## **New Fortinet NSE7\_CDS\_AR-7.6 Exam Question, New NSE7\_CDS\_AR-7.6 Exam Sample**

The earlier you get NSE7\_CDS\_AR-7.6 exam certification, the more helpful for you to have better development in IT industry. Maybe you have heard that the important NSE7\_CDS\_AR-7.6 exam will take more time or training fee, because you haven't use our NSE7\_CDS\_AR-7.6 exam software provided by our Pass4sureCert. The complex collection and analysis of NSE7\_CDS\_AR-7.6 Exam Materials have been finished by our professional team for you. You just need to effectively review and pass NSE7\_CDS\_AR-7.6 exam successfully.

## **Fortinet NSE 7 - Public Cloud Security 7.6 Architect Sample Questions (Q37-Q42):**

### NEW QUESTION # 37

An Azure administration team is looking for a FortiGate high availability (HA) solution that is able to:

- Filter east-west traffic
- Filter north-south traffic
- Scale up
- Scale out

Which HA deployment meets all of the requirements?

- A. Active-active with external and internal load balancers
- B. Active-active with Azure Gateway load balancer
- C. Active-passive with external and internal load balancers
- D. Active-passive with SDN connector

**Answer: A**

### NEW QUESTION # 38

In an SD-WAN TGW Connect topology, which three initial steps are mandatory when routing traffic from a spoke VPC to a security VPC through a Transit Gateway? (Choose three.)

- A. From the security VPC TGW subnet routing table, point 0.0.0.0/0 traffic to the FortiGate internal port.
- B. From both spoke VPCs and the security VPC, point 0.0.0.0/0 traffic to the Internet Gateway.
- C. From the spoke VPC internal routing table, point 0.0.0.0/0 traffic to the TGW.
- D. From the security VPC FortiGate internal subnet routing table, point 0.0.0.0/0 traffic to the TGW.
- E. From the security VPC TGW subnet routing table, point 0.0.0.0/0 traffic to the TGW.

**Answer: A,C,E**

Explanation:

In an SD-WAN TGW Connect topology, to route spoke VPC traffic through the Security VPC FortiGate via the Transit Gateway, the following are mandatory:

- The Security VPC TGW subnet route table must send 0.0.0.0/0 traffic to the TGW, so inbound spoke traffic can reach the FortiGate.
- The Security VPC FortiGate internal subnet route table must send 0.0.0.0/0 traffic to the FortiGate internal port, ensuring inspection.
- The Spoke VPC internal route table must point 0.0.0.0/0 to the TGW, so all spoke traffic is routed via the Transit Gateway toward the Security VPC.

### NEW QUESTION # 39

Refer to the exhibit. An administrator is trying to deploy a FortiGate VM in Microsoft Azure using Terraform. However, during the configuration, the Azure client secret is no longer visible in the Azure portal.

How would the administrator obtain the Azure client secret to configure on Terraform?

The screenshot shows the Azure portal interface for an application registration. The left sidebar contains navigation links: Overview, Quickstart, Integration assistant, Manage, Branding & properties, Authentication, Certificates & secrets (selected), Token configuration, API permissions, Expose an API, App roles, Owners, and Roles and administrators. The main content area is titled '-app | Certificates & secrets'. It includes a search bar, a 'Got feedback?' link, and a message: 'Credentials enable confidential applications to identify themselves to the authentication service when receiving tokens at a web addressable location (using an HTTPS scheme). For a higher level of assurance, we recommend using a certificate (instead of a client secret) as a credential.' Below this, there are tabs for 'Certificates (0)', 'Client secrets (1)', and 'Federated credentials (0)'. The 'Client secrets (1)' tab is active, showing a table with one entry. The table has columns: Description, Expires, Value, and Secret ID. The entry is 'lab-trble', expires on '4/7/2023', and has a secret ID of '05a36152-3c38-454d-9846-077309418f12'. The 'Value' column is masked with 'DEQ\*\*\*\*\*'. A '+ New client secret' link is visible above the table. A watermark 'pass4surecert.com' is overlaid on the image.

Description	Expires	Value	Secret ID
lab-trble	4/7/2023	DEQ*****	05a36152-3c38-454d-9846-077309418f12

- A. Create a new client secret and take note of it.
- B. Log in to the Azure CLI as a power user to obtain the client secret.
- C. Create a new Azure account and assign it the Administrator role.
- D. Use the Terraform output file values to obtain the client secret.

**Answer: A**

Explanation:

In Azure, once a client secret is created, its value is only visible at creation time. If it is no longer visible, the administrator cannot recover it. The correct step is to create a new client secret and securely record it for use with Terraform.

#### NEW QUESTION # 40

Refer to the exhibit. In which type of FortiCNP insights can an administrator examine the findings triggered by this policy?

AV Scan Policy FC-ACT-254

Description Scan for malware during Discovery Scan, and triggers an alert when targets with malware are accessed.

Enabled Contexts 1 / 1

Context Name \* AV Scan Policy

Enabled \* On Off

Applied To \* Account: All

Context Description Scan for malware during Discovery Scan, and triggers an alert when targets with malware are accessed.

- A. Risk
- B. User activity
- C. Data
- D. Threat

**Answer: D**

Explanation:

The policy shown is an AV Scan Policy that scans for malware during discovery and raises alerts when malicious targets are accessed. Findings from such policies are categorized under Threat insights in FortiCNP, since they deal with detection of malware and malicious activity.

#### NEW QUESTION # 41

Which statement about immutable infrastructure in automation is true?

- A. It is the practice of applying hotfixes and OS patches after deployment.
- B. It is the practice of deploying a new server for every configuration change.
- C. It is the practice of deploying two parallel servers for high availability.
- D. It is the practice of modifying the existing server configuration after it is deployed.

**Answer: B**

Explanation:

Immutable infrastructure means that servers are never modified after deployment. Instead, any configuration change or update is applied by deploying a new server instance with the desired configuration, ensuring consistency and reducing configuration drift.

## NEW QUESTION # 42

.....

Pass4sureCert makes your NSE7\_CDS\_AR-7.6 exam preparation easy with its various quality features. Our NSE7\_CDS\_AR-7.6 exam braindumps come with 100% passing and refund guarantee. Pass4sureCert is dedicated to your accomplishment, hence assures you successful in NSE7\_CDS\_AR-7.6 Certification exam on the first try. If for any reason, a candidate fails in NSE7\_CDS\_AR-7.6 exam then he will be refunded his money after the refund process. Also, we offer 1 year free updates to our NSE7\_CDS\_AR-7.6 Exam esteemed user, these updates are applicable to your account right from the date of purchase. 24/7 customer support is favorable to candidates who can email us if they find any ambiguity in the NSE7\_CDS\_AR-7.6 exam dumps, our support will merely reply to your all NSE7\_CDS\_AR-7.6 exam product related queries.
