

信頼できるCAD最新対策問題は最も早い方法で Certified Application Developer-ServiceNowに合格する

BONUS!!! Pass4Test CADダンプの一部を無料でダウンロード: https://drive.google.com/open?id=1OyP_a0ohK43158wpEkPrxJoPHjvyPkL

Pass4Testさまざまな試験（CAD試験など）の準備中に生産性を上げるのに無力だと感じたとき。散発的な時間を最大限に活用し、先延ばしを避けることが困難な場合。これらの煩わしさを解決し、より効率的かつ生産的な方法でCAD証明書を取得するのに役立つCADテスト準備の重要性を認識する時が来ました。ServiceNowのCAD試験の質問で20〜30時間学習する限り、CAD試験を確実にCertified Application Developer-ServiceNow受験して合格することができます。

ServiceNow CAD認定を取得することで、開発者に多数のキャリア機会が開かれることがあります。これは、多くの企業や組織に認められている高く評価される認定資格であり、高い給与や良好な就職先をもたらすことができます。さらに、IT業界では、開発者の持続的な学習と専門的な成長に対する取り組みを示すことが高く評価されているため、そのような成果を証明することができます。

CAD認定プログラムは、CAD FoundationレベルとCAD Professionalレベルの2つのレベルに分かれています。Foundationレベルは、ServiceNowに新しいITプロフェッショナル向けに設計され、プラットフォームとその機能について紹介します。Professionalレベルは、より経験豊富な開発者を対象に、より複雑なアプリケーションを構築し、他のシステムと統合することを目的としています。

ServiceNow CAD認定試験に備えるためには、オブジェクト指向プログラミング、データ構造、アルゴリズムなどのソフトウェア開発の原則をしっかりと理解する必要があります。また、ServiceNow Studio、ServiceNow Developer Portal、およびServiceNow APIなどのServiceNowの開発ツールについても良い理解を持っている必要があります。ServiceNowは、オンラインコース、インストラクター主導のトレーニング、練習試験など、試験に備えるためのさまざまなトレーニングリソースとコースを提供しています。

ServiceNow Certified Application Developer-ServiceNow 認定 CAD 試験問

題 (Q101-Q106):

質問 # 101

What is the ServiceNow store?

- A. The source for ServiceNow Community created developer content
- B. Alternate name for the ServiceNow Developer Share site
- C. Downloadable content ServiceNow script archive
- **D. Marketplace for free and paid certified ServiceNow applications and integrations**

正解: D

解説:

The ServiceNow Store is a marketplace for free and paid certified ServiceNow applications and integrations.

The ServiceNow Store provides customers with access to Now Certified enterprise workflow apps from partners that complement and extend ServiceNow products and solutions. Customers can browse, try, buy, and deploy apps and integrations that suit their needs and enhance their ServiceNow experience. The ServiceNow Store is not the source for ServiceNow Community created developer content, as that is available on the Developer Portal or the Share site. The ServiceNow Store is not a downloadable content ServiceNow script archive, as that is available on the Script Library or the Script Repository. The ServiceNow Store is not an alternate name for the ServiceNow Developer Share site, as that is a separate site where developers can share applications, code snippets, UI pages, etc. Reference: ServiceNow Store

質問 # 102

To see what scripts, reports, and other application artifacts will be in a published application:

- **A. Examine the Application Files Related List in the application to be published**
- B. Enter the name of the Application in the Global search field
- C. Open the list of Update Sets for the instance
- D. Open the artifact records individually to verify the value in the Application field

正解: A

解説:

To see what scripts, reports, and other application artifacts will be in a published application, the best option is to examine the Application Files Related List in the application to be published. This will show all the application files that belong to the application, grouped by file type and scope. You can also filter, sort, or search the list to find specific files.

The following options are not the best ways to see what application artifacts will be in a published application:

* Enter the name of the Application in the Global search field. This will perform a global text search on the instance and return any records that match the application name, which may include irrelevant or incomplete results.

* Open the list of Update Sets for the instance. This will show all the update sets that have been created or imported on the instance, but not necessarily the ones that belong to the application to be published.

Update sets are used to move customizations between instances, not to publish applications to the ServiceNow Store or Share.

* Open the artifact records individually to verify the value in the Application field. This will require opening each record that may be part of the application and checking the Application field, which is tedious and error-prone. References: Publish an Application, Application Files

質問 # 103

When creating new application files in a scoped application, cross scope access is turned on by default in which of the following?

- A. Workflow
- B. REST messages
- **C. Table**
- D. Script Include

正解: C

解説:

Explanation/Reference: <https://docs.servicenow.com/bundle/orlando-application-development/page/build/applications/task/set-RCA-level.html>

質問 # 104

Which script types execute on the server? (Choose three.)

- A. Business Rule
- B. Scheduled Jobs
- C. Script Actions
- D. UI Policies
- E. Client Scripts

正解: A、B、C

解説:

https://docs.servicenow.com/bundle/tokyo-application-development/page/script/server-scripting/concept/c_Serve

質問 # 105

Which one of the following is true for a Script Include with a Protection Policy value of Protected?

- A. The Protection Policy is applied only if the glide.app.apply_protection system property value is true
- B. The Protection Policy is applied only if the application is downloaded from the ServiceNow App Store
- C. The Protection policy option can only be enabled by a user with the admin role
- D. Any user with the protected_edit role can see and edit the Script Include

正解: B

解説:

https://docs.servicenow.com/bundle/rome-application-development/page/build/applications/concept/c_ScriptProt The following is true for a Script Include with a Protection Policy value of Protected:

* The Protection Policy is applied only if the application is downloaded from the ServiceNow App Store.

This is true because the Protection Policy is a feature that allows developers to protect their Script

* Includes from being viewed or modified by other users when they distribute their applications through the ServiceNow App Store. The Protection Policy is only enforced when the application is installed from the App Store, not when it is developed or tested on the instance.

The following are not true for a Script Include with a Protection Policy value of Protected:

* Any user with the protected_edit role can see and edit the Script Include. This is false because the protected_edit role is not related to the Protection Policy, but to the Access Control (ACL) rules. The protected_edit role allows users to edit protected fields on a table, such as the script field on the sys_script table, which stores the Business Rules. The Protection Policy does not use roles to control access to the Script Includes, but a cryptographic key that is generated when the application is published to the App Store.

* The Protection policy option can only be enabled by a user with the admin role. This is false because the Protection policy option can be enabled by any user who has the application_admin role for the scoped application that contains the Script Include. The application_admin role grants full access to the application development and administration within the scope of the application.

* The Protection Policy is applied only if the glide.app.apply_protection system property value is true.

This is false because the glide.app.apply_protection system property is not related to the Protection Policy, but to the Application Restricted Caller Access (ARCA) feature. The ARCA feature allows developers to restrict the access to the Script Includes from other applications based on the caller's scope. The glide.app.apply_protection system property determines whether the ARCA feature is enabled or disabled on the instance. References: Script Includes, Protect Script Includes, Application Restricted Caller Access
