Pegasystems PEGACPRSA22V1 Reliable Braindumps Questions, Reliable PEGACPRSA22V1 Test Notes

We hope this article has given you a good overview of the Pegasystems PEGACPRSA22V1 Exam and what you can expect from it. As always, we recommend you start preparing for your exam as early as possible to give yourself the best chance of success. Test4Cram offers a wide range of study materials and resources to help you prepare, including practice questions, dumps, and a study guide.

Pegasystems PEGACPRSA22V1 (Certified Pega Robotics System Architect 22) Certification Exam is a globally recognized certification for professionals who specialize in the Pega Robotic Automation System. The Pega Robotic Automation System is a platform that allows businesses to automate their processes and workflows, making them more efficient and effective. Certified Pega Robotics System Architect 22 certification exam tests the candidate's ability to design, develop, and deploy Pega Robotics solutions using the latest tools and technologies.

Pegasystems Certified Pega Robotics System Architect 22 Sample Questions (Q39-Q44):

NEW QUESTION # 39

In which two ways do the two publishers, Log4Net and File Publisher, differ? (Choose two.)

- A. Log4Net can provide a minimum number of log files to retain.
- B. Log4Net can change the directory location of the log file.
- C. Log4Net can append new data to the log file.
- D. Log4Net can set the log file size.

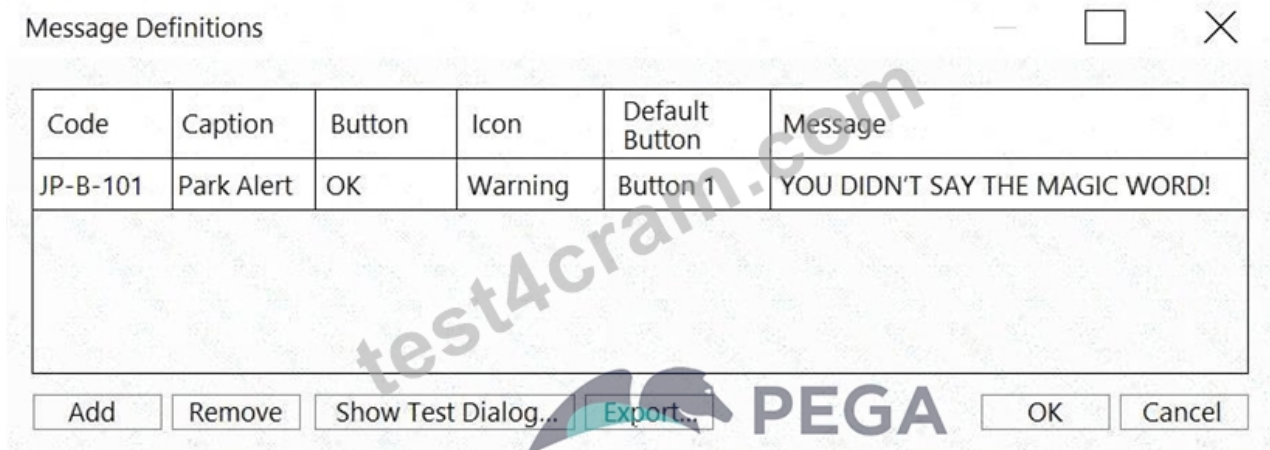

Answer: A,D

Explanation:

References:

NEW QUESTION # 40

The following image shows a Message Definitions configuration.

Which option is the correct representation of the message configuration settings?

A

B

- A. Exhibit B
- B. Exhibit D
- C. Exhibit A
- D. Exhibit C

Answer: A

NEW QUESTION # 41

Which two of the following Tool Windows are used in Pega Robot Studio? (Choose two.)

- A. Menu toolbar
- B. Designer windows
- C. Solution Explorer
- D. Object Explorer

Answer: A,B

NEW QUESTION # 42

Which two of the following statements describe robotic automation assets? (Choose Two)

- A. The assets streamline the development process across an enterprise.
- B. The assets are customizable for robotic projects after developers download them into a robotic project.
- C. The assets increase the upload and download time for the developer who uses Pega Robot Studio.
- D. The assets ensure consistency of development across an enterprise and robotic projects.

Answer: A,D

Explanation:

Comprehensive and Detailed Explanation From Pega Robotics System Exact Extract:

According to the Pega Robotic Automation Asset Management and Studio Guide:

"Robotic automation assets are reusable components—such as automations, global scripts, adapters, and configuration items—that are shared across multiple robotic projects. Assets enable organizations to maintain consistency and streamline project development."

The documentation elaborates:

* "Assets streamline the development process across the enterprise by reducing duplication of work."

* "Shared automation assets ensure consistency of development, coding standards, and project structure across teams and projects."

* "Assets are version-controlled and centrally stored in the Pega Robot Manager or Deployment Portal for reuse." It also clarifies that assets are not customizable after download because they are version-controlled and used as read-only components, ensuring enterprise-wide standardization.

Therefore:

- * Option A - True (Assets streamline enterprise development).
- * Option C - True (Assets ensure consistency across projects).
- * Option B - Incorrect (Assets are not designed for post-download modification).
- * Option D - Incorrect (Assets reduce development time, not increase it).

References (Exact Extract Source):

- * Pega Robotics Studio User Guide - Robotic Automation Assets and Asset Management
- * Pega Academy - Robotics System Architect Certification Course (Asset Sharing and Reusability)
- * Pega Robot Manager - Asset Lifecycle and Governance Overview

Final Verified answer: A, C

NEW QUESTION # 43

You have extracted a proxy for a data set and are using it to pass the data into a procedure automation input parameter. In the procedure automation, the data link from the input parameter is not connecting to the stringValue on a stringUtils method.

What two troubleshooting steps do you perform to correct the issue? (Choose two.)

- A. Confirm the proxy data in a messageDialog.
- B. Confirm the data type on the procedure automation input parameter.
- C. Confirm the proxy's data type matches with the stringUtils method.
- D. Confirm the stringUtils method works.

Answer: A,B

NEW QUESTION # 44
