Composite Test Trend Deep-Security-Professional Price & Sample Deep-Security-Professional Test Online

Our users are all over the world and they have completed their exams through the help of our Deep-Security-Professional study guide. As you can see the feedbacks from our loyal customers, all of them are grateful to our Deep-Security-Professional exam braindumps and become successful people with the Deep-Security-Professional Certification. And what are you waiting for? Just selecting our Deep-Security-Professional learning materials, the next one to get an international certificate is you!

Trend Deep-Security-Professional Certification Exam is an industry-recognized certification that validates your skills and knowledge in deploying and managing Trend Micro Deep Security solutions. Trend Micro Certified Professional for Deep Security certification is designed for security professionals who are responsible for managing and securing their organization's cloud workloads, virtual and physical servers, and containers. Trend Micro Certified Professional for Deep Security certification exam covers various topics, including security policies, intrusion prevention, anti-malware, firewall, web reputation, and integrity monitoring.

Trend Micro Certified Professional for Deep Security Sample Questions (Q19-Q24):

NEW QUESTION # 19

What is the effect of the Firewall rule displayed in the following exhibit?

- A. This rule will allow TCP and UDP replies to requests originating on this server.

- B. This rule will allow outgoing TCP and UDP communication from this server.
- C. This rule will allow incoming communication to this server, but not TCP and UDP.
- D. This rule will allow incoming TCP and UDP communication to this server.

Answer: D

NEW QUESTION # 20

Which of the following statements correctly identifies the purpose of the Integrity Monitoring Protection Module?

- A. The Integrity Monitoring Protection Module monitors and analyzes the integrity of application logs to identify tampering, corruption and other suspicious modifications to the logs.
- B. The Integrity Monitoring Protection Module monitors traffic to verify the integrity of incoming traffic to identify protocol deviations, packets fragments and other protocol anomalies.
- C. The Integrity Monitoring Protection Module monitors critical operating system objects such as services, processes, registry keys and ports to detect and report malicious or unexpected changes.
- D. The Integrity Monitoring Protection Module monitors incoming traffic to confirm the integrity of header information including packet source and destination details.

Answer: C

Explanation:

The Integrity Monitoring module is designed to watch over key OS objects-such as files, registry keys, processes, and ports-and detect/report unauthorized or unexpected changes for compliance and security auditing.

NEW QUESTION # 21

The details for an event are displayed in the exhibit. Based on these details, which Protection Module generated the event?

□

- A. Integrity Monitoring
- B. Firewall
- C. Web Reputation
- D. Intrusion Prevention

Answer: B

Explanation:

The event reason is "Unsolicited UDP," the action is "Deny," the direction is "Incoming," and protocol is UDP. This matches the function of the Firewall module, which inspects, permits, or blocks traffic based on rules and reports denied unsolicited network packets.

NEW QUESTION # 22

Which of the following Protection Modules does not benefit from Recommendation Scans?

- A. Integrity Monitoring
- B. Firewall
- C. Log Inspection
- D. Intrusion Prevention

Answer: C

Explanation:

Recommendation Scans analyze system roles and applications to suggest appropriate Firewall, Intrusion Prevention, and Integrity Monitoring rules, but do not provide recommendations for Log Inspection. Log Inspection rules must be assigned manually.

Trend Micro Deep Security Administrator's Guide, Recommendation Scan Section

NEW QUESTION # 23

How can you prevent a file from being scanned for malware?

- A. Add the file to the Exclusions list in the Malware Scan Configuration.
- B. Add the file to the Exclusions list in the "Allowed Spyware/Grayware Configuration".
- C. Enable "File Types scanned by IntelliScan" in the Malware Scan Configuration properties in the Deep Security Manager Web console. Click "Scan All Except" and type the filename to exclude from the scan.
- D. Edit the "Scan Exclusions" section of the dsa.properties configuration file on the Deep Security Agent computer to include the file name. Save the configuration file and restart the Deep Security Agent service.

Answer: A

Explanation:

To exclude files from malware scans, add them to the Exclusions list in the Malware Scan Configuration via the Deep Security Manager Web console. This is the official and recommended method.

From the official documentation:

"Files or folders added to the Exclusions list in the Malware Scan Configuration will not be scanned for malware." References:
