## Salesforce Certified Administrator Sample Questions (Q203-Q208):

### NEW QUESTION # 203

Cloud Kicks has a screen flow with two questions on the same screen, but only one is necessary at a time. The administrator has been asked to show only the questions that is needed.

How should an administrator complete this?

- A. Use a conditional visibility to hide the unnecessary question
- B. Use branching in the flow screen to show the proper scenario
- C. Use a decision element and a new screen to show the proper question
- D. Use a new version of the flow for each scenario.

**Answer: A**

### NEW QUESTION # 204

Cloud kicks wants to track shoe designs by products. Shoe designs should be unable to be deleted, and there can be multiple design for one product across various stages.

Which two steps should the administration configure to meet this requirement?

Choose 2 answers

- A. Create a Custom Object for shoe design.
- B. Add a custom master detail field for shoe design on the Product Object.
- C. Configure a Custom Lookup Field for shoe design on the product object.
- D. Use the Standard Object for designs.

**Answer: A,B**

### NEW QUESTION # 205

Universal Containers requires that when an Opportunity is closed won, all other open opportunities on the same account must be marked as closed lost.

Which automation solution should an administrator use to implement this request?

- A. Flow Builder
- B. Quick Action
- C. Outbound Message
- D. Workflow Rule

**Answer: A**

### NEW QUESTION # 206

An administrator is planning to use Data Loader to mass import new records to a custom object from a new API.

What will the administrator need to do to use the Data Loader?

- A. Append their security token at the end of their password to login.
- B. Reset their password and their security token.
- C. Use the Data Import Tool to mass import custom object records.
- D. Add a permission set that allows them to import data.

**Answer: A**

Explanation:

#### Explanation

To use Data Loader to mass import new records to a custom object from a new API, the administrator will need to append their security token at the end of their password to login. The security token is an alphanumeric code that is required for API access when logging in from an IP address that is not trusted by Salesforce. The security token can be obtained from the user's personal settings or by resetting it via email. Adding a permission set, resetting the password and the security token, or using the Data Import Tool are not necessary for using Data Loader. #### NEW QUESTION # 207

Ursa Major Solar wants to assist users with a guided expense report process to simplify submissions, routing, and authorizations. Which two tools should an administrator use to build this solution?

Choose 2 answers

- A. Flow Builder
- B. Approval Process
- C. Quick Action
- D. Validation Rule

**Answer: A,B**

Explanation:

Explanation

Flow builder and approval process are two tools that can be used by Ursa Major Solar to assist users with a guided expense report process to simplify submissions, routing, and authorizations. Flow builder is a tool that allows administrators to create flows, which are guided processes that collect data and perform actions in Salesforce; it can be used to create a screen flow that guides users through the steps of submitting an expense report, such as entering expense details, uploading receipts, etc. Approval process is a tool that allows administrators to create approval processes, which are automated processes that require approval from one or more approvers; it can be used to create an approval process that routes expense reports to the appropriate managers for authorization based on certain criteria, such as amount, type, etc. Validation rule, quick action are not tools for building a guided expense report process; they are used for different purposes such as enforcing data quality or creating records.
