## Quiz CLO-002 - CompTIA Cloud Essentials+ Certification Exam –The Best Study Demo

Now on the Internet, a lot of online learning platform management is not standard, some web information may include some viruses, cause far-reaching influence to pay end users and adverse effect. If you purchase our CLO-002 test torrent this issue is impossible.

We hire experienced staff to handle this issue perfectly. We are sure that our products and payment process are surely safe and anti-virus. If you have any question about downloading and using our CLO-002 Study Tool, we have professional staff to remotely handle for you immediately, let users to use the CompTIA Cloud Essentials+ Certification Exam guide torrent in a safe environment, bring more comfortable experience for the user.

## CompTIA Cloud Essentials+ Certification Exam Sample Questions (Q150-Q155):

### NEW QUESTION # 150

Which of the following do business accountants prefer with respect to the cost of cloud computing?

- A. Costs that are related to profits
- B. Costs that are related to number of users
- C. Budgets to be fixed
- D. Costs to be fixed

**Answer: A**

### NEW QUESTION # 151

Which of the following is a differentiating characteristic of private cloud solutions compared to public cloud solutions?

- A. Private cloud solutions save considerably more money than a public cloud solution.
- B. Private cloud solutions are dedicated for use by a single organization.
- C. Private cloud solutions do not provide incremental scalability.
- D. Private cloud solutions are never accessible via the public Internet.

**Answer: B**

### NEW QUESTION # 152

A cloud systems administrator needs to migrate several corporate applications to a public cloud provider and decommission the internal hosting environment. This migration must be completed by the end of the month. Because these applications are internally developed to meet specific business accounting needs, the administrator cannot use an alternative application.

Which of the following BEST describes the approach the administrator should use?

- A. Lift and shift
- B. Hybrid deployment
- C. Phased migration
- D. Rip and replace

**Answer: A**

Explanation:

Lift and shift is a cloud migration strategy that involves moving an application or workload from one environment to another without making significant changes to its architecture, configuration, or code. This approach is suitable for applications that are not cloud-native, have complex dependencies, or have tight deadlines for migration. Lift and shift can help reduce the cost and risk of maintaining legacy infrastructure, improve scalability and availability, and leverage cloud services and features<sup>12</sup>.

Hybrid deployment is a cloud deployment model that involves using both public and private cloud resources to deliver services and applications. This approach is suitable for applications that have varying performance, security, or compliance requirements, or that need to integrate with existing on-premises systems. Hybrid deployment can help optimize the use of resources, increase flexibility and agility, and balance trade-offs between cost and control<sup>34</sup>.

Phased migration is a cloud migration strategy that involves moving an application or workload from one environment to another in stages or increments. This approach is suitable for applications that have modular components, low interdependencies, or high complexity. Phased migration can help reduce the impact of migration on business operations, test the functionality and performance of each component, and address any issues or challenges along the way.

Rip and replace is a cloud migration strategy that involves discarding an application or workload from one environment and replacing it with a new one in another environment. This approach is suitable for applications that are outdated, incompatible, or inefficient, or that have high maintenance costs. Rip and replace can help modernize the application architecture, design, and code, improve the user experience and functionality, and take advantage of cloud-native features and services .

**NEW QUESTION # 153**

A business analysis team is reviewing a report to try to determine the costs for a cloud application. The report does not allow separating costs by application.

Which of the following should the team use to BEST report on the costs of the specific cloud application?

- A. Right-sizing
- B. **Resource tagging**
- C. Content management
- D. Optimization

**Answer: B**

**NEW QUESTION # 154**

A company's finance department wants to be able to view the consumption of cloud resources so it can prepare weekly reports for the Chief Financial Officer (CFO). Which of the following company policies should best be referenced to gain the CFO's approval for this request?

- A. **Access and control**
- B. Communication
- C. Change management
- D. Department-specific

**Answer: A**

Explanation:

The Access and control policy defines who has permission to access specific resources and data within the company. In this case, it would govern how the finance department can access the cloud resource consumption data to prepare reports for the CFO. The policy should ensure that the finance team has the necessary permissions while maintaining appropriate security and access controls.

**NEW QUESTION # 155**

.....
