

LEED-Green-Associate Updated CBT | LEED-Green-Associate Guide Torrent

P.S. Free 2026 USGBC LEED-Green-Associate dumps are available on Google Drive shared by TestKingIT:
<https://drive.google.com/open?id=1tLtDAz11NDzfUdc-Ues99X93toauDVAA>

We attach importance to candidates' needs and develop the LEED-Green-Associate useful test files from the perspective of candidates, and we sincerely hope that you can succeed with the help of our practice materials. Our aim is to let customers spend less time to get the maximum return. By choosing our LEED-Green-Associate Study Guide, you only need to spend a total of 20-30 hours to deal with LEED-Green-Associate exam, because our LEED-Green-Associate study guide is highly targeted and compiled according to the syllabus to meet the requirements of the exam.

The price for LEED-Green-Associate study materials is reasonable, no matter you are a student at school or an employee in the company, you can afford it. In addition, LEED-Green-Associate exam dumps are compiled by skilled experts, and therefore the quality can be guaranteed. You can receive the download link and password for LEED-Green-Associate Exam Dumps within ten minutes after payment. If you don't receive, you can contact us, and we will solve that for you. We are pass guarantee and money back guarantee, and if you fail to pass the exam, we will return your money.

LEED-Green-Associate Guide Torrent, LEED-Green-Associate Test Free

Customers of TestKingIT will also receive updates for 1 year after purchase. A lot of students have prepared from the for the LEED Green Associate Exam (LEED-Green-Associate) certification test and passed it in a single try. They have rated the LEED Green Associate Exam (LEED-Green-Associate) as one of the best in the market to prepare for the LEED-Green-Associate exam in minimum time. Try a free demo now and start your journey towards your dream certification!

USGBC LEED-Green-Associate Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> Sustainable Sites: This section of the exam measures the skills of landscape architects and focuses on on-site assessment and design strategies that reduce environmental impact. It includes topics like habitat conservation, rainwater management, and exterior lighting.
Topic 2	<ul style="list-style-type: none"> LEED Process: This section of the exam measures the skills of sustainability consultants and covers the foundational aspects of LEED, including organization fundamentals, the structure of LEED rating systems, and the LEED certification process. It emphasizes understanding the goals and objectives of each credit category and how they contribute to sustainable building practices.

Topic 3	<ul style="list-style-type: none"> • Project Surroundings and Public Outreach: This section of the exam measures the skills of community engagement specialists and covers the environmental impacts of buildings, green building codes, and the values of sustainable design. It also includes regional design considerations and public outreach strategies.
Topic 4	<ul style="list-style-type: none"> • Water Efficiency: This section of the exam measures the skills of water conservation specialists and covers strategies for reducing water usage both indoors and outdoors. It includes the use of gray water and rainwater in irrigation and the implementation of low-flow fixtures.
Topic 5	<ul style="list-style-type: none"> • Indoor Environmental Quality: This section of the exam measures the skills of indoor air quality specialists and covers strategies for improving indoor air quality, lighting, acoustics, and occupant comfort. It emphasizes the use of low-emitting materials and green cleaning practices.
Topic 6	<ul style="list-style-type: none"> • Materials and Resources: This section of the exam measures the skills of sustainable materials specialists and focuses on reuse, life-cycle impacts, waste management, and environmentally preferable purchasing practices. It highlights the importance of material selection in reducing environmental impacts.
Topic 7	<ul style="list-style-type: none"> • Integrative Strategies: This section of the exam measures the skills of project managers and focuses on the integrative process in LEED projects. It includes understanding the roles of various team members and standards that support LEED, such as ASHRAE and ENERGY STAR guidelines. This section highlights the importance of collaboration and systems thinking in achieving sustainable design.

USGBC LEED Green Associate Exam Sample Questions (Q41-Q46):

NEW QUESTION # 41

A nine-story residential building includes 60% of the gross floor area within the project scope, Which rating system is the most appropriate for the LEED certification of this project?

- A. LEED AP Building Design and Construction: Core and Shell Development
- B. LEED AP Building Design and Construction: New Construction and Major Renovation
- C. LEED AP Building Design and Construction: Homes and Multifamily Low-rise
- **D. LEED AP Building Design and Construction: Multifamily Midrise**

Answer: D

Explanation:

LEED BD+C: Multifamily Midrise is the appropriate rating system for residential buildings that are four to eight stories above grade¹. Since the project scope includes 60% of the gross floor area, it meets the minimum program requirement of having at least 40% of the gross floor area certified². The other rating systems are not suitable for this project because they either apply to different building types or heights^{2,3}.

NEW QUESTION # 42

What do the credits in the Materials and Resources category focus on?

- A. Reducing the quantity of materials used on a project
- **B. Minimizing the embodied impacts associated With the entire life-cycle of building materials**
- C. Selecting materials that are more energy efficient than traditional building materials
- D. Helping project teams select materials that have the most environmental benefits at the least cost

Answer: B

Explanation:

The Materials and Resources (MR) category focuses on reducing the environmental, economic, and social impacts of building materials from extraction to disposal^{1,2}. It encourages the use of materials that have lower embodied energy, less waste, more recycled content, and better life-cycle performance^{1,2}.

NEW QUESTION # 43

The result of proper design and operation of buildings and neighborhoods is an increase in energy

- A. consumption
- B. supply
- C. demand
- **D. efficiency**

Answer: D

NEW QUESTION # 44

Flush out process is performed to remove which of the following?

- A. Blackwater
- **B. voc**
- C. Waste
- D. Graywater

Answer: B

Explanation:

Flush out process is performed to remove volatile organic compounds (VOCs) from the indoor air after construction or renovation¹². VOCs are chemicals that can evaporate at room temperature and cause health problems, such as headaches, nausea, and irritation³. Flush out process involves supplying 100% outdoor air to the building for a certain period of time or until a certain amount of air changes are achieved¹².

NEW QUESTION # 45

Which of the following project types and scopes are addressed by LEED rating systems?

- **A. LEED Operations & Maintenance: Schools**
- **B. LEED Interior Design and Construction: Data Centers**
- C. LEED Neighborhood Development: Warehouses and Distribution
- D. LEED Building Design and Construction: Existing Buildings

Answer: A,B

Explanation:

Explanation

LEED rating systems are grouped under five broad categories, according to their construction types¹. Each category has different adaptations for specific project types and scopes. LEED Operations & Maintenance (O+M) addresses existing buildings that are undergoing improvement work or little to no construction². Schools are one of the adaptations under this category³. LEED Interior Design and Construction (ID+C) addresses complete interior fit-out projects². Data Centers are one of the adaptations under this category³. LEED Building Design and Construction (BD+C) addresses new construction or major renovations². Existing Buildings are not an adaptation under this category, but rather under O+M³. LEED Neighborhood Development (ND) addresses new land development projects or redevelopment projects containing residential uses, nonresidential uses, or a mix². Warehouses and Distribution are not an adaptation under this category, but rather under BD+C³.
