### NEW QUESTION # 177

A newly configured Cisco Unified Communications system with Cisco Unity Connection has been implemented in a company. There is a concern that the voicemail system can be used to make unauthorized calls by external callers. What must be configured to reduce this risk?

- A. Mobile and Remote Access

- B. phone PIN and web application password
- **C. phone PIN**
- D. HTTPS and TLS for encrypted communication

**Answer: C**

Explanation:

To prevent unauthorized access to the voicemail system and reduce the risk of toll fraud (making unauthorized external calls via voicemail), configuring a phone PIN for voicemail access is essential. Here's why:

1. Phone PIN Security:

\* A phone PIN adds a layer of authentication for accessing voicemail. Without it, external callers might exploit the voicemail system to make unauthorized calls, especially if default PINs are not changed.

2. Preventing Toll Fraud:

\* Toll fraud often occurs when malicious actors gain access to voicemail menus configured to dial out or transfer calls. By requiring a secure PIN, this risk is significantly reduced.

### NEW QUESTION # 178

Drag and drop the steps from the left into the correct order on the right that describes the flow of presence updates when a user manually sets the presence status in Cisco Jabber. Not all options are used.

**Answer:**

Explanation:

Step 1 - A

Step 2 - B

Step 3 - D
