All these formats play a vital role in your CrowdStrike CCFA-200b exam preparation process.

CrowdStrike Falcon Administrator Sample Questions (Q89-Q94):

NEW QUESTION # 89
What best describes what happens to detections in the console after clicking "Enable Detections" for a host which previously had its detections disabled?

- A. New detections will start appearing in the console, and all retroactive stored detections will be restored to the console for that host
- B. New detections will start appearing in the console immediately. Previous detections will not be restored to the console for that host
- C. Enables custom detections for the host
- D. Preventions will be enabled for the host

Answer: B

Explanation:
The option that best describes what happens to detections in the console after clicking "Enable Detections" for a host which previously had its detections disabled is that new detections will start appearing in the console immediately. Previous detections will not be restored to the console for that host. The "Enable Detections" feature allows you to enable or disable the detection and prevention capabilities of the Falcon sensor on a specific host. When you disable detections for a host, the sensor will stop sending any detection or prevention events to the Falcon console, and any existing events for that host will be removed from the console. When you enable detections for a host, the sensor will resume sending any new detection or prevention events to the Falcon console, but any previous events for that host will not be restored to the console.

NEW QUESTION # 90
A sensor that has not contacted the Falcon cloud will be automatically deleted from the hosts list after how many days?

- A. 30 Days
- B. 90 Days
- C. 60 Days
- D. 45 Days

Answer: B

Explanation:
A sensor that has not contacted the Falcon cloud will be automatically deleted from the hosts list after 90 days. A sensor that has not contacted the Falcon cloud for more than seven days is considered inactive and will be moved from the Host Management page to the Trash page. An inactive sensor will remain in the Trash page for 90 days before being permanently deleted from the Falcon platform. You can restore an inactive sensor from the Trash page if it contacts the Falcon cloud again within 90 days.

NEW QUESTION # 91
You need to create a rule to block all process executions of Telegram in your environment.
Which custom IOA rule configuration would accomplish this?

- A. Custom IOA rule configuration cannot block non-malicious binaries from executing
- B. Custom IOA rule set to Detect on an Image Filename of .*Telegram.*
- C. Custom IOA rule set to Monitor on an Image Filename of .*Telegram.*
- D. Custom IOA rule set to Block Execution on an Image Filename of .*Telegram.*

Answer: D

NEW QUESTION # 92
Which Real Time Response role will allow you to see all analyst session details?

- A. Real Time Response - Read-Only Analyst
- B. Real Time Response -Administrator
- C. Real Time Response -Active Responder
- D. None of the Real Time Response roles allows this

Answer: B

Explanation:
The Real Time Response role that will allow you to see all analyst session details is Real Time Response -Administrator. A Real Time Response -Administrator is a role that has full access and control over the Real Time Response feature in Falcon, which allows you to remotely access and investigate hosts in real time. A Real Time Response -Administrator can view all analyst session details, such as session ID, host name, start and end time, commands executed, and output received. A Real Time Response -Administrator can also create, modify, delete, and assign scripts and commands to other analysts.

NEW QUESTION # 93
When performing targeted filtering for a host on the Host Management Page, which filter bar attribute is NOT case-sensitive?

- A. Domain
- B. Model
- C. Username
- D. Hostname

Answer: D

Explanation:
When performing targeted filtering for a host on the Host Management Page, the filter bar attribute that is not case-sensitive is Hostname. The Hostname attribute allows you to filter hosts by their computer name or DNS name. The Hostname filter is not case-sensitive, meaning that it will match hosts regardless of the capitalization of their names. For example, filtering by hostname=DESKTOP- 1234 will match hosts with names such as DESKTOP-1234, desktop-
1234, or Desktop-12342.

NEW QUESTION # 94
......
