Topic 4	<ul style="list-style-type: none">• Testing: Covers evaluating unit test effectiveness against a block of code and modifying tests to improve their coverage and reliability.
Topic 5	<ul style="list-style-type: none">• Asynchronous Programming: Covers asynchronous programming concepts and understanding how the event loop controls execution flow and determines outcomes.

Free PDF 2026 JS-Dev-101: High-quality Salesforce Certified JavaScript Developer - Multiple Choice Instant Access

The Pass4sureCert JS-Dev-101 exam questions are being offered in three different formats. These formats are JS-Dev-101 PDF dumps files, desktop practice test software, and web-based practice test software. All these three JS-Dev-101 exam dumps formats contain the Real JS-Dev-101 Exam Questions that assist you in your Salesforce Certified JavaScript Developer - Multiple Choice practice exam preparation and finally, you will be confident to pass the final Salesforce Certified JavaScript Developer - Multiple Choice (JS-Dev-101) exam easily.

Salesforce Certified JavaScript Developer - Multiple Choice Sample Questions (Q112-Q117):

NEW QUESTION # 112

At Universal Containers, every team has its own way of copying JavaScript objects. The code snippet shows an implementation from one team:

```
01 function Person() {
02   this.firstName = "John";
03   this.lastName = "Doe";
04   this.name = () => {
05     console.log('Hello ${this.firstName} ${this.lastName}');
06   }
07 }
08
09 const john = new Person();
10 const dan = JSON.parse(JSON.stringify(john)); // (intended deep copy)
11 dan.firstName = 'Dan';
12 dan.name();
```

(Original line 10 is logically intended to be `JSON.parse(JSON.stringify(john))` to perform a JSON clone.) What is the output of the code execution?

- A. Hello Dan
- **B. TypeError: dan.name is not a function**
- C. Hello Dan Doe
- D. Hello John Doe

Answer: B

Explanation:

`JSON.stringify(john)` converts the `john` object into a JSON string.

When you `JSON.parse` that string back, you get a plain object:

Only data that can be represented in JSON is preserved (numbers, strings, booleans, arrays, plain objects).

Functions are not preserved and are dropped.

So `dan` is a plain object with properties `firstName` and `lastName`, but no `name` method.

Therefore, `dan.name` is undefined, and `dan.name()` throws:

`TypeError: dan.name is not a function`

The literal string interpolation inside `console.log('Hello ${...}')` is also wrong (single quotes), but the code never reaches that line.

NEW QUESTION # 113

A developer is wondering whether to use `Promise.then` or `Promise.catch`, especially when a `Promise` throws an error?

Which two promises are rejected?

Which 2 are correct?

- A. `New Promise(() => (throw 'cool error here')).then(null, error => console.error(error))`;
- **B. `Promise.reject('cool error here').catch(error => console.error(error))`;**
- **C. `New Promise((resolve, reject) => (throw 'cool error here')).catch(error => console.error(error))` ;**

- D. `Promise.reject('cool errorhere').then(error => console.error(error));`

Answer: B,C

NEW QUESTION # 114

Considering the implications of 'use strict' on line 04, which three statements describe the execution of the code?
Choose 3 answers

- A. 'use strict' has an effect only on line 05.
- B. 'use strict' has an effect between line 04 and the end of the file.
- C. z is equal to 3.14.
- D. Line 05 throws an error.
- E. 'use strict' is hoisted, so it has an effect on all lines.

Answer: A,C,D

NEW QUESTION # 115

Refer to code below:

```
console.log(0);
setTimeout(() => (
  console.log(1);
});
console.log(2);
setTimeout(() => {
  console.log(3);
}, 0);
console.log(4);
```

In which sequence will the numbers be logged?

- A. 02431
- B. 02413
- C. 01234
- D. 0

Answer: A

NEW QUESTION # 116

Given the expressions var1 and var2, what are two valid ways to return the concatenation of the two expressions and ensure it is string? Choose 2 answers

- A. `var1 + var2`
- B. `String(var1).concat(var2)`
- C. `var1.toString() var2.toString()`
- D. `string.concat(var1 +var2)`

Answer: C,D

NEW QUESTION # 117

.....

By focusing on how to help you more effectively, we encourage exam candidates to buy our JS-Dev-101 study braindumps with high passing rate up to 98 to 100 percent all these years. Our experts designed three versions for you rather than simply congregate points of questions into JS-Dev-101 real questions. Efforts conducted in an effort to relieve you of any losses or stress. So our activities are not just about profitable transactions to occur but enable exam candidates win this exam with the least time and get the most useful contents. We develop many reliable customers with our high quality JS-Dev-101 Prep Guide. When they need the similar exam materials and they place the second even the third order because they are inclining to our JS-Dev-101 study
