reliability.

Associate-Google-Workspace-Administrator Reliable Test Testking - 100% Pass Quiz 2026 First-grade Associate-Google-Workspace-Administrator: Latest Braindumps Associate Google Workspace Administrator Book

Our company is trying to satisfy every customer's demand. Of course, we also attach great importance on the quality of our Associate-Google-Workspace-Administrator real test. Every product will undergo a strict inspection process. In addition, there will have random check among different kinds of Associate-Google-Workspace-Administrator Study Materials. The quality of our Associate-Google-Workspace-Administrator exam quiz deserves your trust. Most of our customers are willing to introduce their friends to purchase our Associate-Google-Workspace-Administrator learning dumps.

Google Associate Google Workspace Administrator Sample Questions (Q42-Q47):

NEW QUESTION # 42

The innovation team at your organization has a dedicated room with prototype equipment. You need to make the room bookable, add the equipment, and ensure that there are no booking conflicts. Only the innovation team and the sales directors can access this room. What should you do?

- A. Create a Google Calendar event for the room. Share the event with the innovation team and sales directors.
- B. Create a Google Group for the innovation team and another Google Group for sales directors. Share the room's calendar with both groups.
- C. Edit the Google Calendar settings for the room resource. Adjust the permission settings so only the innovation team and sales director group can view and book time on this calendar.
- D. Create a separate Google Calendar resource for the room. Manually manage booking requests from both teams.

Answer: C

Explanation:

By creating a dedicated Google Calendar resource for the room and adjusting its permission settings, you can ensure that only the innovation team and sales directors have access to book the room. This approach allows for centralized management of room bookings while preventing conflicts, as Google Calendar will automatically handle scheduling and prevent double-bookings.

NEW QUESTION # 43

Your organization acquired a small agency. You need to create user accounts for these new employees. The new users must be able to use their new organization's email address and their email address with the sub-agency domain name. What should you do?

Your organization acquired a small agency. You need to create user accounts for these new employees. The new users must be able to use their new organization's email address and their email address with the sub-agency domain name. What should you do?

- A. Set up the acquired agency as a secondary domain from the Manage domains page.
- B. Redirect the acquired domain to Google's MX records and add the account as a "send as" address.
- C. Set up the acquired agency as a secondary domain and swap it to the primary domain.
- **D. Set up the acquired agency as a user alias domain from the Manage domains page.**

Answer: D

Explanation:

Setting up the acquired agency as a user alias domain allows users to have their new organization's email address while still being able to send and receive emails using their previous email address with the sub-agency domain. This approach efficiently ensures they can use both email addresses without requiring additional configuration for separate accounts.

NEW QUESTION # 44

Your organization is increasingly concerned about its environmental impact. You want to assess the environmental impact of using Google Workspace services. Which report should you use?

- **A. Google Environmental Report**
- B. Accounts report
- C. Carbon footprint report
- D. Apps Monthly Uptime report

Answer: A

Explanation:

To assess the environmental impact of using Google Workspace services, you should refer to the Google Environmental Report. Google publishes comprehensive reports detailing its environmental efforts, including the energy efficiency of its data centers, its use of renewable energy, and its overall carbon footprint, which includes the impact of services like Google Workspace.

Here's why option B is the correct choice and why the others are not relevant to assessing the overall environmental impact of using Google Workspace:

B. Google Environmental Report

Google regularly publishes detailed environmental reports that cover various aspects of its sustainability initiatives, including its progress towards using renewable energy, its efforts to improve energy efficiency in its operations (which power Google Workspace), and its overall carbon footprint. These reports provide insights into the environmental impact associated with using Google services.

Associate Google Workspace Administrator topics guides or documents reference: While there might not be a specific "Google Workspace Environmental Impact Report" as a standalone document within the Admin console, Google's overarching "Environmental Report" (often found on Google's sustainability or environmental responsibility websites) encompasses the infrastructure and practices that support all Google services, including Google Workspace. Administrators looking for this information would be directed to these publicly available Google reports.

A. Carbon footprint report

While the concept of a "carbon footprint report" is relevant to environmental impact, Google typically includes this information within its broader "Environmental Report" rather than providing a separate report specifically for Google Workspace usage within an organization's Admin console. You would likely find data related to the carbon efficiency of Google's infrastructure in their main environmental disclosures.

Associate Google Workspace Administrator topics guides or documents reference: Google's communication about its carbon footprint and environmental efforts is usually consolidated in their public sustainability reports.

C . Apps Monthly Uptime report

The Apps Monthly Uptime report provides information about the reliability and availability of Google Workspace services. It focuses on service performance and uptime metrics, not on environmental impact or sustainability.

Associate Google Workspace Administrator topics guides or documents reference: The Google Workspace Admin Help documentation on service-level agreements (SLAs) and service status provides information about uptime guarantees and how to monitor service availability, which is the focus of the Apps Monthly Uptime report.

D . Accounts report

The Accounts report in the Google Admin console provides details about user accounts within your organization, such as the number of active users, account status, and other user-related information. It does not contain any data or analysis related to the environmental impact of using Google Workspace services.

Associate Google Workspace Administrator topics guides or documents reference: The Google Workspace Admin Help documentation on reporting and user accounts describes the information available in the Accounts report, which is focused on user management and activity metrics.

Therefore, to assess the environmental impact of using Google Workspace services, your organization should refer to the publicly available Google Environmental Report, which details Google's sustainability efforts and overall environmental performance.

NEW QUESTION # 45

Your company's help desk is receiving technical support tickets from employees who report that messages from known external contacts are being sent to the spam label in Gmail. You need to correct the issue and ensure delivery of legitimate emails without introducing additional risk as soon as possible. What should you do?

- A. Create an address list of approved senders so messages from these users bypass Gmail's spam filters and recipients can decide whether they are spam or not.
- **B. Ask employees to select the messages in Gmail that are being delivered to spam and mark them as Not spam.**
- C. Contact the external senders, and tell them to authenticate their sent mail by using domain-based message authentication, reporting, and conformance (DMARC).
- D. Turn off more aggressive spam filtering in spam policies that are applied to the users' organizational unit and add the senders' mail system IP addresses to the email allowlist.

Answer: B

Explanation:

Asking employees to mark legitimate emails as "Not spam" helps train Gmail's spam filter to correctly identify these senders as trusted. This is a quick and effective way to correct the issue without introducing any additional risk or changes to the email filtering settings. Over time, Gmail will learn to recognize these senders as legitimate, reducing the likelihood of their messages being misclassified as spam in the future.

NEW QUESTION # 46

Your company operates several primary care clinics where employees routinely work with protected health information (PHI). You are in the process of transitioning the organization to Google Workspace from a legacy communication and collaboration system. After you sign the Business Associate Agreement (BAA), you need to ensure that data is handled in compliance with regulations when using Google Workspace. What should you do?

- A. Implement a third-party backup service that is also compliant with Google Workspace core services.
- **B. Create a label for Google Drive content to help employees identify sensitive data.**
- C. Disable integrations with third-party apps and turn off non-core Google services.
- D. Instruct the staff to not store any PHI in Google Workspace core services, including Google Drive, Docs, Sheets, and Keep.

Answer: B

Explanation:

To ensure compliance with regulations when handling protected health information (PHI) in Google Workspace, creating labels for sensitive data, such as PHI, helps employees identify and manage this information properly. Labels can be used to mark files that contain sensitive data, providing an additional layer of organization and protection. This approach aligns with regulatory requirements by ensuring that employees can easily distinguish PHI from other data and apply the necessary policies and security measures.

NEW QUESTION # 47

.....

To keep with the fast-pace social life, we make commitment to all of our customers that we provide the fastest delivery services on our Associate-Google-Workspace-Administrator study guide for your time consideration. As most of the people tend to use express delivery to save time, our Associate-Google-Workspace-Administrator Preparation exam will be sent out within 5-10 minutes after purchasing. As long as you pay at our platform, we will deliver the relevant Associate-Google-Workspace-Administrator exam materials to your mailbox within the given time.
