### NEW QUESTION # 53

You want to perform carrier selection for a freight order created in SAP S/4HANA Supply Chain for transportation management. Which of the following can you use as decision criteria? Note: There are 2 correct answers to this question.

- A. Priority from transportation lane
- B. Priority from carrier selection settings
- C. Costs from charge management
- D. Costs from shipment cost document

**Answer: A,B**

Explanation:

In SAP S/4HANA Transportation Management, carrier selection for a freight order is based on specific decision criteria defined in the system. According to the SAP documentation:

\* Priority from transportation lane (B): Transportation lanes define carrier priorities (e.g., ranking carriers based on preference or agreements), which are used as a criterion during carrier selection.

\* Priority from carrier selection settings (C): Carrier selection settings in the planning profile or SAP Fiori app allow users to define priorities for carriers, influencing the selection process.

The other options are incorrect:

\* Costs from charge management (A): While costs are considered, they are derived from freight agreements or rate tables, not directly from charge management during carrier selection.

\* Costs from shipment cost document (D): Shipment cost documents are used in SAP ERP (LE-TRA), not in SAP S/4HANA TM, where freight settlement documents are used instead.
