However, with the help of the best training materials, you can completely pass Google Chrome-Enterprise-Administrator test in a short period of time. Don't you believe in it? Actual4Exams real questions and answers are the materials that it can help you get high marks and pass the certification exam. Please try it.

## Google Chrome-Enterprise-Administrator Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>• <b>Chrome Extensions:</b> This section of the exam measures skills of an Endpoint Security Manager and involves managing Chrome extension policies. It includes designing extension management strategies, handling extension exemptions, creating approval workflows, and assessing extensions for their risk and compliance with business continuity requirements.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>• <b>Chrome Updates:</b> This section of the exam measures skills of a Chrome IT Policy Analyst and addresses the various update methods available for Chrome. It includes selecting the right update strategy for different business and security needs, managing compliance across platforms, and adapting update methods based on environmental changes or risks.</li></ul>
Topic 3	<ul style="list-style-type: none"><li>• <b>Manage Chrome Enterprise in the Cloud:</b> This section of the exam measures skills of a Cloud Systems Administrator and focuses on preparing and configuring environments for Chrome cloud management. Candidates must demonstrate how to verify domains, use admin roles, configure organizational structures, deploy enrollment tokens, enable reporting, and maintain Chrome using the Google Admin console.</li></ul>
Topic 4	<ul style="list-style-type: none"><li>• <b>Analyze Chrome Data:</b> This section of the exam measures skills of a Chrome Data Analyst and focuses on using the Google Admin console to view, analyze, and troubleshoot browser data. It includes reviewing reports, diagnosing browser or update issues, investigating performance problems, and identifying security risks based on log events and Chrome activity.</li></ul>
Topic 5	<ul style="list-style-type: none"><li>• <b>Chrome Enterprise Management Fundamentals:</b> This section of the exam measures skills of a Chrome Device Administrator and covers the foundational elements of managing Chrome in an enterprise. It includes understanding how policies are applied and resolved, differentiating managed browsers from profiles, and describing how policies work. It also covers Chrome's built-in security features, how extensions are used and deployed, and how the release cycle and channels are managed.</li></ul>

## Latest Google - New Chrome-Enterprise-Administrator Exam Fee

We can promise that our Chrome-Enterprise-Administrator exam questions are always the latest and valid for we are always trying to do better for our worthy customers. The first and the most important thing is to make sure the high-quality of our Chrome-Enterprise-Administrator learning guide and keep it updated on time. Once any new question is found, we will send you a link to download a new version of the Chrome-Enterprise-Administrator Training Materials. So don't worry if you are left behind the trend. Experts in our company won't let this happen.

## Google Professional Chrome Enterprise Administrator Certification Exam Sample Questions (Q41-Q46):

### NEW QUESTION # 41

Which data point is available in the Chrome Versions report\\*?

- A. Inactive Browsers
- B. Total Browsers
- C. Last update
- **D. Active Browsers**

**Answer: D**

Explanation:

The Chrome Versions report specifically focuses on the distribution of different Chrome browser versions across the managed fleet. A key data point in this report is the number of "Active Browsers" on each version, allowing administrators to understand their update status and identify any significant fragmentation. While "Total Browsers" might be a related metric, the core focus of the "Versions" report is on the active instances and their respective versions. Information on "Inactive Browsers" or the "Last update" time for individual browsers might be found in other reports.

### NEW QUESTION # 42

The browser administrators at a company have configured the following extension policies:

Policy Name | Policy Value

----- | -----

ExtensionInstallAllowlist | [ "lpbdmphenhdhacbfcbdmnoffaepiici",  
"gihagpmigkmndpbjkmolikibogefcm", "enebfjpnlbicandncnfhaapucdmgkj",  
"hpkimhnadcdidjaeagpeeiklochd", "bnpplllbeanipnjdckniakhniegbcobanno"] ExtensionInstallBlocklist | [ ]  
ExtensionInstallForceList | [ "gihagpmigkmndpbjkmolikibogefcm:[https://clients2.google.com/service  
/update2/crx](https://clients2.google.com/service/update2/crx)", "ufninibicajhgibfhjcgimlmdhccodf;  
[https://clients2.google.com/service/update2/crx](https://clients2.google.com/service/update2/crx)",  
"hpkimhnadcdidjaeagpeeiklochd:[https://clients2.google.com/service/update2/crx](https://clients2.google.  
com/service/update2/crx)"]

An employee at the company wants to install an extension from the Chrome Web Store called "Grammar Friend" with the extension ID `ufninibicajhgibfhjcgimlmdhccodf`. What will happen when the user goes to the Grammar Friend page in the Chrome Web Store?

- A. The "Remove from Chrome" button will be available because the extension is already installed.
- B. A red banner that says "Your administrator has blocked this item (ID ufninibicajhgibfhjcgimlmdhccodf)" will appear, and the "Add to Chrome" button will be grayed out.
- C. The "Add to Chrome" button will be available to click, and the user can install the extension.
- **D. A blue banner that says "This item's installation is required by your organization" will appear, and the "Remove from Chrome" button will be grayed out.**

**Answer: D**

Explanation:

The extension ID `ufninibicajhgibfhjcgimlmdhccodf` is present in the `ExtensionInstallForceList`.

Extensions in this list are automatically installed and cannot be removed by the user. Therefore, when the user visits the Chrome Web

Store page for "Grammar Friend," they will see a blue banner indicating that the extension is required by their organization, and the "Remove from Chrome" button will be disabled. The "Add to Chrome" button will not be clickable in the standard way because it's already being force-installed.

#### NEW QUESTION # 43

In Chrome's Safe Browsing settings, which option provides the most robust protection against online threats and is suitable for a highly secure environment?

- A. Secure Browsing Mode
- **B. Enhanced Protection**
- C. Advanced Threat Protection
- D. Proactive Defense

**Answer: B**

Explanation:

Among the Safe Browsing options, **Enhanced Protection** offers the most robust security. It proactively checks URLs, downloads, and extensions against Google's Safe Browsing database in real time, and it can also share more data with Google to improve detection and provide personalized warnings. This level of protection is best suited for environments with high security requirements. The other options might represent different levels of Safe Browsing with varying degrees of protection.

#### NEW QUESTION # 44

A company is managing browsers in the Google Admin console. Security has scanned extensions in the organization and has determined that there are several extensions installed with ability to set proxy. This violates company policy. How would an administrator block these extensions?

- **A. Set permission policy in the Google Admin console to block such extensions**
- B. Set policy in the Google Admin console to block all extensions from being installed on the browser
- C. Remotely connect to each device and delete the extension from the browser
- D. Send an email to the users notifying them that they must uninstall the detected extensions

**Answer: A**

Explanation:

The Google Admin console allows administrators to control extension permissions. By configuring the "Permissions and URL access" policy, the administrator can block extensions that request specific permissions, such as the ability to set a proxy. This is a centralized and effective way to enforce the security policy. Remotely connecting to each device (option B) is not scalable. Blocking all extensions (option C) might be too restrictive. Relying on users to uninstall (option D) is not enforceable.

#### NEW QUESTION # 45

To reduce risk, an organization is required to maintain a minimum Chrome browser version. The organization allows updates but finds that not all browsers are within one major version of the stable release.

Which policy option would help an admin enforce Chrome browser updates to the latest major stable version via automatic updates?

- A. Relaunch notification
- **B. Auto-update check period**
- C. Rollback to target version
- D. Component updates

**Answer: B**

Explanation:

While not directly stating "enforce to the latest major stable version," the "Auto-update check period" policy, when configured appropriately (shorter intervals), ensures that devices check for and apply updates more frequently. This increases the likelihood of browsers reaching and staying closer to the latest stable version over time. "Rollback to target version" is for reverting updates, "Component updates" manages specific browser components, and "Relaunch notification" prompts users to restart after an update.
