Salesforce Consumer Goods Cloud Accredited Professional Sample Questions (Q23-Q28):

NEW QUESTION # 23

When performing a search in an inventory check task which products are considered for the search?

- A. All products associated with the retail store
- B. All products owned by the user
- C. All products created by the user
- D. All products in the organization

Answer: A

NEW QUESTION # 24

When performing a search in an inventory check task which products are considered for the search?

- A. All products associated with the retail store
- B. All products owned by the user
- C. All products created by the user
- D. All products in the organization

Answer: A

Explanation:

When performing a search in an inventory check task, only the products that are associated with the retail store are considered for the search. This is because the inventory check task is designed to verify the availability and quantity of products in a specific store location. Verified Reference: [Salesforce Consumer Goods Cloud Implementation Guide], page 28.

NEW QUESTION # 25

Which three Consumer Goods Cloud(CGC) objects are linked to the product2 object in the CGC data model?

- A. Store Product
- B. Assessment Task Product
- C. Delivery Product
- D. Assortment Product
- E. Promotion Product

Answer: A,D,E

Explanation:

Assortment Product, Promotion Product, and Store Product are three Consumer Goods Cloud objects that are linked to the product2 object in the CGC data model. These objects represent different aspects of products in relation to retail stores. They are: Assortment Product, which represents a product that is part of an assortment list for a retail store. An assortment list is a list of products that should be available in a store based on various factors, such as seasonality, demand, or strategy. Promotion Product, which represents a product that is part of a promotion for a retail store. A promotion is an offer or incentive that aims to increase sales or awareness of a product or brand. Store Product, which represents a product that is associated with a specific retail store location. A store product contains information such as the quantity, price, and availability of the product in the store. Verified Reference: [Salesforce Consumer Goods Cloud Implementation Guide], page 19-20.

NEW QUESTION # 26

Which three fields are available on the Retail Store object that differentiate them from the Account object?

- A. Delivery Method
- B. Shipping Address
- C. Payment Method
- D. Preferred Visit Hours
- E. Operating Hours

Answer: B,D,E

Explanation:

These fields on the Retail Store object differentiate it from the Account object, providing specific information about store operations,

preferred visit timings, and shipping details.

NEW QUESTION # 27

Universal Containers (UC) is a Communications Service Provider using Communications Cloud. As part of Internet order fulfillment, UC warehouse agents will use Salesforce to enter a router's barcode and enter the shipping tracking number for the router. How should a Communications Cloud Consultant solve this requirement?

- A. Configure a Push Event Orchestration Item that will receive the router's barcode number and shipping tracking number
- B. Configure an Autotask Orchestration Item that will automatically launch an OmniScript to enter the router's barcode number and shipping tracking number
- **C. Configure a Manual Task Orchestration Item that will launch an OmniScript to enter the router's barcode number and shipping tracking number**
- D. Configure a Manual Task Orchestration Item that will launch a Flow to enter the router's barcode number and shipping tracking number

Answer: C

Explanation:

Warehouse agents manually entering router barcode and shipment tracking numbers requires a human task in Order Management. Salesforce best practice:

Use a Manual Task Orchestration Item when human input is required.

Launch an OmniScript to capture structured data, validate inputs, and update Fulfillment data.

Why the others are incorrect:

A (Flow) - Flows are not the recommended UI for OM tasks; OmniScripts provide better control, validations, dynamic forms, and DC/CPQ consistency.

B (Push Event) - Push tasks send tasks to external queues/systems, not internal warehouse agents.

C (Autotask) - Auto Tasks run without human interaction, so cannot capture barcodes manually.

NEW QUESTION # 28

.....

At the PassLeader, we guarantee that our customers will receive the best possible Consumer-Goods-Cloud-Accredited-Professional study material to pass the Salesforce Consumer Goods Cloud Accredited Professional (Consumer-Goods-Cloud-Accredited-Professional) certification exam with confidence.
