Since it is desktop-based Microsoft MB-820 practice exam software, it is not necessary to connect to the internet to use it.

Microsoft Dynamics 365 Business Central Developer Sample Questions (Q85-Q90):

NEW QUESTION # 85

You need to create the code related to the Subcontract Documents table to meet the requirement for the quality department.

How should you complete the code segment? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

NEW QUESTION # 86

You plan to run a debug for a client.

You extend the Standard Sales - Invoice report to add a new requirement.

You create a Report Extension 'Ext Standard Sales - Invoice' with ID = 50100 and add the following lines of code. (Line numbers are included for reference only.)

The client informs you that the value of the New Total VATBaseLCY column is incorrect.

You need to run a debug to identify the cause.

Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Answer:

Explanation:

Explanation:

Here's the process to follow in the correct sequence:

* In Visual Studio Code, locate the Ext Standard Sales - Invoice report extension from your application.

* The first step is to locate the specific extension you're working with so you can modify or inspect its code.

* Search where the NewTotalVATBaseLCY variable is being calculated and set a breakpoint on the line.

* To debug the issue, you need to place a breakpoint on the line where the NewTotalVATBaseLCY is calculated.

* Start debugging.

* Once the breakpoint is set, you begin the debugging process to examine the values and code execution.

* Use the step-over functionality.

* After starting the debugging, you will use the step-over functionality to move through the code line by line and observe the values of the variables.

NEW QUESTION # 87

A company uses Azure Application Insights for Business Central online in its production environment.

A user observes that some job queues go into the failed state and require manual intervention.

You need to analyze job queue lifecycle telemetry.

How should you complete the code segment? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation:

KQL Code Segment:

* First command (traces):

* The query begins with traces to analyze telemetry data logs. The next command determines how the results are filtered or displayed.

* take 100: This is the correct option to retrieve the top 100 rows from the traces table.

* Command for selecting fields:

* project: This command is used to select specific fields from the telemetry data, allowing you to retrieve and display only the fields relevant to the job queue telemetry.

* The correct answer is project, as it allows you to choose fields like jobQueueObjectId, jobQueueObjectType, etc., from the customDimensions table.

NEW QUESTION # 88

You need to use a query data type to retrieve required data.

How should you complete the code? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

NEW QUESTION # 89

You need to define the properties for the Receipt No. field in the Non-conformity table when storing the information to the purchasing department. How should you complete the code segment? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

NEW QUESTION # 90

.....
