- A. Check the Time Based Workflow Log
- B. Check the standard Debug Logs
- C. Add a new monitored user and check the Debug Logs

- D. Check the standard Workflow logs

**Answer: C**

#### NEW QUESTION # 12

Ursa Major Solar offers customers annual service contracts. Account owners should receive an email renewal reminder 1 month before their customer's planned expiration date. The administrator builds a flow to automate the process, which runs when a record is created, and tests several possible scenarios.

What will occur if the expiration date is changed from January 1 of the next year to yesterday?

- **A. The flow is unable to run and a flow error message is sent to the user who initiates the flow.**
- B. The resume event is recalculated and the email goes out to the account owner immediately.
- C. The Interview resumes 1 month before the original expiration date and will send the email at that time.
- D. The Interview is rescheduled based on the expiration date and sends the email on the last day of the current month.

**Answer: A**

#### NEW QUESTION # 13

A new administrator at Cloud Kicks has reported that they are unable to use outbound change sets as requested.

What permission should be reviewed to determine if it is missing from the administrator user or profile?

- **A. Create and Upload Change Sets**
- B. API Enabled
- C. Deploy Change Sets
- D. Modify Metadata Through Metadata API Functions

**Answer: A**

Explanation:

To use outbound change sets, a user needs to have the Create and Upload Change Sets permission on their profile or permission set. This permission allows users to create change sets in a sandbox or Developer Edition organization and upload them to another organization.
