If you lack confidence for your exam, you can strengthen your confidence for your exam through using C-S4TM-2023 exam torrent of us. C-S4TM-2023 Soft test engine can simulate the real exam environment, so that you can know the procedure for the exam, and your confidence for the exam can also be built up. What's more, C-S4TM-2023 Exam Braindumps are famous for instant access to download, and you can receive downloading link and password within ten minutes, so you start the training right now. You can enjoy free update for 365 days for C-S4TM-2023 test materials after payment, and the update version will be sent to you automatically.

SAP Certified Associate - SAP S/4HANA Cloud Private Edition - Transportation Management Sample Questions (Q73-Q78):

NEW QUESTION # 73
Which of the following characteristics describe transportation zones? Note: There are 2 correct answers to this question.

- A. Transportation zones increase the effort needed to model the network.
- B. Transportation zones are physical locations.
- C. Transportation zones transfer their properties to their locations.
- D. Transportation zones are used to group locations.

Answer: C,D

Explanation:
In SAP S/4HANA Transportation Management, transportation zones are used to organize the transportation network. According to the SAP documentation:
* Transportation zones transfer their properties to their locations (A): Zones define attributes (e.g., geographical or organizational properties) that are inherited by the locations within them, simplifying configuration.
* Transportation zones are used to group locations (D): Zones group multiple locations (e.g., warehouses, plants) to streamline planning and routing in the transportation network.
The other options are incorrect:
* Transportation zones are physical locations (B) is incorrect; zones are logical groupings, not physical sites.
* Transportation zones increase the effort needed to model the network (C) is incorrect; zones reduce modeling effort by grouping locations.

SAP S/4HANA Cloud Private Edition, Transportation Management Study Guide: Unit 7 - Master Data, Section on Transportation Zones.
SAP Help Portal: Transportation Management - Transportation Zone Management ().

NEW QUESTION # 74
You have implemented a side-by-side scenario of SAP Transportation Management and SAP S/4HANA.
Which of the following statements apply to the organizational units in SAP Transportation Management?
Note: There are 2 correct answers to this question.

- A. Organizational units can be maintained independently of organizational units in SAP S/4HANA

- B. Organizational units can be determined automatically based on conditions
- C. The hierarchical relationship of organizational units is not fixed
- D. Organizational units are not mandatory

Answer: A,B

NEW QUESTION # 75
Which of the following configuration settings can be used to automatically assign business partners?
Note: There are 2 correct answers to this question.

- A. Freight unit type
- B. Partner function
- C. Business function
- D. Freight order type

Answer: B,D

Explanation:
Master Data

NEW QUESTION # 76
What functionality is available with Basic Shipping in SAP S/4HANA Supply Chain for transportation management? Note: There are 3 correct answers to this question.

- A. Transportation Planning based on forwarding orders
- B. Transportation Planning based on inbound deliveries
- C. Transportation Planning based on outbound deliveries
- D. Transportation execution without event management
- E. Transportation Planning based on sales orders

Answer: B,C,D

Explanation:
Transportation Management Overview and Fundamentals

NEW QUESTION # 77
Based on your company policy, the hazardous product POISON should NOT be transported on means of transport TRUCK unless authorized by user A. How can you maintain the system reaction in the corresponding incompatibility definition used by user A? Note: There are 2 correct answers to this question.

- A. Automatic Violation: Incompatibility Must Not Be Violated; Manual Violation: Incompatibility is Ignored
- B. Automatic Violation: Incompatibility Is Ignored; Manual Violation: Warning If Incompatibility Is Violated
- C. Automatic Violation: Incompatibility Must Not Be Violated; Manual Violation: Incompatibility Must Not Be Violated
- D. Automatic Violation: Incompatibility Must Not Be Violated; Manual Violation: Warning If Incompatibility Is Violated

Answer: A,D

Explanation:
In SAP S/4HANA Transportation Management, incompatibilities can be defined with different system reactions for automatic and manual planning to enforce restrictions, such as preventing the hazardous product POISON from being transported on a TRUCK unless authorized by user A. According to the SAP documentation:
* Automatic Violation: Incompatibility Must Not Be Violated; Manual Violation: Incompatibility is Ignored (B): This setting ensures that automatic planning strictly enforces the incompatibility (no POISON on TRUCK), but user A can manually override it during planning, allowing flexibility for authorized users.
* Automatic Violation: Incompatibility Must Not Be Violated; Manual Violation: Warning If Incompatibility Is Violated (C): This setting also enforces the incompatibility in automatic planning but issues a warning during manual planning, allowing user A to proceed with authorization while being alerted to the violation.
The other options are incorrect:

* Ais too restrictive, as it prevents both automatic and manual violations, not allowing user A to authorize the transport.
* Dis too permissive, as it ignores the incompatibility in automatic planning, which violates the company policy.
