Salesforce Analytics-Con-301 Zertifizierungsprüfung ist heute sehr populär. Wollen Sie an der Analytics-Con-301 Prüfung teilnehmen? Tatsächlich ist diese Prüfung sehr schwierig. Aber es bedeutet nicht, diese Prüfung mit guter Note sehr leicht zu bestehen. So, wissen Sie den kürzesten Weg zum Erfolg? Das ist natürlich die Analytics-Con-301 Dumps von ITZert.

ITZert Website ist voll mit Ressourcen und den Fragen der Salesforce Analytics-Con-301 Prüfung ausgestattet. Es umfasst auch den Salesforce Analytics-Con-301 Praxis-Test und Prüfungsspeicherung. Sie wird den Kandidaten helfen, sich gut auf die Prüfung vorzubereiten und die Prüfung zu bestehen, was Ihnen viel Angenehmlichkeiten bietet. Sie können die Demo zur Salesforce Analytics-Con-301 Prüfung teilweise als Probe herunterladen. ITZert bietet eine echte und umfassende Prüfungsfragen und Antworten. Mit unserer exklusiven Online Salesforce Analytics-Con-301 Prüfungsschulungsunterlagen werden Sie leicht das Salesforce Analytics-Con-301 Exam bestehen. Unsere Website gewährleistet Ihnen eine 100%-Pass-Garantie.

## **Analytics-Con-301 Prüfungsunterlagen - Analytics-Con-301 Buch**

Aus der Perspektive der Prüfung ist es notwendig, Ihnen die Prüfungstechnik zu lehren. Sie sollen weise wählen und keine Chance verpassen. ITZert ist eine großartige Website, die gute Schulungsressourcen bietet, die Prüfungs- und Untersuchungsmaterialien und ausführliche Fragen und Antworten enthalten. Die Prüfungswebsites nehmen in den letzten Jahren rasch zu. Das ist vielleicht der Grund, wieso Sie so verwirrt gegenüber der Salesforce Analytics-Con-301 Zertifizierungsprüfung sind. Die Schulungsunterlagen zur Salesforce Analytics-Con-301 Zertifizierungsprüfung von ITZert werden von einigen Fachleuten und vielen Kandidaten bewiesen, dass sie effizient sind. Sie können Ihnen helfen, die Salesforce Analytics-Con-301 Zertifizierungsprüfung zu bestehen.

## **Salesforce Certified Tableau Consultant Analytics-Con-301 Prüfungsfragen mit Lösungen (Q85-Q90):**

### **85. Frage**

A Tableau Server customer is interested in measuring content and platform usage. Which two features should the consultant use? Choose two.

- A. Tableau Pulse
- **B. Tableau Server repository**
- C. Server Status page
- **D. Admin Insights page**

**Antwort: B,D**

Begründung:

Comprehensive and Detailed Explanation From Exact Extract:

Two Tableau Server features provide usage and adoption insights:

Tableau Server Repository

\* Stores all metadata about:

\* Workbooks

\* Data sources

\* User activity

\* View traffic

\* Can be queried directly for content usage and platform metrics.

Admin Insights Page

\* Built-in dashboards showing:

\* User activity

\* Content usage

\* Data source usage

\* Performance metrics

\* Designed specifically for monitoring platform adoption.

These two together give complete content and usage visibility.

Why A and D are incorrect:

A). Tableau Pulse

\* Available only in Tableau Cloud, not Tableau Server.

\* Focuses on personalized metric insights, not platform reporting.

D). Server Status Page

\* Shows node health and process status, not content usage or adoption analytics.

Thus, correct answers are B and C.

\* Tableau Server auditing and usage documentation describing repository tables.

\* Admin Insights documentation describing built-in content and user monitoring.

## 86. Frage

A university has data on its undergraduate students and their majors by grade level (Freshman, Sophomore, Junior, Senior). The university is interested in visualizing the path students take as they change majors across grade levels.

Which visualization type should the consultant recommend?

- A. Radar Chart
- B. Tree Chart
- C. Chord Chart
- **D. Sankey Diagram**

**Antwort: D**

Begründung:

To visualize the path students take as they change majors across different grade levels, a Sankey Diagram is highly effective. This type of visualization illustrates the flow and quantity between different stages or categories:

Sankey Diagram: It allows for a visual representation of students' movements between majors over time. Each flow's thickness is proportional to the number of students moving from one major to another, giving a clear, immediate visual cue of major popularity and student migration patterns.

To create a Sankey Diagram in Tableau, you typically need to prepare the data specifically for this type of chart. The data must include source (starting major), target (ending major), and the value (number of students). It often requires custom calculations and data reshaping to get the data in a format that a Sankey can use.

Once the data is prepared, you can use a combination of calculated fields, path binning, and line charts to simulate the flow effect in Tableau. External plugins or web-based integrations might also be employed for more direct implementations.

References

Sankey Diagrams are not natively supported in Tableau but can be implemented through creative use of data preparation and calculations, as suggested in advanced Tableau user communities and demonstrated in various Tableau public galleries.

## 87. Frage

A client wants to see data for only the last day in a dataset and the last day is always yesterday. The date is represented with the field Ship Date.

The client is not concerned about the daily refresh results. The volume of data is so large that performance is their priority. In the

future, the client will be able to move the calculation to the underlying database, but not at this time.

The solution should offer the best performance.

Which approach should the consultant use to produce the desired results?

- A. Filter MONTH/DAY/YEAR on [Ship Date] field and use an option to filter to the latest date value when the workbook opens.
- B. Filter on calculation [Ship Date]={MAX([Ship Date])}.
- C. Filter on Ship Date field using the Yesterday option.
- **D. Filter on calculation [Ship Date]=TODAY()-1.**

**Antwort: D**

Begründung:

The best approach to ensure performance while providing data for only the last day (yesterday) in the dataset is to use a calculated field that filters the data to include only yesterday's date:

Filter on calculation [Ship Date]=TODAY()-1: This calculated field dynamically computes yesterday's date by subtracting one day from today's date. This approach ensures that each day, only the data for the previous day is loaded, which keeps the volume of data minimal and improves performance.

Dynamic Date Calculation: The use of TODAY()-1 ensures the filter remains up-to-date with the changing dates, without the need for manual updates, providing accuracy and timeliness in the dashboard.

This approach is efficient because it avoids the overhead of processing the entire dataset and focuses only on the relevant day's data. It also aligns with Tableau's capabilities for creating dynamic filters using date functions, as highlighted in the Tableau help documentation on date calculations and filters.

References

This solution utilizes Tableau's built-in date functions and dynamic calculations to optimize performance, as recommended in Tableau's performance optimization resources and date calculation guidelines.

### 88. Frage

A client has many published data sources in Tableau Server. The data sources use the same databases and tables. The client notices different departments give different answers to the same business questions, and the departments cannot trust the data. The client wants to know what causes data sources to return different data.

Which tool should the client use to identify this issue?

- **A. Tableau Catalog**
- B. Tableau Prep Conductor
- C. Ask Data
- D. Tableau Resource Monitoring Tool

**Antwort: A**

Begründung:

The Tableau Catalog is part of the Tableau Data Management Add-on and is designed to help users understand the data they are using within Tableau. It provides a comprehensive view of all the data assets in Tableau Server or Tableau Online, including databases, tables, and fields. It can help identify issues such as data quality, data lineage, and impact analysis. In this case, where different departments are getting different answers to the same business questions, the Tableau Catalog can be used to track down inconsistencies and ensure that everyone is working from the same, reliable data source.

References: The recommendation for using Tableau Catalog is based on its features that support data discovery, quality, and governance, which are essential for resolving data inconsistencies across different departments<sup>12</sup>.

When different departments report different answers to the same business questions using the same databases and tables, the issue often lies in how data is being accessed and interpreted differently across departments.

Tableau Catalog, a part of Tableau Data Management, can be used to solve this problem:

Visibility: Tableau Catalog gives visibility into the data used in Tableau, showing users where data comes from, where it's used, and who's using it.

Consistency and Trust: It helps ensure consistency and trust in data by providing detailed metadata management that can highlight discrepancies in data usage or interpretation.

Usage Metrics and Lineage: It offers tools for tracking usage metrics and understanding data lineage, which can help in identifying why different departments might see different results from the same underlying data.

References:

Tableau Catalog Usage: The Catalog is instrumental in providing a detailed view of the data environment, allowing organizations to audit, track, and understand data discrepancies across different users and departments.

### 89. Frage

A consultant used Tableau Data Catalog to determine which workbooks will be affected by a field change.

Catalog shows:

- \* Published Data Source # 7 connected workbooks
- \* Field search (Lineage tab) # 6 impacted workbooks

The client asks: Why 7 connected, but only 6 impacted?

- A. The seventh workbook is connected via Custom SQL so it didn't appear in the list.
- **B. The field being altered is not used in the seventh workbook.**
- C. The field is used twice in a single workbook.
- D. The consultant lacked sufficient permissions to see the seventh workbook.

### Antwort: B

Begründung:

Comprehensive and Detailed Explanation From Exact Extract:

Key Tableau Catalog behaviors:

- \* Connected workbooks = any workbook linked to the published data source.
- \* Impacted workbooks = only workbooks that use the specific field.
- \* If a workbook connects to the data source but never uses the field, it appears as "connected" but not impacted.

This explains EXACTLY why:

- \* 7 workbooks are connected
- \* Only 6 use the changed field
- \* Therefore only 6 are impacted

This matches Option C.

Why the other options are incorrect:

A). Field used twice

Still counts as one workbook - does not explain discrepancy.

B). Permission issue

If permissions blocked visibility, the data source would not list 7 connections.

D). Custom SQL use

Catalog can still detect field usage through metadata lineage; Custom SQL does NOT hide workbook dependency.

Thus, only Option C logically explains the scenario.

- \* Data Catalog lineage rules: "Connected vs. Impacted" distinction.
- \* Field-level impact analysis documentation.
- \* Workbook dependency logic within Tableau Catalog.

### 90. Frage

.....

Mit der Entwicklung der Gesellschaft ist IT-Industrie von vielen Leuten beliebt. Und es gibt immer Leute, die Salesforce Analytics-Con-301 IT-Zertifizierungen besitzen wollen und Fortschritte in ihrer Karriere machen. In diesem Fall sollen Sie an ITZert denken. Und das ist Ihr gute Helfer. Die starke Salesforce Analytics-Con-301 Dumps von ITZert sind die Folgen und die Erfahrung von reichen IT-Eliten. Sie können leichter Erfolg machen, wenn Sie ihre Erfahrungen bekommen.
