1Z0-1055-25 Associate Level Exam, New 1Z0-1055-25 Test Vce

Entering a strange environment, we will inevitably be very nervous. And our emotions will affect our performance. That is why some of the candidates fail in their real exam. But if you buy our 1Z0-1055-25 exam questions, then you won't worry about this problem. Our 1Z0-1055-25 study guide has arranged a mock exam to ensure that the user can take the exam in the best possible state. We simulated the most realistic examination room environment so that users can really familiarize themselves with the examination room. And our 1Z0-1055-25 Practice Engine can give you 100% pass guarantee.

Oracle 1Z0-1055-25 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> Implementing Accounts Payable Balances: This section of the exam measures skills of Finance Operations Managers and covers Accounts Payable (AP) reporting, analysis, and period closing activities. It explains AP balance configurations, calendar management, and reconciliation with the General Ledger. Candidates must understand the setup of aging periods, payables calendars, and best practices for ensuring accurate financial close processes.
Topic 2	<ul style="list-style-type: none"> Implementing Expenses: This section of the exam measures skills of Expense Management Administrators and focuses on managing and configuring employee expense processes. It includes expense report processing, approval rules, and audit policies. Candidates must understand system configurations for templates, corporate card programs, conversion rate policies, travel integration, and AI-driven automation in expense management.
Topic 3	<ul style="list-style-type: none"> Implementing Supplier Invoices: This section of the exam measures skills of Financial Systems Specialists and covers the setup and processing of supplier invoices. It focuses on understanding supplier invoice processing, AI-assisted automation, and key configurations such as invoice options, distribution sets, tolerances, holds, approvals, and release procedures. Candidates also learn how to manage business rules for invoice validation and processing efficiency.
Topic 4	<ul style="list-style-type: none"> Setting up Common Configurations in the Supplier Invoice to Payments Process This section of the exam measures skills of Accounts Payable Analysts and focuses on understanding the core setup required for supplier invoicing and payment processes. It covers the Enterprise Structure, Financial Reporting Structure, and Data Security model. Candidates must know the purpose of Business Units and Reference Sets and be able to manage Supplier and Bank Account Master Data effectively.
Topic 5	<ul style="list-style-type: none"> Implementing Payments: This section of the exam measures skills of Payments Configuration Specialists and focuses on the payment lifecycle in the Oracle Fusion Payables module. It includes understanding the supplier payment process, AI role in automation, and the configuration of payment options, methods, disbursement choices, and process profiles. The section also involves managing approval workflows and payment process templates for secure and accurate disbursement management.

Oracle Fusion Cloud Financials: Payables and Expenses 2025 Implementation Professional Sample Questions (Q28-Q33):

NEW QUESTION # 28

SIMULATION

MANAGE EXPENSE REPORT TEMPLATE

Task 1:

Create an Expense Report Template for the US1 Business Unit, where:

- The effective start date is the current date.
- The hotel expense type requires itemization and should include Internet, Room Rate, and Dinner.
- The expense type is associated with the respective account
- Card Expense Type Mapping is not enabled.
- Company policy states that receipts
- Users can indicate receipts are missing in their expense report and a warning should be displayed for any missing receipts.
- All Expense Fields are optional.

Answer:

Explanation:

See the Explanation for Step by Step Solution

Explanation:

Task 1: Create an Expense Report Template for the US1 Business Unit

The following configurations need to be implemented:

- ✓ Effective Start Date: The current date.
- ✓ Hotel Expense Type: Requires itemization with Internet, Room Rate, and Dinner.
- ✓ Expense Type: Associated with the respective GL account.
- ✓ Card Expense Type Mapping: Not enabled.
- ✓ Receipts Policy: Users can indicate missing receipts, and a warning should be displayed.
- ✓ Expense Fields: All fields should be optional.

Step-by-Step Solution

Step 1: Navigate to Expense Report Templates

Log in to Oracle Financials Cloud with the Expense Manager or Financial Administrator role.

Navigate to Setup and Maintenance.

In the Search Bar, type "Manage Expense Report Templates".

Click on Manage Expense Report Templates.

Step 2: Create a New Expense Report Template

Click Create New Template.

Enter the following details:

Name: "US1 Business Unit Expense Report"

Business Unit: US1 Business Unit

Effective Start Date: (Set to current date)

Enable for Use: ✓ (Check this box)

Click Save.

Step 3: Define the Expense Type - Hotel with Itemization

Navigate to the Expense Types tab.

Click Add Expense Type.

Enter the following details:

Expense Type Name: "Hotel"

Expense Category: "Lodging"

Requires Itemization: ✓ (Check this box)

Under Itemization, click Add Itemization Categories:

Internet

Room Rate

Dinner

Click Save.

Step 4: Associate Expense Types with GL Accounts

Click on Edit Expense Type "Hotel".

Go to the Accounting section.

Select the appropriate GL Account for lodging expenses.

Repeat this process for other required expense types.

Click Save and Close.

Step 5: Disable Card Expense Type Mapping

Navigate to the Corporate Card Expense Mapping tab.

Ensure the "Enable Corporate Card Mapping" checkbox is unchecked.

Click Save.

Step 6: Configure Receipts Policy

Navigate to the Receipts tab.

Under Receipt Handling, set:

Company Policy: Employees must provide receipts.

Allow users to indicate missing receipts? ✓ (Check this box).

Action for Missing Receipts: Raise a Warning (so that expense submission is not blocked).

Click Save.

Step 7: Set Expense Fields as Optional

Navigate to the Fields Setup tab.

Ensure all Expense Fields are set to Optional.

Click Save and Close.

Step 8: Validate and Activate the Template

Review all configurations.

Click Submit and Activate.

Run the Validate and Deploy Expense Templates process to ensure all settings are applied.

Step 9: Testing the Expense Report Template

Simulate an Expense Report Submission:

Select Hotel Expense and enter details.

Verify if the system requires itemization (Internet, Room Rate, Dinner).

Submit without a receipt to check if a warning is displayed.

Ensure all fields remain optional.

Verify no corporate card expense mapping applies.

Expected Outcome:

- ✓ The Expense Report Template is successfully created for US1 Business Unit.
- ✓ Hotel expenses require itemization into Internet, Room Rate, and Dinner.
- ✓ Receipts are required, and a warning is displayed for missing receipts.
- ✓ GL Account mapping is correctly applied to each expense type.
- ✓ Card Expense Type Mapping is disabled.
- ✓ All fields are optional, allowing flexible data entry.

Conclusion

By following these steps, we have successfully created and configured an Expense Report Template that meets all business requirements for the US1 Business Unit.

NEW QUESTION # 29

An installment meets all the selection criteria of a Payment Process Request, but it still does not get selected for payment processing. What are the two reasons for this?

- A. The pay-through date is in a closed Payables period.
- B. The invoice has not been accounted.
- C. The invoice requires approval.
- D. The pay-through date is in a future period.
- E. The invoice needs re-validation.

Answer: C,E

Explanation:

Comprehensive and Detailed In-Depth

In Oracle Financials Cloud, even when an installment meets the selection criteria of a Payment Process Request (PPR), certain conditions can prevent it from being selected for payment processing. Understanding these conditions is crucial for troubleshooting and ensuring a smooth payment workflow.

Analysis of Each Option:

A . The pay-through date is in a future period.

The pay-through date in a PPR determines the latest due date of invoices to be included for payment. Setting this date in the future is a common practice to include all invoices due up to that date. Therefore, having a pay-through date in a future period would not prevent installments from being selected; instead, it broadens the selection criteria. This is not a reason for an installment not being selected.

B . The pay-through date is in a closed Payables period.

The pay-through date affects which invoices are selected based on their due dates, but it does not directly relate to the status of accounting periods. While processing payments in a closed period is not allowed, the pay-through date itself being in a closed period does not prevent installment selection. Therefore, this is not a valid reason for an installment not being selected.

C . The invoice needs re-validation.

Invoices that have undergone changes affecting their payment attributes may require re-validation. If an invoice is in a status indicating it needs re-validation, it will not be selected for payment processing until the validation process is successfully completed.

This ensures that all invoice data is accurate and meets the necessary criteria for payment. According to Oracle documentation, an installment might not get selected if "The invoice must be revalidated." docs.oracle.com D . The invoice requires approval.

Invoices often need to go through an approval workflow to ensure their legitimacy and accuracy. If an invoice has not received the necessary approvals, it remains in a pending status and is excluded from payment processing. Ensuring that all invoices are approved is essential for them to be selected in a PPR. The Oracle documentation states that an installment might not get selected if "The invoice requires approval." docs.oracle.com E . The invoice has not been accounted.

While accounting is a critical aspect of financial management, the accounting status of an invoice does not typically prevent it from being selected for payment. Invoices can be selected and paid even if they have not yet been accounted, with accounting entries being created subsequently. Therefore, the lack of accounting is not a reason for an installment not being selected in a PPR.

Conclusion:

The two primary reasons an installment, despite meeting selection criteria, might not be selected for payment processing are:

C . The invoice needs re-validation.

D . The invoice requires approval.

Ensuring that all invoices are validated and approved is essential for their inclusion in payment processing.

NEW QUESTION # 30

You implemented the service provider model for Payables payments, where your United Kingdom (UK) headquarters works solely as an outsourced payment processing unit on behalf of your other UK business units.

What is this type of payment service provider model known as?

- A. Dedicated
- B. Dedicated and Self-Service
- C. Procurement
- D. Self-Service

Answer: A

NEW QUESTION # 31

One of your clients notifies their suppliers of rejected invoices via email. You suggest that they instead send notifications to suppliers for rejected electronic invoices using industry-standard XML as a UBL 2.1 Invoice Response Message. Your client wants to know about the benefits of making this switch.

Which two benefits of this feature can you share with them?

- A. The notification provides suppliers with the option to request Payables manual intervention and support.
- B. You can customize automatic responses per invoice type.
- C. Suppliers can view the rejection reason in their system and take corrective action.
- D. There is automatic processing of electronic response messages.

Answer: B,D

NEW QUESTION # 32

Which three options are available to filter data when you submit the Prepare Payables to Ledger Reconciliation Report?

- A. Natural Account
- B. Supplier
- C. Balancing Segment Value
- D. Primary Ledger
- E. Accounting Period
- F. Business Unit

Answer: C,E,F

Explanation:

Comprehensive and Detailed In-Depth

The Prepare Payables to General Ledger Reconciliation process in Oracle Financials Cloud is essential for ensuring that your payables and general ledger data are aligned. When submitting this process, you have several parameters available to filter and select the specific data you need for reconciliation. The key parameters include:

Business Unit (Option A):

Purpose: Allows you to reconcile data for a specific business unit within your organization. This is particularly useful if your enterprise structure includes multiple business units and you need to focus on one at a time.

Reference:

Accounting Period (Option B):

Purpose: Enables you to select the accounting period (either open or closed) for which you want to prepare the reconciliation data. This ensures that the report focuses on the transactions relevant to the specified time frame.

Balancing Segment Value (Option C):

Purpose: Allows you to filter the data by specific balancing segment values, which correspond to entities like companies or divisions within your chart of accounts. This is useful for reconciling data at a more granular level.

While options D (Supplier), E (Primary Ledger), and F (Natural Account) are important attributes within the payables and general ledger modules, they are not listed as direct filter parameters for the Prepare Payables to General Ledger Reconciliation process. Therefore, the correct answers are A. Business Unit, B. Accounting Period, and C. Balancing Segment Value.
